(d) For purposes of this subdivision, unless otherwise covered under this chapter, "telemedicine" is defined as the delivery of health care services or consultations while the patient is at an originating site and the licensed health care provider is at a distant site. A communication between licensed health care providers, or a licensed health care provider and a patient that consists solely of a telephone conversation, e-mail, or facsimile transmission does not constitute telemedicine consultations or services. Telemedicine may be provided by means of real-time two-way, interactive audio and visual communications, including the application of secure video conferencing or store-and-forward technology to provide or support health care delivery, which facilitate the assessment, diagnosis, consultation, treatment, education, and care management of a patient's health care.

(e) For purposes of this section, "licensed health care provider" is defined under section 62A.671, subdivision 6; "health care provider" is defined under section 62A.671, subdivision 3; and "originating site" is defined under section 62A.671, subdivision 7.
