AIR EMISSION PERMIT FEES

7002.0005 SCOPE.

Parts 7002.0005 to 7002.0085 apply to all persons required to obtain an air emission permit or an indirect source permit from the Minnesota Pollution Control Agency under chapter 7007 and parts 7023.9000 to 7023.9050.

Statutory Authority: *MS s 116.07*

History: 17 SR 440; 18 SR 1059

7002.0010 [Repealed, 17 SR 440]

7002.0015 DEFINITIONS.

Subpart 1. **Scope.** For the purposes of parts 7002.0005 to 7002.0085, the terms defined in this part have the meanings given them. The definitions in the state air pollution control rules as defined in part 7005.0100 apply unless the terms are defined in this part.

Subp. 2. **Affected facility.** "Affected facility" means any facility for which the owner or operator of the facility must obtain an air emission permit under chapter 7007.

Subp. 3. **Emission inventory.** "Emission inventory" means the inventory of actual emissions required under part 7019.3000.

Subp. 4. **Regulated pollutant.** "Regulated pollutant" means the following:

A. Nitrogen oxides (NO_x) or any volatile organic compound.

B. Any pollutant for which a national ambient air quality standard has been promulgated, except carbon monoxide.

Statutory Authority: *MS s 116.07*

History: 17 SR 440; 18 SR 1059

7002.0020 [Repealed, 17 SR 440]

7002.0025 ANNUAL EMISSION FEE RATES.

Subpart 1. **Calculation of fee.** Operators of affected facilities shall pay an annual emission fee for each ton of a regulated pollutant emitted to the air by the facility. The fee shall be based on the actual emission tonnages as established in the most recent available emission inventory. The fees shall be \$X for each ton of any regulated pollutant. The value of "X" is as determined in part 7002.0045.

Subp. 2. **New facilities.** New emission facilities that have been issued a permit, but have not yet been required to submit emissions data, shall pay a fee of \$770.

Subp. 3. **Estimated potential to emit.** If an emission facility fails to submit actual emissions data as required by part 7019.2000, subpart 4, or 7019.3000, whichever is in effect when the inventory is due, the annual emission fee for that facility shall be based on the estimated potential-to-emit of that facility, as defined in part 7005.0100, subpart 35a.

Statutory Authority: *MS s 116.07*

History: *17 SR 440; 18 SR 614*

7002.0030 [Repealed, 17 SR 440]

7002.0035 AIR QUALITY ANNUAL FEE TARGET.

The annual fee target shall be set as described in items A, B, and C.

A. For fiscal year 1993, the unadjusted fee target shall be \$5,093,000.

B. For fiscal year 1994 and thereafter, the unadjusted fee target shall be the greater of the following:

(1) the sum of:

(a) the amount directly appropriated to the Air Quality Division from the environmental fund for that fiscal year; and

(b) the Air Quality Division's portion of the appropriation from the environmental fund to the agency's general support program, as determined by using the indirect cost allocation plan approved by the Minnesota Department of Finance under Minnesota Statutes, section 16A.127, subdivision 4; or

(2) the amount calculated by multiplying \$25 per ton, adjusted for inflation since 1989, times the number of tons of each regulated pollutant listed in the most recent available emission inventory. A maximum of 4,000 tons per pollutant per facility shall be used for this calculation. The adjustment for inflation shall be in accordance with the adjustment described by the United States Environmental Protection Agency in rules adopted under title V of the federal Clean Air Act Amendments of 1990, Public Law Number 101-549, Statutes at Large, volume 104, pages 2399, et seq.

C. The amounts described in items A and B must be adjusted as follows:

(1) if the agency failed to collect its fee target the previous year, after making reasonable efforts to do so, the shortfall must be added to the next year's fee target;

(2) if the agency collected more than its fee target the previous year, the excess must be subtracted from the next year's fee target; and

(3) for any year, the commissioner may increase the fee target by up to five percent to reflect the anticipated fee nonpayment rate. This increase must not be considered for purposes of calculating a deficit or surplus under subitems (1) and (2).

$$X = (F - I - P)/T$$

where:

X = Dollars per ton.

F = Total annual fee target, as determined in this part.

I = Total amount to be billed as indirect source permit fees for the previous calendar year, part 7002.0055.

P = Total amount to be billed as new permit fees for the previous calendar year, part 7002.0025, subpart 2.

T = Total number of tons of all regulated pollutants listed in the most recent annual emissions inventory.
