State of Minnesota

HOUSE OF REPRESENTATIVES

A bill for an act

relating to education; establishing response to intervention requirements;

EIGHTY-EIGHTH SESSION

H. F. No. 2683

03/03/2014 Authored by Bly and Faust The bill was read for the first time and referred to the Committee on Education Policy

1.3	establishing a committee to review statewide testing; requiring rulemaking.
1.4	BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF MINNESOTA:
1.5	Section 1. RESPONSE TO INTERVENTION.
1.6	Subdivision 1. Purpose. The legislature finds that a more focused effort is needed in
1.7	Minnesota's district and charter schools to personalize teaching and learning to improve
1.8	the academic performance of all students. Of special importance is to significantly
1.9	improve the academic performance of underachieving students of color in order to close
1.10	the gap between these students and their peers meeting the state academic standards. The
1.11	purpose of this section is to require the use of a response to intervention model in all
1.12	schools that will result in:
1.13	(1) improving the learning of all students so they meet or exceed the state academic
1.14	standards and close the achievement gap;
1.15	(2) students receiving assistance as soon as they are not on target to be proficient
1.16	and before they fail;
1.17	(3) using formative assessments that are valid, which may be used multiple times,
1.18	and that provide data that are immediately available to teachers thereby making the data
1.19	useful for instruction;
1.20	(4) reducing the need for students to be placed in special education programs because
1.21	of improved regular classroom core curriculum and early interventions with students;
1.22	(5) reducing the paperwork and other procedures resulting in teachers spending
1.23	more time on instruction and cost savings:

