Subd. 7. Board of Pharmacy; regulation of substances. The Board of Pharmacy is authorized to regulate and define additional substances which contain quantities of a substance possessing abuse potential in accordance with the following criteria:

(1) The Board of Pharmacy shall place a substance in Schedule I if it finds that the substance has: A high potential for abuse, no currently accepted medical use in the United States, and a lack of accepted safety for use under medical supervision.

(2) The Board of Pharmacy shall place a substance in Schedule II if it finds that the substance has: A high potential for abuse, currently accepted medical use in the United States, or currently accepted medical use with severe restrictions, and that abuse may lead to severe psychological or physical dependence.

(3) The Board of Pharmacy shall place a substance in Schedule III if it finds that the substance has: A potential for abuse less than the substances listed in Schedules I and II, currently accepted medical use in treatment in the United States, and that abuse may lead to moderate or low physical dependence or high psychological dependence.

(4) The Board of Pharmacy shall place a substance in Schedule IV if it finds that the substance has: A low potential for abuse relative to the substances in Schedule III, currently accepted medical use in treatment in the United States, and that abuse may lead to limited physical dependence or psychological dependence relative to the substances in Schedule III.

(5) The Board of Pharmacy shall place a substance in Schedule V if it finds that the substance has: A low potential for abuse relative to the substances listed in Schedule IV, currently accepted medical use in

treatment in the United States, and limited physical dependence and/or psychological dependence liability relative to the substances listed in Schedule IV.

Subd. 8. **Add, delete, or reschedule substances.** The state Board of Pharmacy may, by rule, add substances to or delete or reschedule substances listed in this section. The Board of Pharmacy may not delete or reschedule a drug that is in Schedule I, except as provided in subdivision 12.

In making a determination regarding a substance, the Board of Pharmacy shall consider the following: The actual or relative potential for abuse, the scientific evidence of its pharmacological effect, if known, the state of current scientific knowledge regarding the substance, the history and current pattern of abuse, the scope, duration, and significance of abuse, the risk to public health, the potential of the substance to produce psychic or physiological dependence liability, and whether the substance is an immediate precursor of a substance already controlled under this section. The state Board of Pharmacy may include any nonnarcotic drug authorized by federal law for medicinal use in a schedule only if such drug must, under either federal or state law or rule, be sold only on prescription.

Subd. 8a. [Repealed by amendment, 2012 c 240 s 1]

Subd. 8b. **Board of Pharmacy; expedited scheduling of additional substances.** The state Board of Pharmacy may, by rule, add a substance to Schedule I provided that it finds that the substance has a high potential for abuse, has no currently accepted medical use in the United States, has a lack of accepted safety for use under medical supervision, has known adverse health effects, and is currently available for use within the state. For the purposes of this subdivision only, the board may use the expedited rulemaking process under section 14.389.

Subd. 9. **Except substances by rule.** The state Board of Pharmacy may by rule except any compound, mixture, or preparation containing any stimulant or depressant substance listed in subdivision 4, paragraphs (b) and (c), or in subdivisions 5 and 6 from the application of all or any part of this chapter, if the compound, mixture, or preparation contains one or more active medicinal ingredients not having a stimulant or depressant effect on the central nervous system; provided, that such admixtures shall be included therein in such combinations, quantity, proportion, or concentration as to vitiate the potential for abuse of the substances which do have a stimulant or depressant effect on the central nervous system.

Subd. 10. **Dextromethorphan.** Dextromethorphan shall not be deemed to be included in any schedule by reason of the enactment of Laws 1971, chapter 937, unless controlled pursuant to the foregoing provisions of this section.

Subd. 11. [Repealed, 1993 c 337 s 20]

Subd. 12. **Coordination of controlled substance regulation with federal law and state statute.** (a) If any substance is designated, rescheduled, or deleted as a controlled substance under federal law, the Board of Pharmacy may similarly and temporarily control the substance under this chapter by issuing an order and causing it to be published in the State Register and filed with the secretary of state. In issuing the order, the board is not required to engage in rulemaking. The order expires no later than 12 months after the date of issue and may not be renewed. After issuing the order, the board may permanently schedule the substance only by exercising the authority granted to it under subdivision 8.

(b) The state Board of Pharmacy shall annually submit a report to the legislature on or before December 1 that specifies what changes the board made to the controlled substance schedules maintained by the board in Minnesota Rules, parts 6800.4210 to 6800.4250, in the preceding 12 months. The report must also specify any orders issued by the board under this subdivision. The report must include specific recommendations

for amending the controlled substance schedules contained in subdivisions 2 to 6, so that they conform with the controlled substance schedules maintained by the board in Minnesota Rules, parts 6800.4210 to 6800.4250, and with the federal schedules.

Subd. 13. [Repealed by amendment, 2012 c 240 s 1]
