1.22	purpose to a chemical in a children's product.

2.1	(d) "Chemical" means a substance with a distinct molecular composition or a group
2.2	of structurally related substances and includes the breakdown products of the substance or
2.3	substances that form through decomposition, degradation, or metabolism.
2.4	(e) "Chemical of high concern" means a chemical identified on the basis of credible
2.5	scientific evidence by a state, federal, or international agency as being known or suspected
2.6	with a high degree of probability to:
2.7	(1) harm the normal development of a fetus or child or cause other developmental
2.8	toxicity;
2.9	(2) cause cancer, genetic damage, or reproductive harm;
2.10	(3) disrupt the endocrine or hormone system;
2.11	(4) damage the nervous system, immune system, or organs, or cause other systemic
2.12	toxicity;

2.19	(i) "Contaminant" means a trace amount of a chemical that is incidental to
2.20	manufacturing and serves no intended function in the product component. Contaminant
2.21	includes, but is not limited to, unintended by-products of chemical reactions that
2.22	occur during the manufacture of the product component, trace impurities in feedstock,
2.23	incompletely reacted chemical mixtures, and degradation products.

2.29	(1) (m) "Manufacturer" means any person who manufactures a final consumer
2.30	product sold at retail or whose brand name is affixed to the consumer product. In the
2.31	case of a consumer product imported into the United States, manufacturer includes the
2.32	importer or domestic distributor of the consumer product if the person who manufactured
2.33	or assembled the consumer product or whose brand name is affixed to the consumer
2.34	product does not have a presence in the United States.
2.35	(n) "Practical quantification limit" means the lowest concentration of a chemical that

6.30	product or others regarding the use of safer alternatives to the priority chemical contained
6.31	in the children's product; and
