7010.0100 DEFINITIONS.

For the purpose of all noise pollution control rules:

A. "ANSI" means the American National Standards Institute or its successor bodies.

B. "Agency" means the Minnesota Pollution Control Agency, its agent, or representative.

C. "dBA" is a unit of sound level. "dBA" is the weighted sound pressure level by the use of the A metering characteristic and weighting as specified in ANSI Specification for Sound Level Meters, S1.4 - 1971, which is hereby incorporated by reference. For the purpose of these parts, dBA is used as a measure of human response to sound.

D. "Daytime hours" are those from 7:00 a.m. to 10:00 p.m. (0700-2200).

E. "Decibel" is a unit of sound pressure level, abbreviated dB.

F. "Director" means the executive director of the Minnesota Pollution Control Agency.

G. "Impulsive noise" means either a single sound pressure peak (with either a rise time less than 200 milliseconds or total duration less than 200 milliseconds) or multiple sound pressure peaks (with either rise times less than 200 milliseconds or total duration less than 200 milliseconds) spaced at least by 200 millisecond pauses.

H. " L_{10} " is the sound level, expressed in dBA, which is exceeded ten percent of the time for a one hour survey, as measured by test procedures approved by the director.

I. " L_{50} " is the sound level, expressed in dBA, which is exceeded 50 percent of the time for a one hour survey, as measured by test procedures approved by the director.

J. "Nighttime hours" are those from 10:00 p.m. to 7:00 a.m. (2200-0700).

K. "Noise" means any sound not occurring in the natural environment, including, but not limited to, sounds emanating from aircraft and highways, and industrial, commercial, and residential sources.

L. "Nonimpulsive noise" means all noise not included in the definition of impulsive noise.

M. "Person" means any human being, any municipality, or other governmental or political subdivision, or any other public agency, any public or private corporation, any partnership, firm, association, or other organization, any receiver trustee, assignee, agent, or other legal representative of any of the

foregoing, or any other legal entity, but does not include the Minnesota Pollution Control Agency.

N. "SLUCM" means the Standard Land Use Coding Manual (1969, United States Government Printing Office) which designates land activities by means of numerical codes.

O. "Sound" is an oscillation in pressure, stress, particle displacement, particle velocity, etc., in an elastic or partially elastic medium, or the superposition of such propagated alterations.

P. "Sound pressure level" is 20 times the logarithm to the base ten of the ratio of the pressure of a sound, p , to the reference pressure, p_r . For the purposes of these parts, the reference pressure shall be 20 micronewtons per square meter ($20 \mu\text{N/m}^2$). In equation form, sound pressure level in units of decibels is expressed as:

$$\text{SPL (dB)} = 20 \log_{10} p/p_r$$

7010.0200 SEVERABILITY.

If any provision of any rule or the application thereof to any person or circumstances is held to be invalid, such invalidity shall not affect other provision or application, and to this end the provisions of all rules and the various applications thereof are declared to be severable.

Statutory Authority: *MS s 116.07 subds 2,4*

7010.0300 VARIANCE.

Whereupon written application of the responsible person or persons, the agency finds that by reason of exceptional circumstances strict conformity with any provisions of any noise rule would cause undue hardship, would be unreasonable, impractical, or not feasible under the circumstances, the agency may permit a variance upon such conditions and within such time limitations as it may prescribe for the prevention, control, or abatement of noise pollution in harmony with the intent of the state and any applicable federal laws.

Statutory Authority: *MS s 116.07 subds 2,4*

7010.0400 NOISE STANDARDS.

These standards describe the limiting levels of sound established on the basis of present knowledge for the preservation of public health and welfare. These standards are consistent with speech, sleep, annoyance, and hearing conservation requirements for receivers within areas grouped according to land activities by the noise area classification (NAC) system herein described. However, these standards do not, by themselves, identify the limiting levels of impulsive noise needed for the preservation of public health and welfare.

NAC	Day (0700-2200)		Night (2200-0700)	
	L ₅₀	L ₁₀	L ₅₀	L ₁₀
