(b) Applications must be on forms provided by the commissioner containing information established by rule. The initial application for a permit must be accompanied by a nonrefundable application fee of \$100 for each location where the pesticides are stored. An application for a facility that includes both fertilizers as regulated under chapter 18C and bulk pesticides as regulated under this chapter shall pay only one application fee of \$100.

(c) The commissioner shall by rule develop and implement a program to regulate bulk pesticides. The rules must include installation of secondary containment devices, storage site security, safeguards, notification of storage site locations, criteria for permit approval, a schedule for compliance, and other appropriate requirements necessary to minimize potential adverse effects on the environment. The rules must conform with existing rules of the pollution control agency.

(d) A person must obtain a permit from the commissioner on forms provided by the commissioner before the person constructs or substantially alters a bulk pesticide storage facility. If an application is incomplete the commissioner must notify the applicant as soon as possible. The permit must be acted upon within 30 days after receiving a completed application.
