(3) \$200,000 is to share the cost by 10.9 reimbursing federal, tribal, state, county, and 10.10 township entities for additional needs on roads 10.11 under their jurisdiction when the needs are a 10.12 result of increased use by off-road vehicles 10.13 and are attributable to a border-to-border 10.14 touring route established by the commissioner. 10.15 This paragraph applies to roads that are 10.16 operated by a public road authority as defined 10.17 in Minnesota Statutes, section 160.02, 10.18 subdivision 25. This is a onetime appropriation 10.19 and is available until June 30, 2023. To be 10.20 eligible for reimbursement under this 10.21 paragraph, the claimant must demonstrate that: 10.22 the needs result from additional traffic 10.23 generated by the border-to-border touring 10.24 route; and increased use attributable to a 10.25 border-to-border touring route has caused at 10.26 10.27 least a 50 percent increase in maintenance costs for roads under the claimant's 10.28 jurisdiction, based on a ten-year maintenance 10.29 average. The commissioner may accept an 10.30 alternative to the ten-year maintenance average 10.31 10.32 if a jurisdiction does not have sufficient maintenance records. The commissioner has 10.33 discretion to accept an alternative based on a 10.34 good-faith effort by the jurisdiction. Any 10.35 alternative should include baseline 10.36

maintenance costs for at least two years before 11.1 the year the route begins operating. The 11.2 11.3 ten-year maintenance average or any alternative must be calculated from the years 11.4 immediately preceding the year the route 11.5 begins operating. Before reimbursing a claim 11.6 under this paragraph, the commissioner must 11.7 consider whether the claim is consistent with 11.8 claims made by other entities that administer 11.9 roads on the touring route, in terms of the 11.10 amount requested for reimbursement and the 11.11 frequency of claims made. 11.12 (1) (k) \$600,000 the first year is from the 11.13 all-terrain vehicle account in the natural 11.14 resources fund for grants to St. Louis County. 11.15 Of this amount, \$100,000 is for a grant to St. 11.16 Louis County for an environmental assessment 11.17 worksheet for the overall construction of the 11.18 Voyageur Country ATV Trail system and 11.19 connections, and \$500,000 is for a grant to St. 11.20 Louis County to design, plan, permit, acquire 11.21 right-of-way for, and construct Voyageur 11.22 Country ATV Trail from Buyck to Holmes 11.23 Logging Road and to Shuster Road toward 11.24 Cook. This is a onetime appropriation. 11.25 (m) (1) \$2,400,000 the first year is from the 11.26 all-terrain vehicle account in the natural 11.27 resources fund. Of this amount, \$1,300,000 is 11.28 11.29 for a grant to Lake County to match other funding sources to develop the Prospector 11.30 Loop Trail system and \$1,100,000 is for 11.31 acquisition, design, environmental review, 11.32 permitting, and construction for all-terrain 11.33 vehicle use on the Taconite State Trail 11.34

The samples for inspection must be collected by a fish health inspector or a fish collector in cooperation with the producer. Testing of samples must be done by an approved laboratory.

(b) The inspection for viral hemorrhagic septicemia (VHS), infectious pancreatic necrosis
(IPN), and infectious hematopoietic necrosis (IHN) in salmonids and for VHS in

(a) A state-issued bill of lading is required for: 15.2 (1) intrastate transportation of aquatic life other than salmonids, catfish, or species on 15.3 the official list of viral hemorrhagic septicemia susceptible species published by the United 15.4 15.5 States Department of Agriculture, Animal and Plant Health Inspection Services, VHS-susceptible-species list between licensed private fish hatcheries, aquatic farms, or 15.6 aquarium facilities licensed for the species being transported if the aquatic life is being 15.7 transported into a watershed where it is not currently present, if walleyes whose original 15.8 source is south of marked State Highway 210 are being transported to a facility north of 15.9 15.10 marked State Highway 210, or if the original source of the aquatic life is outside Minnesota and contiguous states; and 15.11 (2) stocking of waters other than public waters with aquatic life other than salmonids, 15.12

15.13 catfish, or species on the official list of viral hemorrhagic septicemia susceptible species
15.14 published by the United States Department of Agriculture, Animal and Plant Health
15.15 Inspection Services VHS-susceptible-species list.

