16A.501 REPORT ON EXPENDITURE OF BOND PROCEEDS.

(a) The commissioner of management and budget must report annually to the legislature on the degree to which entities receiving appropriations for capital projects in
previous omnibus capital improvement acts have encumbered or expended that money. The report must be submitted to the chairs of the house of representatives Ways and Means Committee and the senate Finance Committee by January 1 of each year.

(b) The commissioner of management and budget must report by January 15 of each year to the chairs and ranking minority members of the house of representatives and senate committees with jurisdiction over capital investment, finance, and ways and means, on the amount and percentage of each agency's capital appropriation that is used to pay for the costs of staff directly attributable to capital programs or projects funded with state general obligation bond proceeds. The report must also include information on agencies' compliance with the commissioner's policies governing the use of general obligation bond proceeds to pay staff costs and any changes to the commissioner's policies.

Sec. 29. Minnesota Statutes 2009 Supplement, section 16A.647, subdivision 1, is amended to read:

Subdivision 1. Authority to issue. When authorized by law to issue state general obligation bonds or state 911 revenue bonds under section 403.275, the commissioner may issue all or part of the bonds as tax credit bonds or as interest subsidy bonds or a combination of the two.

Sec. 30. Minnesota Statutes 2009 Supplement, section 16A.647, subdivision 5, is amended to read:

Subd. 5. Sale; certain costs of issuance. Tax credit bonds and interest subsidy bonds must be sold at a price not less than 98 percent of their stated principal amount. No state trunk highway bond may be sold for a price of less than par and accrued interest. When the commissioner determines to issue tax credit bonds or interest subsidy bonds to achieve a net present value debt service savings over tax-exempt bonds, the commissioner may issue an additional principal amount of bonds, not to exceed two percent of the principal amount of bonds otherwise authorized by law to be issued, to pay the costs of investment banking and banking services related to the sale and placement of the bonds, provided the additional issuance will not cause an increase in the general fund debt service transfer for the biennium during which the bonds are sold, as estimated by the commissioner. The proceeds are appropriated for this purpose.

Sec. 31. Minnesota Statutes 2008, section 16A.66, subdivision 2, is amended to read:

Subd. 2. Special provisions for sale and issuance. Refunding bonds may be sold publicly, or directly to the State Board of Investment without bids, or may be exchanged for bonds refunded by agreement with their holders. The proceeds of refunding bonds may be deposited, invested, and applied to accomplish the refunding as provided in section 475.67, subdivisions 5 to 10, and 13. Bids for the securities to be purchased for the escrow account may be secured, at the commissioner's election, either through the State Board of Investment or a suitable financial institution. The interest rate on refunding bonds may exceed that on the refunded bonds if the purpose of refunding is to extend the maturities and to reduce the amount needed annually to pay and to secure the debt.
Sec. 32. Minnesota Statutes 2008, section 16B.26, is amended to read:

16B.26 UTILITY COMPANIES, PERMITS TO CROSS STATE-OWNED LANDS.

Subdivision 1. Easements. (a) Authority. Except where the authority conferred by this section has been imposed on some other state or county office, the commissioner may grant an easement or permit over, under, or across any land owned by the state for the purpose of constructing roads, streets, telephone, telegraph, and electric power lines; cables or conduits, underground or otherwise, or mains or pipe lines for gas, liquids, or solids in suspension public purposes, including but not limited to, access, road, street, mass transit, telecommunication, flood protection, or utility purposes. This authority does not apply to land under the jurisdiction of the commissioner of natural resources or land obtained for trunk highway purposes.

(b) Notice of revocation. An easement or permit is revocable by written notice given by the commissioner if at any time its continuance will conflict with a public use of the land over, under, or upon which it is granted, or for any other reason. The notice must be in writing and is effective 90 days after the notice is sent by certified mail to the last known address of the record holder of the easement. If the address of the holder of the easement or permit is not known, it expires 90 days after the notice is recorded in the office of the county recorder of the county in which the land is located. Upon revocation of an easement, the commissioner may allow a reasonable time for the easement holder to vacate the premises affected. Notwithstanding the foregoing, the commissioner may grant to a state agency or political subdivision a permanent easement for the construction, operation, and maintenance of publicly owned infrastructure as described in paragraph (a), to have and to hold for as long as the easement area is used in accordance with the terms and conditions of the easement. If a permanent easement ceases to be used for the purposes stated in the easement or in accordance with its terms and conditions, the easement may be revoked by a written notice given by the commissioner in accordance with this paragraph.

(c) Easement runs with land. State land subject to an easement or permit granted by the commissioner remains subject to sale or lease, and the sale or lease does not revoke the permit or easement granted.

Subd. 2. Land controlled by other agencies. If the easement or permit involves land under the jurisdiction of an agency other than the Department of Administration, it is subject to the approval of the head of the agency and is subject to revocation by the commissioner as provided in this section, on request of the head of the agency.

Subd. 3. Application. An application for easement or permit under this section must be in quadruplicate and must include: a legal description of the land affected; a map showing the area affected by the easement or permit; and a detailed design of any structures to be placed on the land. The commissioner may require that the application be in another form and include other descriptions, maps, or designs. The commissioner may at any time order changes or modifications respecting construction or maintenance of structures or other conditions of the easement which the commissioner finds necessary to protect the public health and safety.

