17.20 Council or its successor. The council shall
17.21 establish procedures to review requests from
17.22 recipients to alter the use of or convey an
17.23 interest in real property. These procedures
17.24 shall allow for the replacement of the interest
17.25 in real property with another interest in real
17.26 property meeting the following criteria:

17.27 (1) the interest is at least equal in fair market
17.28 value, as certified by the commissioner
17.29 of natural resources, to the interest being
17.30 replaced; and

17.31 (2) the interest is in a reasonably equivalent
17.32 location and has a reasonably equivalent

18.20 pledged, or otherwise disposed of or further
18.21 encumbered without obtaining the prior
18.22 written approval of the Outdoor Heritage
18.23 Council or its successor. If the holder of
18.24 the interest in real property fails to comply

19.4 under this section may be transferred by
19.5 the recipient of the appropriation to another
19.6 person or entity that holds the interest in the
19.7 real property. To complete the transfer of
19.8 reporting responsibility, the recipient of the
19.9 appropriation must:

19.10 (1) inform the person to whom the
19.11 responsibility is transferred of that person's
19.12 reporting responsibility;

19.13 (2) inform the person to whom the
19.14 responsibility is transferred of the property
19.15 restrictions under subdivision 14; and

19.16 (3) provide written notice to the council of the
19.17 transfer of reporting responsibility, including

~~(b) If the results of an environmental impact statement required to be submitted by paragraph (a) indicate that there is an economically less expensive and environmentally superior alternative, then no member agency of the Environmental Quality Board shall issue a permit for the facility that is the subject of the environmental impact statement, other than an economically less expensive and environmentally superior alternative, nor shall any government bonds be issued for the facility, other than an economically less expensive and environmentally superior alternative, until after the legislature has adjourned its regular session sine die in 1996.~~

Subd. 2. Administration; rules. (a) The commissioner of natural resources may adopt rules under chapter 14 as necessary for the administration of the Mississippi River corridor critical area program. Duties of the Environmental Quality Council or

the Environmental Quality Board referenced in this chapter and related rules and in the governor's executive order number 79-19, published in the State Register on March 12, 1979, related to the Mississippi River corridor critical area shall be the duties of the commissioner. All rules adopted by the board pursuant to these duties remain in effect and shall be enforced until amended or repealed by the commissioner in accordance with law. The commissioner shall work in consultation with the United States Army Corps of Engineers, the National Park Service, the Metropolitan Council, other agencies, local units of government, and other interested parties to ensure that the Mississippi River corridor critical area is managed in a way that:

(1) conserves the scenic, environmental, recreational, mineral, economic, cultural, and historic resources and functions of the river corridor;

(2) maintains the river channel for transportation by providing and maintaining barging and fleeting areas in appropriate locations consistent with the character of the Mississippi River and riverfront;

(3) provides for the continuation and development of a variety of urban uses, including industrial and commercial uses, and residential uses, where appropriate, within the Mississippi River and its corridor;

(4) utilizes certain reaches of the river as a source of water supply and for receiving wastewater effluents and discharges that meet all applicable standards; and

(5) protects and preserves the biological and ecological functions of the Mississippi River and its corridor.

(b) The Metropolitan Council shall incorporate the standards developed under this section into its planning and shall work with local units of government and the commissioner to ensure the standards are being adopted and implemented appropriately.

Subd. 3. **Districts.** The commissioner shall establish districts within the Mississippi River corridor critical area. The commissioner must seek to minimize the number of districts within any one municipality and take into account existing ordinances. The commissioner shall consider the following when establishing the districts:

(1) the protection of the major features of the river in existence as of March 12, 1979;

(2) the protection of improvements such as parks, trails, natural areas, recreational areas, and interpretive centers;

(3) the use of the Mississippi River as a source of drinking water;

(6) the intent of the Mississippi River corridor critical area land use districts from the governor's executive order number 79-19, published in the State Register on March 12, 1979; and

(7) identified scenic, geologic, and ecological resources.

Subd. 4. **Standards.** (a) The commissioner shall establish minimum guidelines and standards for the districts established in subdivision 3. The guidelines and standards for each district shall include the intent of each district, key resources, and features to be protected or enhanced based upon paragraph (b), permitted uses, and dimensional and performance standards for development. The commissioner must take into account existing ordinances when developing the guidelines and standards under this section. (13) cultural and historic sites and structures; and

(14) water quality.

