Subd. 3. INSTALLATION OF DRAIN TILE ALONG OR ACROSS HIGHWAY RIGHT-OF-WAY. (a) When the course of natural drainage of any land runs to a highway, the owner of the land who has been granted a permit as provided in this subdivision may install drain tile along or across the highway right-of-way along the general course of the natural drainageway, provided further that there will be no diversion of drainage waters away from the natural receiving drainageway immediately downstream from the highway. Any installation shall be made in accordance with specifications set forth in the permit and any rules that apply to the installations. When any installation is made pursuant to this subdivision the highway shall be left in as good condition in every respect as it was before the installation was made.

(b) Any road authority may accept applications for permits for installation of drain tile along or across the right-of-way of a highway under its jurisdiction. The road authority may adopt reasonable rules for the installations and may require a bond before granting any permit. Permits for installation along a highway right-of-way shall insure that the length of the installation is restricted to the minimum necessary to achieve the desired agricultural benefits. No permit shall allow any open trenches to be left on the right-of-way after installation of drain tile is completed. A road authority that grants a permit for drain tile installation shall not be responsible for any damage to that installation resulting from the action of the authority or any other permittee utilizing the right-of-way.

(c) Any person who installs drain tile along or across a highway right-of-way without obtaining a permit as provided in this subdivision is guilty of a misdemeanor.

(d) The commissioner shall take no action pursuant to this subdivision which will result in the loss of any federal aid for highway construction in this state.
