13.10	Section 1. [17.9891] PURPOSE.
13.11	The commissioner, in consultation with the Pollution Control Agency (PCA),
13.12	Department of Natural Resources (DNR), and Board of Water and Soil Resources
13.13	(BWSR), may implement a Minnesota agricultural water quality certification program
13.14	(MAWQCP) whereby once a producer demonstrates practices and management sufficient
13.15	to protect and enhance water quality, the producer is exempt from having to comply with
13.16	new rules affecting agricultural or land management practices that could affect water
13.17	quality for up to ten years. The program shall be a voluntary program that is first piloted in
13.18	selected watersheds across the state, until such time as the commissioner, in consultation
13.19	with the PCA, DNR, and BWSR, determines the program is ready to be expanded.
13.20	Sec. 2. [17.9892] DEFINITIONS.
13.21	Subdivision 1. Technical assistance. "Technical assistance" means professional,
13.22	advisory, or cost-share assistance provided to individuals that is designed to achieve
13.23	MAWQCP certification.
13.24	Subd. 2. Certifying agent. "Certifying agent" means a person who is authorized
13.25	by the commissioner to assess producers to determine whether a producer satisfies the
13.26	standards of the Minnesota agricultural water quality certification program.
13.27	Subd. 3. Conflict of interest. "Conflict of interest" means an occurrence of a
13.28	certifying agent also providing technical assistance to the same producer.
13.29	Subd. 4. Certification. "Certification" means a producer has demonstrated
13.30	compliance with all applicable environmental rules and statutes for all of the producer's
13.31	owned and rented agricultural land, and has achieved a satisfactory score through the
13.32	certification instrument and verified by a certifying agent. A certification is valid for up to
13.33	ten years, as long as the producer maintains compliance with original certification practices.

14.1	Subd. 5. Eligible land. "Eligible land" means all acres of an agricultural operation
14.2	of a producer, whether or not contiguous, that are under the effective control of the
14.3	producer at the time the producer enters into the certification program, and is operated
14.4	by the producer with equipment, labor, and management.
14.5	Subd. 6. Effective control. "Effective control" means possession of the land
14.6	by ownership, written lease, or other legal agreement and authority to act as decision

14.9	Sec. 3. [17.9893] CERTIFICATION INSTRUMENT.
14.10	The commissioner, in consultation with the PCA, DNR, and BSWR, shall develop an
14.11	analytical instrument to assess the water quality practices and management of agricultural
14.12	operations. This instrument shall be used to certify the water quality practices and
14.13	management of an agricultural operation are consistent with state water quality goals and
14.14	standards. The commissioner shall define a satisfactory score for certification purposes.
14.15	The certification instrument tool shall:
14.16	(1) integrate applicable existing regulatory requirements;
14.17	(2) utilize technology and prioritize ease of use;
14.18	(3) utilize a water quality index or score applicable to the landscape;
14.19	(4) incorporate a process for updates and revisions as practices, management, and
14.20	technology changes become established and approved; and
14.21	(5) comprehensively address water quality impacts.
14.22	Sec. 4. [17.9894] LICENSE.
14.23	Subdivision 1. License. Any person who offers certification services to producers
14.24	as part of this program must satisfy all criteria in subdivision 2 and be licensed by
14.25	the commissioner. A certifying agent is ineligible to provide certification services to

Subdivision 1. **Duties of certifying agent.** A certifying agent shall conduct formal certification assessment utilizing the certification instrument to determine whether a producer meets the criteria set forth in the program. If a producer satisfies all requirements, the certifying agent shall notify the commissioner of the producer's eligibility and request that the state issue a certificate. All records and documents used in the assessment shall be compiled by the certifying agent and submitted to the commissioner.

Subd. 2. Violations. In the event a certifying agent violates any provision of this chapter or an order of the commissioner, the commissioner may issue a written warning, or a correction order, and may suspend or revoke a license. If a license or certificate is suspended or revoked, the certifying agent has ten days from the suspension or revocation to appeal. If a certifying agent appeals, the commissioner shall hold an administrative hearing within 30 days of the suspension or revocation of the license, or longer by agreement of the parties, to determine whether the license is revoked or suspended. The commissioner shall issue an opinion within 30 days. An appeal of the commissioner's decision shall be made pursuant to Minnesota Statutes, sections 14.63 to 14.68.

Sec. 6. [17.9896] CERTIFICATION PROCEDURES.