(c) The commissioner shall establish a map to define bluffs and bluff-related features within the Mississippi River corridor critical area. At the outset of the rulemaking process, the commissioner shall create a preliminary map of all the bluffs and bluff lines within the Mississippi River corridor critical area, based on the guidelines in paragraph (d). The rulemaking process shall provide an opportunity to refine the preliminary bluff map. The commissioner may add to or remove areas of demonstrably unique or atypical conditions

that warrant special protection or exemption. At the end of the rulemaking process, the commissioner shall adopt a final bluff map that contains associated features, including bluff lines, bases of bluffs, steep slopes, and very steep slopes.

(d) The following guidelines shall be used by the commissioner to create a preliminary bluff map as part of the rulemaking process:

(1) "bluff face" or "bluff" means the area between the bluff line and the bluff base. A bluff is a high, steep, natural topographic feature such as a broad hill, cliff, or embankment with a slope of 18 percent or greater and a vertical rise of at least ten feet between the bluff base and the bluff line;

(2) "bluff line" means a line delineating the top of a slope connecting the points at which the slope becomes less than 18 percent. More than one bluff line may be encountered proceeding upslope from the river valley;

(3) "bluff base" means a line delineating the bottom of a slope connecting the points at which the slope becomes 18 percent or greater. More than one bluff base may be encountered proceeding landward from the water;

(4) "steep slopes" means 12 percent to 18 percent slopes. Steep slopes are natural topographic features with an average slope of 12 to 18 percent measured over a horizontal distance of 50 feet or more; and

(5) "very steep slopes" means slopes 18 percent or greater. Very steep slopes are natural topographic features with an average slope of 18 percent or greater, measured over a horizontal distance of 50 feet or more.

Subd. 5. **Application.** The standards established under this section shall be used:

(1) by local units of government when preparing or updating plans or modifying regulations;

(2) by state and regional agencies for permit regulation and in developing plans within their jurisdiction;

(3) by the Metropolitan Council for reviewing plans and regulations; and

(4) by the commissioner when approving plans and regulations, and reviewing development permit applications.

Subd. 6. **Notification; fees.** (a) A local unit of government or a regional or state agency shall notify the commissioner of natural resources of all developments in the corridor that require discretionary actions under their rules at least ten days before taking final action on the application. The commissioner may establish exemptions from the notification requirement for certain types of applications. For purposes of this section, a discretionary action includes all actions that require a public hearing, including variances, conditional use permits, and zoning amendments.

(b) The commissioner shall recover costs of reviewing information submitted under paragraph (a). Amounts collected under this paragraph must be credited to an account in the natural resources fund and are appropriated to the commissioner.

Subd. 7. **Rules.** The commissioner shall adopt rules to ensure compliance with this section. By January 15, 2010, the commissioner shall begin the rulemaking required by this section under chapter 14. Until the rules required under this section take effect, the commissioner shall administer the Mississippi River corridor critical area program in accordance with the governor's executive order number 79-19, published in the State Register on March 12, 1979.

Sec. 15. **COAL TAR; NOTIFICATION, INVENTORY, AND BEST MANAGEMENT PRACTICES.**

(a) By January 15, 2010, the commissioner of the Pollution Control Agency shall notify state agencies and local units of government of the potential for contamination of constructed storm water ponds and wetlands or natural ponds used for the collection of storm water via constructed conveyances with polycyclic aromatic hydrocarbons from the use of coal tar sealant products. For the purpose of this section, a storm water pond is a treatment pond constructed and operated for water quality treatment, storm water detention, and flood control. Storm water ponds do not include areas of temporary ponding, such as ponds that exist only during a construction project or short-term accumulations of water in road ditches.

(b) By January 15, 2010, the commissioner of the Pollution Control Agency shall establish a schedule and information requirements for state agencies and local units of government regulated under a national pollutant discharge elimination system or state disposal system permit for municipal separate storm sewer systems to report to the commissioner of the Pollution Control Agency on all storm water ponds and other waters defined in paragraph (a) located within their jurisdiction.

