A bill for an act
relating to health care; authorizing pharmacists to prescribe, dispense, and
deliver drugs to prevent the acquisition of human immunodeficiency virus;
authorizing pharmacists to order, conduct, and interpret laboratory tests necessary
for therapy that uses drugs to prevent the acquisition of human immunodeficiency
virus; amending Minnesota Statutes 2020, sections 151.01, subdivisions 23, 27;
151.37, by adding a subdivision; proposing coding for new law in Minnesota
Statutes, chapter 62Q.

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF MINNESOTA:

Section 1. [62Q.1842] PROHIBITION ON USE OF STEP THERAPY FOR
ANTIRETROVIRAL DRUGS.

Subdivision 1. Definitions. (a) For purposes of this section, the following definitions
apply.

(b) "Health plan" has the meaning given in section 62Q.01, subdivision 3, and includes
health coverage provided by a managed care plan or a county-based purchasing plan
participating in a public program under chapter 256B or 256L or an integrated health
partnership under section 256B.0755.

(c) "Step therapy protocol" has the meaning given in section 62Q.184.

Subd. 2. Prohibition on use of step therapy protocols. A health plan that covers
antiretroviral drugs that are medically necessary for the prevention of HIV/AIDS, including
preexposure prophylaxis and postexposure prophylaxis, must not limit or exclude coverage
for the antiretroviral drugs by requiring prior authorization or by requiring an enrollee to
follow a step therapy protocol.
Sec. 2. [62Q.524] COVERAGE FOR DRUGS TO PREVENT THE ACQUISITION
OF HUMAN IMMUNODEFICIENCY VIRUS.

(a) A health plan that provides prescription drug coverage must provide coverage in
accordance with this section for:

(1) any antiretroviral drug approved by the United States Food and Drug Administration
(FDA) for preventing the acquisition of human immunodeficiency virus (HIV) that is
prescribed, dispensed, or administered by a pharmacist who meets the requirements described
in section 151.37, subdivision 17; and

(2) any laboratory testing necessary for therapy that uses the drugs described in clause
(1) that is ordered, performed, and interpreted by a pharmacist who meets the requirements
described in section 151.37, subdivision 17.

(b) A health plan must provide the same terms of prescription drug coverage for drugs
to prevent the acquisition of HIV that are prescribed or administered by a pharmacist if the
pharmacist meets the requirements described in section 151.37, subdivision 17, as would
apply had the drug been prescribed or administered by a physician, physician assistant, or
advanced practice registered nurse. The health plan may require pharmacists or pharmacies
to meet reasonable medical management requirements when providing the services described
in paragraph (a) if other providers are required to meet the same requirements.

(c) A health plan must reimburse an in-network pharmacist or pharmacy for the drugs
and testing described in paragraph (a) at a rate equal to the rate of reimbursement provided
to a physician, physician assistant, or advanced practice registered nurse if providing similar
services.

(d) A health plan is not required to cover the drugs and testing described in paragraph
(a) if provided by a pharmacist or pharmacy that is out-of-network unless the health plan
covers similar services provided by out-of-network providers. A health plan must ensure
that the health plan's provider network includes in-network pharmacies that provide the
services described in paragraph (a).

Sec. 3. Minnesota Statutes 2020, section 151.01, subdivision 23, is amended to read:

Subd. 23. Practitioner. "Practitioner" means a licensed doctor of medicine, licensed
doctor of osteopathic medicine duly licensed to practice medicine, licensed doctor of
dentistry, licensed doctor of optometry, licensed podiatrist, licensed veterinarian, licensed
advanced practice registered nurse, or licensed physician assistant. For purposes of sections
151.15, subdivision 4; 151.211, subdivision 3; 151.252, subdivision 3; 151.37, subdivision
2, paragraph (b); and 151.461, "practitioner" also means a dental therapist authorized to
dispense and administer under chapter 150A. For purposes of sections 151.252, subdivision
3, and 151.461, "practitioner" also means a pharmacist authorized to prescribe
self-administered hormonal contraceptives, nicotine replacement medications, or opiate
antagonists under section 151.37, subdivision 14, 15, or 16, or authorized to prescribe drugs
to prevent the acquisition of human immunodeficiency virus (HIV) under section 151.37,
subdivision 17.