Subd. 4. Form; duration. The easement or permit must be in a form prescribed by the attorney general and must describe the location of the easement granted. The easement or permit continues until revoked by the commissioner, subject to change or modification as provided in this section.
Subd. 5. **Consideration; terms.** The commissioner may prescribe consideration and conditions for granting an easement or permit. Money received by the state under this section must be credited to the fund to which income or proceeds of sale from the land would be credited, if provision for the sale is made by law. Otherwise, it must be credited to the general fund.

Sec. 33. **[16B.327] RECYCLING CONSTRUCTION AND DEMOLITION WASTE FROM STATE BUILDINGS; REQUIREMENT.**

The commissioner shall require in contracts for the construction, renovation, or demolition of a state building that the contractor and any subcontractor must divert from deposit in a landfill and must recycle at least 50 percent of the nonhazardous construction and demolition waste, measured by tonnage or volume, produced by the project or demonstrate that the waste was delivered to construction and demolition waste recycling facilities that maintain a 50 percent annual recycling rate. This requirement applies to a project to construct, renovate, or demolish a state building that receives funding from the bond proceeds fund after January 1, 2011, provided that:

1. The project is located within 40 miles of a construction and demolition waste recycling facility that meets the requirements of this section and can process the applicable building materials; and

2. The funding from the bond proceeds fund is $5,000,000 or more.

For the purposes of this section, "state building" means a building wholly owned or leased by a state agency, the Minnesota State Colleges and Universities, or the University of Minnesota.

"Construction or major remodeling" means construction of a new building, a substantial addition to an existing building, or a substantial change to the interior configuration of an existing building. The presentation must note any significant changes in the work that will be done, or in its cost, since the appropriation for the project was enacted or from the predesign submittal. The program plans and estimates must be presented for review at least two weeks before a recommendation is needed. The recommendations are advisory only. Failure or refusal to make a recommendation is considered a negative recommendation. The chairs of the senate Finance Committee and the house of representatives Capital Investment and Ways and Means Committees must also be notified whenever there is a substantial change in a construction or major remodeling project, or in its cost.
(b) Capital projects exempt from the requirements of this subdivision include demolition or decommissioning of state assets, hazardous material projects, utility infrastructure projects, environmental testing, parking lots, parking structures, park and ride facilities, bus rapid transit stations, light rail lines, exterior lighting, fencing, highway rest areas, truck stations, storage facilities not consisting primarily of offices or heated work areas, roads, bridges, trails, pathways, campgrounds, athletic fields, dams, floodwater retention systems, water access sites, harbors, sewer separation projects, water and wastewater facilities, port development projects for which the commissioner of transportation has entered into an assistance agreement under section 457A.04, ice centers, a local government project with a construction cost of less than $1,500,000, or any other capital project with a construction cost of less than $750,000.

Subd. 2. Match. A grant under this section may not be made until the commissioner has determined that at least 30 percent of the total project cost has been committed to the project from nonstate sources.

Subd. 3. Amount. No more than one-third of the amount appropriated by any one appropriation act may be granted to any one project.

Subd. 4. Application. (a) To be eligible to receive a grant, the grant application must be made to the commissioner on behalf of any combination of at least three counties, cities, towns, or school districts. The grant applicants must have entered into a joint powers agreement and formed a joint powers board under section 471.59 to govern the facilities. The joint powers board must approve the application by resolution.

(b) The grant application must demonstrate that acquisition, construction, or renovation of the cooperative facilities will improve the delivery of services by the grant applicants and will generate savings to the applicants in operating their buildings and programs.

c) The commissioner shall prescribe and provide the application form. The application must include at least the following information:

(1) identification of the facilities;

(2) a plan for the facilities;

(3) a description of how the facilities will improve the delivery of governmental services by the applicants;

3. substantial savings in operating costs; or
4. positive return on investment over the life of the facility.

**116J.435 BIOSCIENCE INNOVATIVE BUSINESS DEVELOPMENT PUBLIC INFRASTRUCTURE GRANT PROGRAM.**

Subdivision 1. **Creation of account.** A bioscience innovative business development public infrastructure account is created in the bond proceeds fund. Money
in the account may only be used for capital costs of public infrastructure for eligible

biotechnology innovative business development projects.