(c) The commissioner of the Pollution Control Agency shall develop best management practices for state agencies and local units of government regulated under a national pollutant discharge elimination system or state disposal system permit for municipal separate storm sewer systems treating or cleaning up contaminated sediments in storm water ponds and other waters defined under paragraph (a) and make the best management practices available on the agency's Web site. As part of the development of the best management practices, the commissioner shall:

(1) sample a set of storm water pond sediments in residential, commercial, and industrial areas for polycyclic aromatic hydrocarbons and other contaminants of potential concern;

(2) investigate the feasibility of screening methods to provide more cost-effective analytical results and to identify which kinds of ponds are likely to have the highest concentrations of polycyclic aromatic hydrocarbons; and

(3) develop guidance on testing, treatment, removal, and disposal of polycyclic aromatic hydrocarbon contaminated sediments.

(d) The commissioner of the Pollution Control Agency shall incorporate the requirements for inventory and best management practices specified in paragraphs (b) and (c) into the next permitting cycle for the national pollutant discharge elimination system or state disposal system permit for municipal separate storm sewer systems.

Sec. 16. **ENDOCRINE-DISRUPTOR MONITORING.**

(a) The commissioner of the Pollution Control Agency shall establish a network of water monitoring sites in public waters adjacent to wastewater treatment facilities across the state to assess levels of endocrine disrupting compounds, antibiotic compounds, and pharmaceuticals.

(b) Each of the monitoring sites must provide enhanced monitoring of the effluent at the discharge point of the wastewater treatment facility and monitoring of the public waters above and below the discharge point.

(c) The monitoring sites must be located throughout the state, represent a variety of wastewater treatment facility sizes based on the number of gallons of water discharged per day, and represent a variety of waste treatment systems used for primary, secondary, and tertiary disinfecting treatment and management of biosolids.

(d) In establishing the monitoring network, the commissioner of the Pollution Control Agency must consult with the commissioners of health and natural resources, the United States Geological Survey, the Metropolitan Council, local wastewater treatment facility operators, and the Water Resources Center at the University of Minnesota. Consideration may be given to monitoring sites at facilities identified as part of a total maximum daily load study and facilities located on a water body identified for enhanced protection. The initial monitoring network must include at least ten sites.

(e) Monitoring must include, but is not limited to, endocrine-disrupting compounds from natural and synthetic hormones, pharmaceuticals, personal care products, and a range of industrial products and by-products. At a minimum, concentrations of estrone, nonylphenol, bisphenol-A, 17-beta-estradiol, 17-alpha-ethynylestradiol, estriol,

and antibacterial triclosan must be monitored. Additional compounds, antibacterial compounds, and pharmaceuticals potentially impacting human health and aquatic communities may be considered for identification and monitoring including, but not limited to, nonylphenol ethoxylates, octylphenol, and octylphenol ethoxylates; the hormones androstenedione, trenbelone, and diethylphthalate; antidepressant medications, including fluoxetine and fluvoxamine; carbamazepine; and triclocarban.

(f) The commissioner of the Pollution Control Agency shall begin the monitoring and testing required under this section no later than November 1, 2009. Information about requirements under this section and the results from the monitoring and testing must be available on the agency's Web site by June 1, 2010. The commissioner shall submit a preliminary report on the results of the monitoring and testing to the chairs of the legislative committees with jurisdiction over environment and natural resources policy and finance by April 15, 2010, and a final report no later than January 15, 2011.

Subd. 3. Governance, process, and administrative principles. In making appropriations from the dedicated funds, the legislature must attempt to:

71.1 (1) use existing systems, agencies, and entities to distribute funds, rather than create
71.2 new bureaucracies;

71.3 (2) be in accordance with plans for each fund, based on current science and on public
71.4 engagement, and with outcomes that are achieved in a reasonable amount of time;

71.5 (3) develop and use indicators of success and accountability that meet the public's
71.6 demands for open and transparent processes;

71.7 (4) increase outreach and encourage participation in the legislative and grant-making
71.8 process so that a wider variety of Minnesotans receive funds; and

71.9 (5) develop innovative uses of funds that work across traditional boundaries and
71.10 encourage cooperation among multiple interest groups.