Sec. 4. Minnesota Statutes 2020, section 151.01, subdivision 27, is amended to read:

Subd. 27. Practice of pharmacy. "Practice of pharmacy" means:

(1) interpretation and evaluation of prescription drug orders;

(2) compounding, labeling, and dispensing drugs and devices (except labeling by a
manufacturer or packager of nonprescription drugs or commercially packaged legend drugs
and devices);

(3) participation in clinical interpretations and monitoring of drug therapy for assurance
of safe and effective use of drugs, including the performance of laboratory tests that are
waived under the federal Clinical Laboratory Improvement Act of 1988, United States Code,
title 42, section 263a et seq., provided that a pharmacist may interpret the results of laboratory
tests but may modify drug therapy only pursuant to a protocol or collaborative practice
agreement;

(4) participation in drug and therapeutic device selection; drug administration for first
dosage and medical emergencies; intramuscular and subcutaneous administration used for
the treatment of alcohol or opioid dependence; drug regimen reviews; and drug or
drug-related research;

(5) drug administration, through intramuscular and subcutaneous administration used
to treat mental illnesses as permitted under the following conditions:

(i) upon the order of a prescriber and the prescriber is notified after administration is
complete; or

(ii) pursuant to a protocol or collaborative practice agreement as defined by section
151.01, subdivisions 27b and 27c, and participation in the initiation, management,
modification, administration, and discontinuation of drug therapy is according to the protocol
or collaborative practice agreement between the pharmacist and a dentist, optometrist,
physician, podiatrist, or veterinarian, or an advanced practice registered nurse authorized
to prescribe, dispense, and administer under section 148.235. Any changes in drug therapy
or medication administration made pursuant to a protocol or collaborative practice agreement must be documented by the pharmacist in the patient's medical record or reported by the pharmacist to a practitioner responsible for the patient's care;

(6) participation in administration of influenza vaccines and vaccines approved by the United States Food and Drug Administration related to COVID-19 or SARS-CoV-2 to all eligible individuals six years of age and older and all other vaccines to patients 13 years of age and older by written protocol with a physician licensed under chapter 147, a physician assistant authorized to prescribe drugs under chapter 147A, or an advanced practice registered nurse authorized to prescribe drugs under section 148.235, provided that:

(i) the protocol includes, at a minimum:

(A) the name, dose, and route of each vaccine that may be given;

(B) the patient population for whom the vaccine may be given;

(C) contraindications and precautions to the vaccine;

(D) the procedure for handling an adverse reaction;

(E) the name, signature, and address of the physician, physician assistant, or advanced practice registered nurse;

(F) a telephone number at which the physician, physician assistant, or advanced practice registered nurse can be contacted; and

(G) the date and time period for which the protocol is valid;

(ii) the pharmacist has successfully completed a program approved by the Accreditation Council for Pharmacy Education specifically for the administration of immunizations or a program approved by the board;

(iii) the pharmacist utilizes the Minnesota Immunization Information Connection to assess the immunization status of individuals prior to the administration of vaccines, except when administering influenza vaccines to individuals age nine and older;

(iv) the pharmacist reports the administration of the immunization to the Minnesota Immunization Information Connection; and

(v) the pharmacist complies with guidelines for vaccines and immunizations established by the federal Advisory Committee on Immunization Practices, except that a pharmacist does not need to comply with those portions of the guidelines that establish immunization schedules when administering a vaccine pursuant to a valid, patient-specific order issued by a physician licensed under chapter 147, a physician assistant authorized to prescribe
drugs under chapter 147A, or an advanced practice registered nurse authorized to prescribe drugs under section 148.235, provided that the order is consistent with the United States Food and Drug Administration approved labeling of the vaccine;

(7) participation in the initiation, management, modification, and discontinuation of drug therapy according to a written protocol or collaborative practice agreement between:
(i) one or more pharmacists and one or more dentists, optometrists, physicians, podiatrists, or veterinarians; or (ii) one or more pharmacists and one or more physician assistants authorized to prescribe, dispense, and administer under chapter 147A, or advanced practice registered nurses authorized to prescribe, dispense, and administer under section 148.235.