Subd. 2. Definitions. For purposes of this section:

(1) "local governmental unit" means a county, city, town, special district, public
higher education institution, or other political subdivision or public corporation;

(2) "governing body" means the council, board of commissioners, board of trustees,
board of regents, or other body charged with governing a local governmental unit;

(3) "public infrastructure" means publicly owned physical infrastructure in this state,
including, but not limited to, wastewater collection and treatment systems, drinking water
systems, storm sewers, utility extensions, telecommunications infrastructure, streets,
roads, bridges, parking ramps, facilities that support basic science technology and clinical
research, and research infrastructure; and

(4) "innovative business" means a business that is engaged in, or is committed to
engage in, innovation in Minnesota in one of the following: using proprietary technology
to add value to a product, process, or service in a high technology field; researching
or developing a proprietary product, process, or service in a high technology field;
researching, developing, or producing a new proprietary technology for use in the fields of
tourism, forestry, mining, transportation, or green manufacturing;

(5) "proprietary technology" means the technical innovations that are unique and
legally owned or licensed by a business and includes, without limitation, those innovations
that are patented, patent pending, a subject of trade secrets, or copyrighted; and

(6) "eligible project" means a biotechnology innovative business development
capital improvement project in this state, including: manufacturing; technology;
warehousing and distribution; research and development; biotechnology innovative business
incubator; agricultural bioprocessing; or industrial, office, or research park
development that would be used by a biotechnology based innovative business.

Subd. 3. Grant program established. (a) The commissioner shall make
competitive grants to local governmental units to acquire and prepare land on which
public infrastructure required to support an eligible project will be located, including
demolition of structures and remediation of any hazardous conditions on the land, or to
predesign, design, acquire, construct, furnish, and equip public infrastructure required to
support an eligible project. The local governmental unit receiving a grant must provide for
the remainder of the public infrastructure costs from other sources. The commissioner
may waive the requirements related to an eligible project under subdivision 2 if a project
would be eligible under this section but for the fact that its location requires infrastructure
improvements to residential development.

(b) The amount of a grant may not exceed the lesser of the cost of the public
infrastructure or 50 percent of the sum of the cost of the public infrastructure plus the cost
of the completed eligible project.

(c) The purpose of the program is to keep or enhance jobs in the area, increase the
tax base, or to expand or create new economic development through the growth of new
biotechnology innovative businesses and organizations.
Subd. 4. Application. (a) The commissioner must develop forms and procedures for soliciting and reviewing applications for grants under this section. At a minimum, a local governmental unit must include the following information in its application:

1. a resolution of its governing body certifying that the money required to be supplied by the local governmental unit to complete the public infrastructure is available and committed;

2. a detailed estimate, along with necessary supporting evidence, of the total development costs for the public infrastructure and eligible project;

3. an assessment of the potential or likely use of the site for bioscience innovative business activities after completion of the public infrastructure and eligible project;

4. a timeline indicating the major milestones of the public infrastructure and eligible project and their anticipated completion dates;

5. a commitment from the governing body to repay the grant if the milestones are not realized by the completion date identified in clause (4); and

6. any additional information or material the commissioner prescribes.

(b) The determination of whether to make a grant under subdivision 3 is within the discretion of the commissioner, subject to this section. The commissioner's decisions and application of the priorities are not subject to judicial review, except for abuse of discretion.

Subd. 5. Priorities. (a) If applications for grants exceed the available appropriations, grants must be made for public infrastructure that, in the commissioner's judgment, provides the highest return in public benefits for the public costs incurred. "Public benefits" include job creation, environmental benefits to the state and region, efficient use of public transportation, efficient use of existing infrastructure, provision of affordable housing, multiuse development that constitutes community rebuilding rather than single-use development, crime reduction, blight reduction, community stabilization, and property tax base maintenance or improvement. In making this judgment, the commissioner shall give priority to eligible projects with one or more of the following characteristics:

1. the potential of the local governmental unit to attract viable bioscience innovative businesses;

2. proximity to public transit if located in a metropolitan county, as defined in section 473.121, subdivision 4;

3. multijurisdictional eligible projects that take into account the need for affordable housing, transportation, and environmental impact;

4. the eligible project is not relocating substantially the same operation from another location in the state, unless the commissioner determines the eligible project cannot be reasonably accommodated within the local governmental unit in which the business is currently located, or the business would otherwise relocate to another state or country; and

5. the number of jobs that will be created.

(b) The factors in paragraph (a) are not listed in a rank order of priority; rather, the commissioner may weigh each factor, depending upon the facts and circumstances, as the commissioner considers appropriate.
Subd. 6. **Cancellation of grant.** If a grant is awarded to a local governmental unit and funds are not encumbered for the grant within four years after the award date, the grant must be canceled.

Subd. 7. **Repayment of grant.** If an eligible project supported by public infrastructure funded with a grant awarded under this section is not occupied by a bioscience business in accordance with the grant application under subdivision 4 within five years after the date of the last grant payment, the grant recipient must repay the amount of the grant received. The commissioner must deposit all money received under this subdivision into the state treasury and credit it to the debt service account in the state bond fund.

Sec. 40. Minnesota Statutes 2008, section 174.50, subdivision 6, is amended to read:

Subd. 6. **Grant rules criteria; rulemaking.** Procedures for application for grants from the fund, conditions for their administration, and criteria for priority, unless established in the laws authorizing the grants, shall be established by rules of the Department of Transportation consistent with those laws. The commissioner of transportation shall adopt rules consistent with this section that establish criteria for determining priorities and amounts of grants which must be based on consideration of:

1. effectiveness of the project in eliminating a deficiency in the transportation system;
2. number of persons affected by the deficiency;
3. economic feasibility;
4. effect on optimum land use and other concerns of state and regional planning;
5. availability of other financing capability; and
