CHAPTER 896—H.F.No.1088

[Coded]

An act relating to pollution control; prohibiting cleaning agents and chemical water conditioners containing certain nutrients; requiring certain tests for percentage content of phosphates in laundry or dishwashing compounds; requiring the display of certain lists setting forth percentage content of phosphates in certain products; providing penalties.

Be it enacted by the Legislature of the State of Minnesota:

Section 1. **[116.21] WATER POLLUTION; CONTROL OF NUTRIENTS; CLEANING AGENTS; WATER CONDITIONERS.** The legislature seeks to encourage the Minnesota pollution control agency through the passage of this act to set standards limiting the amount of nutrients in various cleaning agents and water conditioning agents. The legislature realizes that the nutrients contained in many of these products serve a valuable purpose in increasing their overall effectiveness, but we are also aware that they overstimulate the growth of aquatic life and eventually lead to an acceleration of the natural eutrophication process of our state's waters. Limitations imposed under this act should, however, be made taking the following factors into consideration:

(1) The availability of safe, nonpolluting, and effective substitutes.

(2) The difference in the mineral content of water in various parts of the state.