A producer who seeks certification of eligible land shall conduct an initial assessment using the certification instrument, obtain technical assistance, if necessary, to achieve a satisfactory score on the certification instrument, and apply for certification from a licensed certifying agent. Once certified, if a producer obtains effective control in additional agricultural land, the producer must notify a certifying agent and obtain certification on the additional land within one year in order to maintain the producer's original certification. The commissioner may terminate a certification if the producer fails to obtain certification on any additional land for which the producer obtains effective control. The commissioner may revoke a certification and seek reimbursement of any monetary benefit a producer may have received due to certification from a producer who fails to maintain certification criteria. The commissioner shall revoke a certification through the hearing process outlined in section 17.9895, subdivision 2.

by them. For each species evaluated, the committee shall recommend to the commissioner
on which noxious weed list or lists, if any, the species should be placed. Species eurrently
designated as prohibited or restricted noxious weeds or specially regulated plants must
be reevaluated every three years for a recommendation on whether or not they need to
remain on the noxious weed lists. The committee shall also advise the commissioner on
the implementation of the Minnesota Noxious Weed Law and assist the commissioner in
the development of management criteria for each noxious weed category. Members of
the committee are not entitled to reimbursement of expenses nor payment of per diem.
Members shall serve two-year terms with subsequent reappointment by the commissioner.

18.91 ADVISORY COMMITTEE; MEMBERSHIP.

Subd. 3. **Additional duties.** The committee shall conduct evaluations of terrestrial plant species to recommend if they need to be designated as noxious weeds and into which noxious weed classification they should be designated, advise the commissioner on the implementation of the Minnesota Noxious Weed Law, and assist the commissioner in the development of management criteria for each noxious weed category.

Subd. 5. **Expiration.** Notwithstanding section 15.059, subdivision 5, the committee expires June 30, 2013.

18B.07 PESTICIDE USE, APPLICATION, AND EQUIPMENT CLEANING.

- Subd. 6. Use of public waters for filling equipment. (a) A person may not fill pesticide application equipment directly from public or other waters of the state, as defined in section 103G.005, subdivision 15, unless the equipment contains proper and functioning anti-backsiphoning mechanisms. The person may not introduce pesticides into the application equipment until after filling the equipment from the public waters.
- (b) This subdivision does not apply to permitted applications of aquatic pesticides to public waters.

1505.0751 **DEFINITIONS.**

Subp. 7. **Municipality.** "Municipality" means a home rule charter or statutory city or a township.

1505.0751 DEFINITIONS.

Subp. 8. **Noxious weed.** "Noxious weed" means an annual, biennial, or perennial plant that the commissioner designates to be injurious to public health, the environment, public roads, crops, livestock, or other property.

1510.0011 LABELING VARIETY, VARIETY NOT STATED, AND BRAND; EXAMPLES.

Subpart 1. **Definition; brand.** As used in this part, "brand" means a word, mark, or picture representing a trademark or a term taken from a trademark which indicates the owner, originator, or labeler of the seed and does not indicate the genetic identity of the seed.

1510.0011 LABELING VARIETY, VARIETY NOT STATED, AND BRAND; EXAMPLES.

Subp. 4. **Labeling brands.** When agricultural seed is labeled with a brand, trademark, or term taken from a brand or trademark, the seed label must clearly identify the term with the word "brand" and as being other than part of the variety name.

1510.0020 DISCLAIMER CLAUSE.

It shall be unlawful for vendors or sellers of agricultural seed to print upon the seed labels or tags, or to use, attach, or print upon literature, or state in any manner, any form of wording designed as a disclaimer or statement that purposes to disclaim responsibility of the vendor or seller for the data on the label required by law.

1510.0030 LABEL SHOWING PERCENT OF HARD SEED.

The label required on all agricultural seed containers shall show the percent of hard seed, when present, separately from the germination percent. It is permissible to combine these percentages and list them on the label as "total percent germination and hard seed." They shall not be stated as "total live seed," "total germination," or in any other unauthorized manner.

1510.0040 LABELING OF SEED BINS AND OTHER BULK CONTAINERS.

When agricultural seeds are sold out of the farmers' or seed vendors' bins or other bulk containers which are in retail sales rooms or to which the consumer buyers have access before buying for the purpose of examining the seed and the label thereof, a complete label shall be attached to such bin or other bulk container in a conspicuous place on the exterior of the container, where the buyer may read it conveniently before making a purchase of the seed. Seed labels and label data in the records or files of the seed seller do not meet the requirements of this part.

1510.0050 TOLERANCES.

The following tolerances shall be recognized between the percentages or rates of occurrence found by analysis, test, or examination in the administration of the law and percentages or rates of occurrence required or stated as required by the law. Unless otherwise provided, tolerances shall be determined by applying the formulas in parts 1510.0060 to 1510.0100 to the percentages or rates of occurrence found in the administration of the law.

1510.0060 PURITY TOLERANCES.

In determination of the tolerance for the percentage of the distinguishable kind, type, or variety (pure seed), weed seeds, other crop seeds, and inert matter, the sample shall be first considered as made up of two parts:

- A. the percentage of the component (pure seed, weed seed, crop seed, or inert matter as the case may be) being considered; and
 - B. the difference between that percentage and 100.

