

103B.104 LAWNS TO LEGUMES PROGRAM.

(a) The Board of Water and Soil Resources may provide financial and technical assistance to plant residential landscapes and community spaces with native vegetation and pollinator-friendly forbs and legumes to:

(1) protect a diversity of pollinators with declining populations; and

(2) provide additional benefits for water management, carbon sequestration, and landscape and climate resiliency.

(b) The board must establish criteria for grants or payments awarded under this section. Grants or payments awarded under this section may give priority consideration for proposals in areas identified by the United States Fish and Wildlife Service as areas where there is a high potential for rusty patched bumble bees and other priority species to be present.

(c) The board may collaborate with and enter into agreements with federal, state, and local agencies; Tribal Nations; nonprofit organizations; and contractors to implement and promote the program.