71.11 Subd. 4. **Outcome principles.** In making appropriations from the dedicated funds,
71.12 the legislature must attempt to:

71.13 (1) increase the percentage of Minnesotans who participate in the enjoyment, use,
71.14 and maintenance of our cultural and outdoor resources;

71.15 (2) provide every Minnesotan greater access to arts, history, and cultural activities,
71.16 arts education opportunities, clean water, including quality drinking water, a fully restored
71.17 outdoors environment with hunting and fishing opportunities, outdoor recreation, public
71.18 broadcasting signals, and engagement in Minnesota's traditions and history;

71.19 (3) prevent pollution and restore impaired waters;

71.20 (4) strive toward meeting statewide priorities and values, emphasizing geographical
71.21 and regional fairness within each fund;

71.22 (5) give priority to projects that improve the state or a regional economy, creating
71.23 jobs and leveraging nonstate money; and

71.24 (6) communicate through visible identification the direct results of investments
71.25 made with money from the constitutionally dedicated funds.

71.26 Sec. 2. Minnesota Statutes 2008, section 3.303, is amended by adding a subdivision to

71.32 fund, parks and trails fund, and environment and natural resources trust fund are being
71.33 expended to meet the requirements established for each fund in the state constitution.
71.34 Information provided on the Web site must include, but is not limited to:

(4) education about the areas and issues the projects address, including, when feasible, maps of where projects have been undertaken;

(5) all frameworks developed for future uses of each fund; and

(6) methods by which members of the public may apply for project funds under any of the constitutionally dedicated funds.

(b) All information for proposed and funded projects, including the proposed measurable outcomes, must be made available on the Web site as soon as practicable.

Information on the measured outcomes and evaluation must be posted as soon as it becomes available. The costs of these activities shall be paid out of the arts and cultural heritage fund, outdoor heritage fund, clean water fund, parks and trails fund, and the environment and natural resources trust fund proportionately. For purposes of this section, "measurable outcomes" means outcomes, indicators, or other performance measures that may be quantified or otherwise measured in order to measure the effectiveness of a project or program in meeting its intended goal or purpose.

(c) The Legislative Coordinating Commission shall be responsible for receiving all ten-year plans and 25-year frameworks for each of the constitutionally dedicated funds. To the extent practicable, staff for the commission shall provide assistance and oversight to these planning efforts and shall coordinate public access to hearings and public meetings for all planning efforts.

Sec. 3. [3.358] LEGISLATIVE GUIDE.

A legislative guide shall be created stating principles for the use and expected outcomes of all funds from dedicated sales taxes pursuant to the Minnesota Constitution, article XI, section 15. This guide shall be created jointly by the Cultural and Outdoor Resources Division of the house of representatives, and by the appropriate senate committee as designated by the majority leader of the senate.

The legislative guide required by this section shall be for the years 2010 to 2015 and shall include the following provisions:

73.4 in future appropriations.

73.5 The legislative guide shall be completed by the legislative committees by December
73.6 15, 2009, and shall be considered and discussed by all committees with jurisdiction over
73.7 these funds at public hearings.

73.8 To the extent practicable, the legislative guide shall be used to direct future
73.9 appropriations of the legislature.

73.11 read:

73.12 Subd. 9. **Restoration audits.** The legislative auditor shall conduct restoration

73.16 natural resources trust fund, and state-issued bonds, are accomplishing their restoration
73.17 goals. The audit must include a critical analysis of the restoration goals and objectives,
73.18 scientific evaluation of the results, and the effectiveness of the restorations in meeting
73.19 applicable restoration requirements. The legislative auditor shall hire or contract with
73.20 scientists and other appropriate persons to meet this requirement. Restoration audits shall

88.30 it under this section to provide the research and analysis necessary for the subcommittee
88.31 to complete their work.

88.32 (b) \$250,000 in fiscal year 2010 is appropriated from the arts and cultural heritage
88.33 fund to the Legislative Coordinating Commission for a collaborative project to develop

89.10 arts and cultural heritage, who have no connection to existing arts and cultural heritage
89.11 organizations, and who come from diverse areas of the state, to provide public perspective

89.13 conducted by those creating plans and frameworks under this section. The members shall
89.14 prepare a ten-year plan and a 25-year framework for use of the funding that includes goals
89.15 and measurable outcomes and includes a vision for Minnesotans of what arts, history, and

Sec. 20. COMPREHENSIVE STATEWIDE SUSTAINABLE WATER RESOURCES DETAILED FRAMEWORK.