(b) When aquatic life is transported under paragraph (a), a copy of the bill of lading
must be submitted to the regional fisheries manager at least 72 hours before the transportation.

15.18 (c) For transportation and stocking of waters that are not public waters:

(1) a bill of lading must be submitted to the regional fisheries manager 72 hours beforetransporting fish for stocking;

(2) a bill of lading must be submitted to the regional fisheries manager within five days
after stocking if the waters to be stocked are confirmed by telecopy or telephone prior to
stocking by the regional fisheries office not to be public waters; or

(3) a completed bill of lading may be submitted to the regional fisheries office by telecopy
prior to transporting fish for stocking. Confirmation that the waters to be stocked are not
public waters may be made by returning the bill of lading by telecopy or in writing, in which
cases additional copies need not be submitted to the Department of Natural Resources.

(d) Bill of lading forms may only be issued by the Department of Natural Resources in
St. Paul, and new bill of lading forms may not be issued until all previously issued forms

(b) If a source facility in a nonemergency enzootic disease area cannot demonstrate ahistory free from disease, aquatic life may only be imported into a quarantine facility.

18.21 Sec. 12. Minnesota Statutes 2018, section 17.4986, subdivision 4, is amended to read:

Subd. 4. Disease-free history. Disease-free histories required under this section must include the results of a fish health inspection. 18.30 Subd. 3. Fish health inspection. (a) An aquatic farm propagating salmonids, catfish,

18.31 or species on the viral hemorrhagic septicemia (VHS) susceptible list published by the

18.32 United States Department of Agriculture, Animal and Plant Health Inspection Services,

18.33 <u>VHS-susceptible-species list</u> and having an effluent discharge from the aquatic farm into

public waters must have a fish health inspection conducted at least once every 12 months
by a certified fish health inspector. Testing must be conducted according to laboratory
methods of the Fish Health Blue Book or the Diagnostic Manual for Aquatic Animal
Diseases, published by the International Office of Epizootics (OIE).

(b) An aquatic farm propagating any species on the VHS susceptible list and having an 19.5 effluent discharge from the aquatic farm into public waters must test for VHS virus using 19.6 the guidelines of the Fish Health Blue Book or the Diagnostic Manual for Aquatic Animal 19.7 19.8 Diseases. The commissioner may, by written order published in the State Register, prescribe alternative testing time periods and methods from those prescribed in the Fish Health Blue 19.9 Book or the OIE Diagnostic Manual if the commissioner determines that biosecurity measures 19.10 will not be compromised. These alternatives are not subject to the rulemaking provisions 19.11 of chapter 14 and section 14.386 does not apply. The commissioner must provide reasonable 19.12 notice to affected parties of any changes in testing requirements. 19.13

(c) Results of fish health inspections must be provided to the commissioner for all fish
that remain in the state. All data used to prepare and issue a fish health certificate must be
maintained for three years by the issuing fish health inspector, approved laboratory, or
accredited veterinarian.

(d) A health inspection fee must be charged based on each lot of fish sampled. The fee
by check or money order payable to the Department of Natural Resources must be prepaid
or paid at the time a bill or notice is received from the commissioner that the inspection and
processing of samples is completed.

(e) Upon receipt of payment and completion of inspection, the commissioner shall notify
the operator and issue a fish health certificate. The certification must be made according to
the Fish Health Blue Book or the Diagnostic Manual for Aquatic Animal Diseases by a
person certified as a fish health inspector.

(f) All aquatic life in transit or held at transfer stations within the state may be inspected
by the commissioner. This inspection may include the collection of stock for purposes of
pathological analysis. Sample size necessary for analysis will follow guidelines listed in
the Fish Health Blue Book or the Diagnostic Manual for Aquatic Animal Diseases.

(g) Salmonids, catfish, or species on the VHS susceptible list must have a fish health
inspection before being transported from a containment facility, unless the fish are being
transported directly to an outlet for processing or other food purposes or unless the
commissioner determines that an inspection is not needed. A fish health inspection conducted
for this purpose need only be done on the lot or lots of fish that will be transported. The

20.3

CKM

commissioner must conduct a fish health inspection requested for this purpose within five 20.1

working days of receiving written notice. Salmonids and catfish may be immediately 20.2

transported from a containment facility to another containment facility once a sample has been obtained for a health inspection or once the five-day notice period has expired. 20.4
