CHAPTER 482 — H.F.No. 1789

An act relating to the environment; limiting and reducing emissions of sulphur dioxide in the state; requiring adoption of an acid deposition control standard and plan by the pollution control agency; requiring reports; imposing an assessment on utilities; appropriating money; amending Minnesota Statutes 1981 Supplement, Section 116C.69, Subdivision 3; proposing new law coded in Minnesota Statutes, Chapter 116.

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF MINNESOTA:

Section 1. [116.42] LEGISLATIVE INTENT.

The legislature recognizes that acid deposition substantially resulting from the conduct of commercial and industrial operations, both within and without the state, poses a present and severe danger to the delicate balance of ecological systems within the state, and that the failure to act promptly and decisively to mitigate or eliminate this danger will soon result in untold and irreparable damage to the agricultural, water, forest, fish, and wildlife resources of the state. It is therefore the intent of the legislature in enacting sections 1 to 4 to mitigate or eliminate the acid deposition problem by curbing sources of acid deposition within the state and to support and encourage other states, the federal government, and the province of Ontario in recognizing the dangers of acid deposition and taking steps to mitigate or eliminate it within their own jurisdictions.

Sec. 2. [116.43] ACID DEPOSITION DEFINED.

As used in sections 1 to 4, "acid deposition" means the wet or dry deposition from the atmosphere of chemical compounds, usually in the form of rain or snow, having the potential to form an aqueous compound with a pH level lower than the level considered normal under natural conditions, or lower than 5.6.