Section 1. 1

02/28/14	REVISOR	XX/BR	14-5054

22 instruction staff; 23 (7) periodic valid data reports for the site, the district, and learning growth and providing accountability; and 24 (8) modifying the state test so that it serves both state an purposes and also formative data which is useful for instruction individual students and thereby eliminating the current expensive process of having dual state tests. 29 Subd. 2. Definitions. (a) For purposes of this section, the meanings given. 210 (b) "Presenting problem" means the degree of discrepance standards and a student's performance as measured by valid assive (c) "Progress monitoring" has the definition given in Mir 125A.56, subdivision 2. 210 (d) "Response to Intervention (RtI)" is a multitiered system model designed to identify students as soon as they have a present and math, provide scientifically valid interventions, and condumonitoring to inform instruction. RtI does not require the use of the practice designed to improve learning or performance in specifically selected to the extent possible based on its scientific validation. 210 Subd. 3. Usage. Each district and charter school site ship intervention model at grades consistent with the rules of the concurrence of the concur	elassroom and remedial
learning growth and providing accountability; and (8) modifying the state test so that it serves both state an purposes and also formative data which is useful for instruction individual students and thereby eliminating the current expensis process of having dual state tests. Subd. 2. Definitions. (a) For purposes of this section, the the meanings given. (b) "Presenting problem" means the degree of discrepance standards and a student's performance as measured by valid assection (c) "Progress monitoring" has the definition given in Mir 125A.56, subdivision 2. (d) "Response to Intervention (RtI)" is a multitiered system model designed to identify students as soon as they have a present and math, provide scientifically valid interventions, and conduct monitoring to inform instruction. RtI does not require the use of the practice designed to improve learning or performance in specifically selected to the extent possible based on its scientific validation. Subd. 3. Usage. Each district and charter school site she intervention model at grades consistent with the rules of the concuraged to use the RtI model in prekindergarten. Subd. 4. Rulemaking. (a) The commissioner shall adopt response to intervention model. The commissioner shall adopt a rule which contains the requiremental intervention and also the response to intervention model. The commissioner shall repeated to the reading curriculum used in the regular classroom reviewed to ensure that this curriculum has a scientific researce multitiered model of instructional support with the use of a col classroom teachers and remedial teachers for the intervention	
2.5 (8) modifying the state test so that it serves both state an purposes and also formative data which is useful for instruction individual students and thereby eliminating the current expensive process of having dual state tests. 2.8 Subd. 2. Definitions. (a) For purposes of this section, the the meanings given. 2.10 (b) "Presenting problem" means the degree of discrepance standards and a student's performance as measured by valid assection (c) "Progress monitoring" has the definition given in Mir 125A.56, subdivision 2. 2.11 (d) "Response to Intervention (Rt1)" is a multitiered system model designed to identify students as soon as they have a present and math, provide scientifically valid interventions, and conduct monitoring to inform instruction. Rt1 does not require the use of the practice designed to improve learning or performance in specifically selected to the extent possible based on its scientific validation. 2.12 Subd. 3. Usage. Each district and charter school site shear intervention model at grades consistent with the rules of the continuous model. Subd. 4. Rulemaking. (a) The commissioner shall adopt response to intervention model. The commissioner shall adopt response to intervention model. The commissioner shall adopt a problem of the requirem (i). The commissioner shall adopt a rule which contains the requirem (ii). The commissioner shall adopt a rule which contains the requirem (iii). The commissioner shall adopt a rule which contains the requirem reviewed to ensure that this curriculum has a scientific researce multitiered model of instructional support with the use of a col classroom teachers and remedial teachers for the intervention of the color classroom teachers and remedial teachers for the intervention of the color classroom teachers and remedial teachers for the intervention of the color classroom teachers and remedial teachers for the intervention of the color classroom teachers and remedial teachers for the intervention of the color classroom teachers and remedial teachers for	d the state demonstrating
purposes and also formative data which is useful for instruction individual students and thereby eliminating the current expension process of having dual state tests. Subd. 2. Definitions. (a) For purposes of this section, the the meanings given. (b) "Presenting problem" means the degree of discrepance standards and a student's performance as measured by valid assection (c) "Progress monitoring" has the definition given in Mir 125A.56, subdivision 2. (d) "Response to Intervention (RtI)" is a multitiered system model designed to identify students as soon as they have a present and math, provide scientifically valid interventions, and conduct monitoring to inform instruction. RtI does not require the use of the control of the extent possible based on its scientific validation. Subd. 3. Usage. Each district and charter school site she intervention model at grades consistent with the rules of the control of the extent possible based on its scientific validation. Subd. 4. Rulemaking. (a) The commissioner shall ador response to intervention model. The commissioner shall ador response to intervention model at grades consistent with the regular classroom reviewed to ensure that this curriculum used in the regular classroom reviewed to ensure that this curriculum has a scientific researce multitiered model of instructional support with the use of a col classroom teachers and remedial teachers for the intervention	
individual students and thereby eliminating the current expension process of having dual state tests. Subd. 2. Definitions. (a) For purposes of this section, the the meanings given. (b) "Presenting problem" means the degree of discrepance standards and a student's performance as measured by valid assection (c) "Progress monitoring" has the definition given in Mir 125A.56, subdivision 2. (d) "Response to Intervention (RtI)" is a multitiered system model designed to identify students as soon as they have a present and math, provide scientifically valid interventions, and conduct monitoring to inform instruction. RtI does not require the use of the practice designed to improve learning or performance in specifically selected to the extent possible based on its scientific validation. Subd. 3. Usage. Each district and charter school site ship intervention model at grades consistent with the rules of the concouraged to use the RtI model in prekindergarten. Subd. 4. Rulemaking. (a) The commissioner shall adopted response to intervention model. The commissioner shall repeat a 3525.1341, and shall adopt a rule which contains the requiremed (i). The commissioner shall adopt the response to intervention 30, 2015, with an implementation date of August 1, 2017. (b) The reading curriculum used in the regular classroom reviewed to ensure that this curriculum has a scientific researce multitiered model of instructional support with the use of a colleasor classroom teachers and remedial teachers for the intervention of the colleasor of the colleance of th	d local accountability
process of having dual state tests. 2.9 Subd. 2. Definitions. (a) For purposes of this section, the the meanings given. (b) "Presenting problem" means the degree of discrepance standards and a student's performance as measured by valid assection (c) "Progress monitoring" has the definition given in Mir 125A.56, subdivision 2. (d) "Response to Intervention (RtI)" is a multitiered system model designed to identify students as soon as they have a present and math, provide scientifically valid interventions, and conduct monitoring to inform instruction. RtI does not require the use of the practice designed to improve learning or performance in specific selected to the extent possible based on its scientific validation. Subd. 3. Usage. Each district and charter school site shear intervention model at grades consistent with the rules of the concouraged to use the RtI model in prekindergarten. Subd. 4. Rulemaking. (a) The commissioner shall adopt response to intervention model. The commissioner shall repeat as 3525.1341, and shall adopt a rule which contains the requirement (i). The commissioner shall adopt the response to intervention and the regular classroom reviewed to ensure that this curriculum has a scientific researce multitiered model of instructional support with the use of a cole classroom teachers and remedial teachers for the intervention in the requirement classroom teachers and remedial teachers for the intervention in the revention teachers and remedial teachers for the intervention intervention intervention teachers and remedial teachers for the intervention intervention in the regular classroom teachers and remedial teachers for the intervention intervention intervention in th	nal decision making with

2.34 Willinesota Statutes, Section 125A.30, Subdivision 2.	
2.35 (c) Benchmarking assessment must occur three times dur	ing the year using either
the state assessment tool or a tool that reliably predicts proficient	ncy on state tests. This