(a) The University of Minnesota shall develop a comprehensive statewide sustainable water resources detailed framework to protect, conserve, and enhance the quantity and quality of the state's ground and surface waters. The detailed framework shall be a long-range, 25-year detailed framework, with an implementation schedule and associated benchmarks, for policy, research, monitoring, and evaluation in order to achieve sustainable ground and surface water use, including the ecological benefits provided by water resources to humans and fish and wildlife habitat. For the purposes of the detailed framework, water use is sustainable when the use does not harm ecosystems, degrade water quality, or compromise the ability of future generations to meet their own needs.

(b) The detailed framework shall be developed by the University of Minnesota Water Resources Center in cooperation with federal, state, and local government and private nonprofits with expertise in water resources. In developing the detailed framework, the water resources plans of organizations with water resources expertise shall be considered. The detailed framework must include, but is not limited to, identification of infrastructure needs, drinking water, ground and surface waters, storm water, agricultural and industrial needs, the interfaces of climate change, development and land use, and demographics. The detailed framework must identify best practices and methods for determining the effectiveness of those practices for wastewater treatment, drinking water source protection, pollution prevention, conservation, and water valuation.

(c) The University of Minnesota shall also develop a ten-year plan for sustainable water resources. In developing this plan, the University of Minnesota Water Resources Center shall examine existing plans, as available and appropriate, from the Environmental Quality Board and Clean Water Council.

(d) The University of Minnesota shall submit the detailed framework to the chairs of the legislative committees with jurisdiction over agriculture policy and finance and environment and natural resources policy and finance by January 1, 2011.

92.4 land to the long-term land management account established in subdivision 1 within 30
92.5 days of purchasing the easement.

92.6 (b) A holder of a permanent conservation easement that transfers the conservation
92.7 easement to the state on or after July 1, 2009, shall contribute the greater of \$10,000
92.8 or five percent of the appraised value of the land to the long-term land management
92.9 account established in subdivision 1 within 30 days of transferring the easement unless the
92.10 contribution requirement has been met by the state.

92.11 (c) The owner of land acquired in fee title purchased in whole or in part with state
92.12 funds appropriated on or after July 1, 2009, for natural resource purposes, including
92.13 lands acquired by the commissioner of natural resources and lands acquired to restore,
92.14 protect, and enhance wetlands, prairies, forests, habitat, water quality, and other natural
92.15 resources, shall contribute the greater of \$10,000 or five percent of the appraised value of
92.16 the land to the long-term land management account established in subdivision 1 within
92.17 30 days of purchasing the land.

92.18 (d) The owner of land acquired in fee title purchased in whole or in part with state
92.19 funds for natural resource purposes, including lands acquired by the commissioner of
92.20 natural resources or lands acquired to restore, protect, and enhance wetlands, prairies,

92.25 has been met by the state. This paragraph does not apply to a unit of local government
92.26 for land acquired for park purposes, trails, open space, conservation, and agricultural
92.27 preservation, if the commissioner of natural resources determines that the governing body
92.28 of the unit of local government has approved a plan to manage the land for as long as the
92.29 unit of local government owns the land.

92.30 (e) Nothing in this section prohibits a holder of an easement or the owner of land
92.31 in fee title from accepting gifts or other funds to be used in meeting the contribution

93.3 determined by rates established by the Board of Water and Soil Resources, will be the
93.4 basis for determining the five percent in this section.

93.5 Subd. 3. **Exemption.** The commissioner of natural resources and the Board of
93.6 Water and Soil Resources may waive the contribution requirement under subdivision 2 for
93.7 a holder of a conservation easement or owner of land in fee title, upon request, provided

93.27 account must only be spent on the management, monitoring, and enforcement of
93.28 conservation easements to ensure that the purposes for conservation easements according
93.29 to section 84C.021 are met and on the management of lands purchased with state funds
93.30 for natural resource purposes. Funds must be appropriated by law and shall not be
93.31 appropriated until July 1, 2017.

