Subp. 3. **Amount of cost-sharing.** The amount of cost-sharing required of an applicant is determined in the following manner:

A. Step No. 1: The includable assets are totalled. If applicable, the household member deduction is subtracted from this total.

B. Step No. 2: The amount derived in Step No. 1 is then added to the adjusted gross income.

C. Step No. 3: The total of the allowable deductions is subtracted from the amount derived in Step No. 2. This figure indicates the SCH adjusted income.

D. Step No. 4: The percentage that the applicant must share in the cost of treatment is based on the applicant's SCH adjusted income level and on the number of members in the household. This percentage is calculated according to the following schedule:

SCH Cost-sharing Schedule

The applicant's share is one percent of cost for each \$1,000 or fraction of \$1,000 of income above 60 percent of the state gross median income for a household of the same size as the applicant's. The applicant's percent share is found on the schedule by looking under the number which is the number of members of applicant's household to find the income level which includes the applicant's annual household income. The applicant's percent share is shown to the far left of that income level. To extend the schedule to households of more than ten members add \$457 for each household member in excess of ten to the income levels for a household of ten members.
