4.18 and administrative responsibilities for inspection programs on some or all public waters
4.19 within their jurisdiction.

4.20 (b) Inspectors may visually and tactilely inspect watercraft and water-related
4.21 equipment to determine whether aquatic invasive species, aquatic macrophytes, or water
4.22 is present. If a person transporting watercraft or water-related equipment refuses to

4.30 that aquatic invasive species, aquatic macrophytes, or water is present on the watercraft or
4.31 water-related equipment.

4.32 (d) Conservation officers or other licensed peace officers may utilize check stations
4.33 in locations, or in proximity to locations, where watercraft or other water-related
4.34 equipment is placed into or removed from waters of the state. Any check stations shall be
4.35 operated in a manner that minimizes delays to vehicles, equipment, and their occupants.

5.1 (e) Conservation officers or other licensed peace officers may order water-related
5.2 equipment to be removed from a water body if the commissioner determines such action is
5.3 needed to implement aquatic invasive species control measures.

5.4 (f) The commissioner may require mandatory inspections of water-related equipment
5.5 before a person places or removes water-related equipment into or out of a water body.
5.6 Inspection stations may be located at or near public water accesses or in locations that
5.7 allow for servicing individual or multiple water bodies. The commissioner shall ensure
5.8 that inspection stations:

5.10 (2) allow for reasonable travel times between public accesses and inspection stations
5.11 if inspection is required before placing water-related equipment into a water body;

5.12 (3) are located so as not to create traffic delays or public safety issues;

5.13 (4) have decontamination equipment available to bring water-related equipment
5.14 into compliance; and

5.15 (5) do not reduce the capacity or hours of operation of public water accesses.

5.16 (g) The commissioner may authorize tribal and local governments that enter into
5.17 a delegation agreement with the commissioner to conduct mandatory inspections of
5.18 water-related equipment at specified locations within a defined area before a person

5.20 governments that are authorized to conduct inspections under this paragraph must:

5.21 (1) assume all legal, financial, and administrative responsibilities for implementing
5.22 the mandatory inspections, alone or in agreement with other tribal or local governments;

5.25 approved by the commissioner;

5.26 (4) have decontamination equipment available at inspection stations or identify
5.27 alternative decontamination equipment locations within a reasonable distance of the
5.28 inspection station that can bring water-related equipment into compliance;

5.29 (5) provide for inspection station locations that do not create traffic delays or public
5.30 safety issues; and

5.31 (6) submit a plan approved by the commissioner according to paragraph (h).

5.32 (h) Plans required under paragraph (g) must address:

5.33 (1) no reduction in capacity or hours of operation of public accesses and fees that
5.34 do not discourage or limit use;

5.35 (2) reasonable travel times between public accesses and inspection stations;

6.1 (3) adequate staffing to minimize wait times and provide adequate hours of operation
6.2 at inspection stations and public accesses;

6.3 (4) adequate enforcement capacity;

6.4 (5) measures to address inspections of water-related equipment at public water
6.5 accesses for commercial entities and private riparian land owners; and

6.6 (6) other elements as required by the commissioner to ensure statewide consistency,
6.7 appropriate inspection and decontamination protocols, and protection of the state's
6.8 resources, public safety, and access to public waters.

6.9 (i) A government unit authorized to conduct inspections under this subdivision must
6.10 submit an annual report to the commissioner summarizing the results and issues related
6.11 to implementing the inspection program.

6.12 (j) The commissioner may waive the plan requirement in paragraph (g) for inspection
6.13 programs where authorized inspectors are placed directly at one or more water access
6.14 sites, with no requirement for a person to travel from the water access for inspection
6.15 or decontamination, and no local ordinance or other regulation requiring a mandatory
6.16 inspection before placing watercraft or water-related equipment into a water body or after
6.17 watercraft or water-related equipment are removed from a water body.