(1) the number of acres and most recent appraised value of acquired natural resources land within each county;

(2) the number of acres of commissioner-administered natural resources land within each county;

(3) the number of acres of county-administered other natural resources land within each county, based on the reports filed by each county auditor with the commissioner of natural resources; and

(4) the number of acres of land utilization project land within each county.

The commissioner of transportation shall determine and certify to the commissioner of revenue by March 1 of the payment year the number of acres of land and the appraised value of the land described in subdivision 1, paragraph (b), but only if it exceeds 500 acres.

The commissioner of revenue shall determine the distributions provided for in this section using the number of acres and appraised values certified by the commissioner of natural resources and the commissioner of transportation by March 1 of the payment year.

Subdivision 1. Onetime payments. (a) A onetime payment shall be made under this section on any acquired natural resources land purchased with funds from the outdoor heritage fund appropriated on or after July 1, 2010, to the county in which the land is located. The payment is equal to 25 percent of the appraised value of the acquired natural resources land.

(b) Each year, the commissioner of natural resources shall determine the total amount of payments for each county on acquired natural resources lands located in the county that were acquired in the previous calendar year and certify that amount to the commissioner of revenue by March 1.

(c) Land receiving a onetime payment under this section is not eligible for payments under section 97A.061 or 477A.12.

determined for the commissioner of natural resources by a licensed appraiser, or the county assessor's estimated market value if the county assessor's estimated market value is less than \$100,000 and no appraisal has been done.

Subd. 3. **Transfer; source of funds.** An amount necessary to make the payments required under this section is annually appropriated to the commissioner of natural resources from the outdoor heritage fund for transfer to the commissioner of revenue. The commissioner of revenue shall make the payments required under this section to the counties at the same time that the first half of aid payments under sections 477A.011 to 477A.014 are made.

Subd. 4. **Investment and use of funds.** (a) Upon receipt of a onetime payment, the county shall disburse to each town an equivalent percentage of the onetime payment as would have been distributed to the town under section 477A.14 of funds paid under section 477A.12.

(b) The onetime payment remaining after disbursement under paragraph (a) shall be invested and only the interest may be expended, except that the board may approve by unanimous vote the use of principal for authorized purposes when it is determined that the interest payment is insufficient for a required expenditure. The interest or authorized principal may only be used for the purposes under section 97A.061 or 477A.12.

Sec. 5. **EFFECTIVE DATE.**

(a) Sections 1 to 4 are effective July 1, 2009, except that sections 1 to 4 do not apply to the Board of Water and Soil Resources until September 30, 2010; and

(b) Sections 1 to 4 do not apply to any project or appropriation contained in this act.

\$2,000,000 is appropriated in fiscal year 2010 from the outdoor heritage fund to the commissioner of agriculture to identify, prevent, and in consultation with the forest resources council, protect Minnesota forests by rapidly and effectively responding to the threat or presence of plant pests. At the commissioner's discretion, the commissioner may access this appropriation if sufficient resources are not available from state, federal, or other sources or if the commissioner determines that sufficient state, federal, or other resources will not be available to the commissioner in time to effectively prevent the introduction or spread of tree pests and avert environmental or economic harm. Up to \$125,000 is available immediately to the commissioner of agriculture to update the state's invasive and exotic tree pest plans by addressing the role of all stakeholders in preventing the introduction or spread of, responding to, and containing outbreaks and in remediation. The commissioner shall work in consultation with the commissioner of natural resources, the Forest Resources Council, and the Forest Protection Task Force and shall report findings and recommendations to the governor and the appropriate legislative committees. The report must include recommendations to ensure that a coordinated and effective response network is in place to protect our forests. The commissioner of agriculture may transfer all or part of this appropriation to the commissioner of natural resources and may award grants to local units of government or other entities. Any unencumbered balance does not cancel at the end of fiscal year 2010 and is available in fiscal year 2011.

- (2) has been heated sufficiently to kill pests and disease; or
- (3) is either transported or will be received by a person who has entered into a compliance agreement with the commissioner.

The quarantine may be modified or repealed at the discretion of the commissioner of agriculture, as provided under Minnesota Statutes, section 18G.06, subdivision 6.