The number represented by item A is then multiplied by the number represented by item B and the product is divided by 100. The resulting number is then multiplied by 0.2 (2/10) and the resulting product added to 0.2 or 0.6 as indicated in the following formulas:

Repealed Minnesota Rule: 13-0130

Pure seed tolerance = $0.6 + (0.2 \times a \times b)$

100

Weed seeds, other crop seeds and inert matter tolerance = $0.2 + (0.2 \times a \times b)$

100

1510.0070 ADDITIONAL TOLERANCE.

An additional tolerance shall be allowed for the following kinds of seeds and mixtures containing any of these kinds of seeds singly or combined in excess of 50 percent. The tolerance is to be obtained by adding to the regular tolerance mentioned above the product obtained by multiplying the regular tolerance by the lesser of part 1510.0060, items A and B divided by 100.

1510.0080 NOXIOUS WEED SEED TOLERANCES.

The following tolerances for rates of occurrence of noxious weed seeds (prohibited and restricted) shall be recognized and shall be applied to the number of noxious weed seeds found by analysis in the quantity of seed specified by the state seed laboratory. Representations showing the rate of occurrence indicated in columns 2 and 4 shall be considered within the tolerance if no more than the accompanying number in columns 1 and 3 are found by analysis in the administration of the law. For rates of occurrence higher than those shown in the table and in case of additional or more extensive analysis, a tolerance based on a degree of certainty of five percent (P = 0.05) will be recognized.

1510.0090 GERMINATION.

The following tolerances are applicable to the percentage of germination and also to the sum of the germination plus the hard seed when 400 or more seeds are tested.

Found by test	Tolerance
96 or over	5

When only 200 seeds of a component in a mixture are tested, two percent shall be added to the above germination tolerances.

1510.0100 PURE LIVE SEED.

The tolerance for pure live seed shall be determined by applying the respective tolerances to the germination plus the hard seed and the pure seed.

1510.0111 INFORMATION REQUIRED ON HYBRID SEED CORN LABELS.

Seed labels for hybrid corn varieties or blends of varieties for either grain or forage purposes must include the day classification listed under the heading "Relative Maturity." The labeled day classification must be within three days of the actual maturity rating determined in comparative trials by the Minnesota agricultural experiment station. For hybrid seed corn blends, the relative maturity and the germination percentage must be derived by averaging the relative maturities and germination percentages according to the proportion of each component in the blend.

1510.0161 KINDS OF LAWN AND TURF GRASS SEEDS EXEMPT FROM TEN PERCENT INERT MATTER LIMITATION.

In accordance with Minnesota Statutes, section 21.82, subdivision 5, paragraph (a), Kentucky bluegrass is a kind of lawn and turf grass seed for which the ten percent inert matter limitation does not apply.

1510.0171 STANDARDS, REQUIREMENTS, AND CONDITIONS FOR LABELING HERMETICALLY SEALED SEEDS.

- F. The percentage of germination of seed at the time of packaging must be equal to or above the standards in part 1510.0231, subpart 1.

1510.0180 STATE SEED LABORATORY REPORT.

The report of any examination, test, or determination of the state seed laboratory as provided in Minnesota Statutes, section 21.85, subdivisions 2 and 12, applies directly to the sample of seed received and examined by the seed analyst and does not apply directly to any other sample or to the bulk of seed from which this sample was drawn, or to any other lot of seed. Any discrepancy between the analysis and the nature of the lot of seed from which the sample was drawn indicates inadequate sampling, and is the responsibility of the dealer or seller of the seed.

1510.0200 GRAIN SOLD UNDER VARIETY NAMES.

Flax, oats, and other grains sold to farmers in seed quantities in the spring or at seeding time under variety names or where variety names are mentioned in the transaction are subject to all agricultural seed requirements as to cleaning, testing, and labeling unless such seed sales are definitely known to be for nonseed purposes.

1510.0210 LABELING FOR SEED SAMPLES.

Samples of all sizes of agricultural seed which are sent to or given to persons or are exposed or displayed for sale as an inducement to prospective retail or consumer purchases shall be labeled fully. The responsibility for such labeling shall rest on the person who owns the seed or in whose possession or place of business such samples are placed on display. No person shall permit any agricultural seed for sale or samples thereof to be on display in or on the person's premises which are not fully labeled.

1510.0220 CORRECTION OF ERRONEOUS SEED LABELS.

Whenever, by examination of the label or by resampling and retesting of the seed or by other dependable information, the label on any seed container of agricultural seed is found to be unlawful or to be in error beyond the limits of tolerance allowed by law, the label shall be corrected at once if the seed is of legal quality. Otherwise the seed shall be removed from sale at once.
