

**84D.03 INFESTED WATERS; RESTRICTED ACTIVITIES.**

Subdivision 1. **Infested waters; restricted activities.** (a) The commissioner shall designate a water of the state as an infested water if the commissioner determines that:

(1) the water contains a population of an aquatic invasive species that could spread to other waters if use of the water and related activities are not regulated to prevent this; or

(2) the water is highly likely to be infested by an aquatic invasive species because it is connected to a water that contains a population of an aquatic invasive species.

(b) When determining which invasive species comprise infested waters, the commissioner shall consider:

(1) the extent of a species distribution within the state;

(2) the likely means of spread for a species; and

(3) whether regulations specific to infested waters containing a specific species will effectively reduce that species' spread.

(c) The presence of common carp and curly-leaf pondweed shall not be the basis for designating a water as infested.

(d) The designation of infested waters by the commissioner shall be by written order published in the State Register. Designations are not subject to the rulemaking provisions of chapter 14 and section 14.386 does not apply.

Subd. 2. [Repealed, 1999 c 92 s 11]

Subd. 3. **Bait harvest from infested waters.** (a) Taking wild animals from infested waters for bait or aquatic farm purposes is prohibited, except as provided in paragraph (b) and section 97C.341.

(b) In waters that are designated as infested waters, except those designated because they contain prohibited invasive species of fish or certifiable diseases of fish, as defined under section 17.4982, subdivision 6, taking wild animals may be permitted for:

(1) commercial taking of wild animals for bait and aquatic farm purposes according to a permit issued under section 84D.11, subject to rules adopted by the commissioner;

(2) bait purposes for noncommercial personal use in waters that contain Eurasian water milfoil, when the infested waters are designated solely because they contain Eurasian water milfoil and if the equipment for taking is limited to cylindrical minnow traps not exceeding 16 inches in diameter and 32 inches in length; and

(3) harvest of bullheads, goldeyes, mooneyes, sheepshead (freshwater drum), and suckers for bait from streams or rivers designated as infested waters, by hook and line for noncommercial personal use. Other provisions that apply to this clause are:

(i) fish taken under this clause must be used on the same body of water where caught and while still on that water body;

(ii) fish taken under this clause may not be transported live from or off the water body;

(iii) fish harvested under this clause may only be used in accordance with this section;

(iv) any other use of wild animals used for bait from infested waters is prohibited;

(v) fish taken under this clause must meet all other size restrictions and requirements as established in rules; and

(vi) all species listed under this clause shall be included in the person's daily limit as established in rules, if applicable.

(c) Equipment authorized for minnow harvest in a designated infested water by permit issued under paragraph (b) may not be transported to, or used in, any waters other than waters specified in the permit.

**Subd. 4. Commercial fishing and turtle, frog, and crayfish harvesting restrictions in infested and noninfested waters.** (a) All nets, traps, buoys, anchors, stakes, and lines used for commercial fishing or turtle, frog, or crayfish harvesting in an infested water that is designated because it contains invasive fish, invertebrates, or certifiable diseases, as defined in section 17.4982, may not be used in any other waters. If a commercial licensee operates in an infested water designated because it contains invasive fish, invertebrates, or certifiable diseases, as defined in section 17.4982, all nets, traps, buoys, anchors, stakes, and lines used for commercial fishing or turtle, frog, or crayfish harvesting in waters designated as infested with invasive fish, invertebrates, or certifiable diseases, as defined in section 17.4982, must be tagged with tags provided by the commissioner, as specified in the commercial licensee's license or permit. This tagging requirement does not apply to commercial fishing equipment used in Lake Superior.

(b) All nets, traps, buoys, anchors, stakes, and lines used for commercial fishing or turtle, frog, or crayfish harvesting in an infested water that is designated solely because it contains Eurasian water milfoil must be dried for a minimum of ten days or frozen for a minimum of two days before they are used in any other waters, except as provided in this paragraph. Commercial licensees must notify the department's regional or area fisheries office or a conservation officer before removing nets or equipment from an infested water designated solely because it contains Eurasian water milfoil and before resetting those nets or equipment in any other waters. Upon notification, the commissioner may authorize a commercial licensee to move nets or equipment to another water without freezing or drying, if that water is designated as infested solely because it contains Eurasian water milfoil.

(c) A commercial licensee must remove all aquatic macrophytes from nets and other equipment when the nets and equipment are removed from waters of the state.

(d) The commissioner shall provide a commercial licensee with a current listing of designated infested waters at the time that a license or permit is issued.
