

1300.0040 SCOPE.

The code applies to the construction, alteration, moving, demolition, repair, and use of any building, structure, or building service equipment in a municipality, except work located primarily in a public way, public utility towers and poles, mechanical equipment not specifically regulated in the code, and hydraulic flood control structures. Structures classified under part 1300.0070, subpart 12a, as IRC-1, IRC-2, IRC-3, and IRC-4 occupancies not more than three stories above grade plane in height with separate means of egress shall comply with chapter 1309 and other applicable rules. Other buildings and structures and appurtenances connected or attached to them shall comply with chapter 1305 and other applicable rules.

Exception: The following structures that meet the scope of chapter 1305 shall be designed to comply with Minnesota Rules, chapter 1311:

- (1) existing buildings undergoing repair, alteration, or change of occupancy; and
- (2) historic buildings.

If different provisions of the code specify different materials, methods of construction, or other requirements, the most restrictive provision governs. If there is a conflict between a general requirement and a specific requirement, the specific requirement applies.

If reference is made in the code to an appendix, the provisions in the appendix do not apply unless specifically adopted by the code. Optional appendix chapters of the code identified in part 1300.0060 do not apply unless a municipality has specifically adopted them.