Section 1. 2

02/20/14	DEMICOD	3/3//DD	14 5054
02/28/14	REVISOR	XX/BR	14-5054

3.1	benchmarking must be either of: (1) all students at each site, or (2) the district may
3.2	determine to benchmark only the students, identified by classroom teachers, suspected of
3.3	not being on target to be proficient in reading and mathematics.
3.4	(d) A presenting problem must be described in objective terms using data collection
3.5	procedures including reviews of existing information, interviews, and informal testing that
3.6	focus on alterable characteristics of the instructional environment.
3.7	(e) Data collection and problem analysis must occur using a systematic and
3.8	valid data-based process to identify the parts of the standards with which the student
3.9	is experiencing difficulty.
3.10	(f) Interventions must be designed based on the data collected, the defined problem,
3.11	parent input, and professional teacher decisions about the potential effectiveness of
3.12	interventions.
3.13	(g) An intervention plan must include learning targets and interventions aligned
3.14	with the learning targets and standards along with a progress monitoring process and
3.15	designation of the educators responsible for implementation.
3.16	(h) Data collection procedures must be individually tailored, valid, and reliable and
3.17	allow for frequent measurements of the impact of the interventions. A parent's right to
3.18	a special education evaluation shall not be denied because of the instruction provided
3.19	under this paragraph.
3.20	(i) A process must exist to ensure that interventions are implemented with fidelity in
3.21	a manner consistent with the intervention plan.
3.22	Subd. 5. Assistance to sites. (a) Beginning not later than August 1, 2014, the
3.23	commissioner shall provide leadership and assistance to districts and chartered schools to
3.24	enable them to successfully implement the requirements of this section. To provide this
3.25	state leadership, the commissioner may:
3.26	(1) assign the responsibility of site RtI assistance to the regional centers of
3.27	excellence under Minnesota Statutes, section 120B.115;
3.28	(2) contract with the St. Croix River Education District (SCRED) to reestablish the
3.29	Minnesota Response to Intervention (RtI) Center;
3.30	(3) develop a request for proposals and invite proposals from organizations
3.31	throughout the world to provide assistance to Minnesota sites;
3.32	(4) develop a consortium with the department, postsecondary institutions,
3.33	professional organizations both within Minnesota and throughout the world to provide
3.34	assistance to Minnesota sites; or
3.35	(5) other methods as determined by the commissioner.

Section 1. 3

02/28/14	REVISOR	XX/BR	14-5054
02/20/11	KL VISOR	MADIC	11 303 1

	(b) The commissioner is encouraged to use revenue provided through the Elementary
<u>a</u> 1	nd Secondary Education Act and the Individuals with Disabilities Education Act for
<u>a</u> :	ssistance under paragraph (a).
	(c) The Response to Intervention Center assistance initiative shall have the following
re	esponsibilities:
	(1) assist the commissioner to develop rules as provided by this section;
	(2) develop RtI guidelines for district sites and chartered schools to enable them to
p	lan and implement an RtI model consistent with the rules of the commissioner;
	(3) provide professional development, coaching, and consultation for sites on the
R	tI rules and guidelines including scientifically based instruction within a multitiered
n	nodel of instructional supports, standards aligned instruction, and the use of formative
<u>a</u> :	ssessment to guide instructional decision making;
	(4) collaborate with ServeMinnesota for the services of reading and math master
<u>c</u>	oaches to assist sites with interventions;
	(5) collaborate with education departments at higher education institutions to
ir	acorporate the RtI research into applicable licensure programs;
	(6) consult with the commissioner of education to evaluate the learning and financial
ir	mpact of the RtI model in Minnesota;
	(7) disseminate models for evaluating classroom reading curriculum to better ensure
<u>tl</u>	nat student needs will be met; and
	(8) disseminate research-based interventions to be used with students who are not on
<u>t</u> a	arget to meet the proficiency standards in reading and mathematics.
	Sec. 2. STATEWIDE TESTING COMMITTEE.
	Notwithstanding any other law or rule to the contrary, the commissioner of education
<u>s</u> l	nall establish a committee with the education research community and the vendor of the
<u>s</u> 1	rate testing program for the following purposes:
	(1) determine how the state test can be of greater formative assessment value for
<u>e</u>	ducational decision-making purposes for individual students. The purpose shall be to
re	educe the need for sites to use both the state test for accountability purposes and a second
<u>f</u>	or formative assessment purposes;
	(2) how the state test can be administered in fall, winter, and spring for benchmarking
p	urposes if the sites choose to do so;
	(3) add a value added analysis provision;
	(4) determine predictive validity of the state test to career pathways as a part of the
V	Vorld's Best Workforce Program defined in Minnesota Statutes, section 120B.11;
_	

Sec. 2. 4

02/28/14	REVISOR	XX/BR	14-5054

5.1	(5) determine how estimated targets on the state test are equivalent to the National
5.2	Assessment of Education Progress (NAEP), Trends in International Mathematics and
5.3	Science Study (TIMSS), and Programme for International Student Assessment (PISA).
5.4	This will enable sites to make international comparisons; and
5.5	(6) other tasks as determined by the commissioner.

Sec. 2. 5