Any changes in drug therapy made pursuant to a protocol or collaborative practice agreement must be documented by the pharmacist in the patient's medical record or reported by the pharmacist to a practitioner responsible for the patient's care;

(8) participation in the storage of drugs and the maintenance of records;

(9) patient counseling on therapeutic values, content, hazards, and uses of drugs and devices;

(10) offering or performing those acts, services, operations, or transactions necessary in the conduct, operation, management, and control of a pharmacy;

(11) participation in the initiation, management, modification, and discontinuation of therapy with opiate antagonists, as defined in section 604A.04, subdivision 1, pursuant to:
(i) a written protocol as allowed under clause (7); or
(ii) a written protocol with a community health board medical consultant or a practitioner designated by the commissioner of health, as allowed under section 151.37, subdivision 13; and

(12) prescribing self-administered hormonal contraceptives; nicotine replacement medications; and opiate antagonists for the treatment of an acute opiate overdose pursuant to section 151.37, subdivision 14, 15, or 16;

(13) prescribing, dispensing, and administering drugs for preventing the acquisition of human immunodeficiency virus (HIV) if the pharmacist meets the requirements under section 151.37, subdivision 17; and

(14) ordering, conducting, and interpreting laboratory tests necessary for therapies that use drugs for preventing the acquisition of human immunodeficiency virus (HIV), if the pharmacist meets the requirements under section 151.37, subdivision 17.
Sec. 5. Minnesota Statutes 2020, section 151.37, is amended by adding a subdivision to read:

Subd. 17. **Drugs for preventing the acquisition of HIV.** (a) A pharmacist is authorized to prescribe and administer drugs to prevent the acquisition of human immunodeficiency virus (HIV) in accordance with this subdivision.

(b) By January 1, 2023, the board of pharmacy shall develop a standardized protocol for a pharmacist to follow in prescribing the drugs described in paragraph (a). In developing the protocol, the board may consult with community health advocacy groups, the board of medical practice, the board of nursing, the commissioner of health, professional pharmacy associations, and professional associations for physicians, physician assistants, and advanced practice registered nurses.

(c) Before a pharmacist is authorized to prescribe a drug described in paragraph (a), the pharmacist must successfully complete a training program specifically developed for prescribing drugs for preventing the acquisition of HIV that is offered by a college of pharmacy, a continuing education provider that is accredited by the Accreditation Council for Pharmacy Education, or a program approved by the board. To maintain authorization to prescribe, the pharmacist shall complete continuing education requirements as specified by the board.

(d) Before prescribing a drug described in paragraph (a), the pharmacist shall follow the appropriate standardized protocol developed under paragraph (b) and, if appropriate, may dispense to a patient a drug described in paragraph (a).

(e) Before dispensing a drug described under paragraph (a) that is prescribed by the pharmacist, the pharmacist must provide counseling to the patient on the use of the drugs and must provide the patient with a fact sheet that includes the indications and contraindications for the use of these drugs, the appropriate method for using these drugs, the need for medical follow up, and any other additional information listed in Minnesota Rules, part 6800.0910, subpart 2, that is required to be provided to a patient during the counseling process.

(f) A pharmacist is prohibited from delegating the prescribing authority provided under this subdivision to any other person. A pharmacist intern registered under section 151.101 may prepare the prescription, but before the prescription is processed or dispensed, a pharmacist authorized to prescribe under this subdivision must review, approve, and sign the prescription.
(g) Nothing in this subdivision prohibits a pharmacist from participating in the initiation, management, modification, and discontinuation of drug therapy according to a protocol as authorized in this section and in section 151.01, subdivision 27.
