2.30 (c) The commissioner of public safety must compile and make available to railroads a
 2.31 list of emergency managers and fire chiefs, which must include contact information.

3.1 Sec. 4. Minnesota Statutes 2016, section 115E.042, subdivision 4, is amended to read:

- 3.2 Subd. 4. **Response capabilities; time limits.** (a) Following confirmation of a discharge, 3.3 a railroad must deliver and deploy sufficient equipment and trained personnel to (1) contain 3.4 and recover discharged oil or hazardous substances and to, (2) protect the environment, and 3.5 (3) assist local public safety officials.
- 3.6 (b) Within 15 minutes after local emergency responders arrive on the scene of a rail
- incident involving oil or hazardous substances, a railroad must assist the incident commander
   to determine the nature of hazardous substances known to have been released and hazardous
   substances transported on the train by providing information that includes the chemical
   content of the hazardous substances, contact information for the shipper, and instructions
   for dealing with the release of the material. A railroad may provide information through the
- 3.12 <u>train orders on board the train, facsimile, or electronic transmission.</u>
- 3.13 (c) Within one hour of confirmation of a discharge, a railroad must provide a qualified 3.14 company employee representative to advise the incident commander, help assess the situation,
- 3.15 initiate railroad response actions as needed, and provide advice and recommendations to
- 3.16 <u>the incident commander regarding the response</u>. The <u>employee representative</u> may be made
  3.17 available by telephone, and must be authorized to deploy all necessary response resources
- 3.18 of the railroad.
- 3.19 (c) (d) Within three hours of confirmation of a discharge, a railroad must be capable of 3.20 delivering monitoring equipment and a trained operator to assist in protection of responder 3.21 and public safety. A plan to ensure delivery of monitoring equipment and an operator to a 3.22 discharge site must be provided each year to the commissioner of public safety.
- 3.23 (d) (e) Within three hours of confirmation of a discharge, a railroad must provide (1)
  3.24 qualified personnel at a discharge site to assess the discharge and to advise the incident
  3.25 commander, and (2) resources to assist the incident commander with ongoing public safety
  3.26 and scene stabilization.
- 3.27 (e) (f) A railroad must be capable of deploying containment boom from land across
  3.28 sewer outfalls, creeks, ditches, and other places where oil or hazardous substances may
  3.29 drain, in order to contain leaked material before it reaches those resources. The arrangement
  3.30 to provide containment boom and staff may be made by:
- 3.31 (1) training and caching equipment with local jurisdictions;
- 3.32 (2) training and caching equipment with a fire mutual-aid group;
- 3.33 (3) means of an industry cooperative or mutual-aid group;

4.1	(4) deployment of a contractor;
4.2	(5) deployment of a response organization under state contract; or
4.3	(6) other dependable means acceptable to the Pollution Control Agency.
4.4	(f) (g) Each arrangement under paragraph (e) (f) must be confirmed each year. Each
4.5	arrangement must be tested by drill at least once every five years.
4.6	(g) (h) Within eight hours of confirmation of a discharge, a railroad must be capable of
4.7	delivering and deploying containment boom, boats, oil recovery equipment, trained staff,
4.8	and all other materials needed to provide:
4.9	(1) on-site containment and recovery of a volume of oil equal to ten percent of the
4.10	calculated worst case discharge at any location along the route; and
4.11	(2) protection of listed sensitive areas and potable water intakes within one mile of a
4.12	discharge site and within eight hours of water travel time downstream in any river or stream
4.13	that the right-of-way intersects.
4.14	(h) (i) Within 60 hours of confirmation of a discharge, a railroad must be capable of
4.15	delivering and deploying additional containment boom, boats, oil recovery equipment,
4.16	trained staff, and all other materials needed to provide containment and recovery of a worst
4.17	case discharge and to protect listed sensitive areas and potable water intakes at any location
4.18	along the route.

in Minnesota. The assessment for each pipeline company is 50 percent of the total annual
 assessment amount, divided in equal proportion between companies based on the yearly
 aggregate gallons of oil and hazardous substance transported by pipeline in Minnesota.

(c) The assessments under this subdivision expire July 1, 2017. The commissioner of
 public safety must assess the rail carrier or pipeline company involved in an incident
 compelling a significant response for all post-incident review and analysis costs incurred

10.7 by the state and local units of government under subdivision 5.

10.8Subd. 5. Post-incident review and analysis; report; data. (a) After an incident10.9compelling a significant response, or upon request of a fire chief or emergency manager10.10after an incident, the commissioner must ensure a post-incident review and analysis is10.11performed in a timely manner. The review and analysis must be performed under an10.12agreement with an entity having relevant knowledge and experience that is fully independent10.13of the state, any local units of government involved in the incident, rail carriers, and pipeline10.14companies. The entity must be approved by all parties participating in the review.

10.15 (b) The review and analysis process must include an after-action review and must

10.16 evaluate, at a minimum, processes occurring during the incident for emergency assessment,

10.17 hazard operations, population protection, and incident management. The review and analysis

- 10.18 must be designed to minimize duplication of topics and issues addressed in any federal
- 10.19 review of the incident.

10.20 (c) By March 15 following any calendar year in which one or more post-incident reviews

10.21 and analyses are performed, the commissioner must prepare a report that, at a minimum,

10.22 includes a summary of the incidents and identifies findings, lessons learned, and process

- 10.23 changes. Upon request, the commissioner must make the report available to fire chiefs and
- 10.24 emergency managers.

10.25 (d) Except for the report under paragraph (c), any data under this subdivision are
 10.26 nonpublic data, as defined under section 13.02, subdivision 9.
