

1513.1020 MOUNTING OF CONTAINERS.

Subpart 1. **Secure mounting.** All containers must be securely mounted. A "stop" or "stops" must be mounted on the farm wagon or on the container in such a way that the container cannot be dislodged from its mounting due to the farm wagon coming to a sudden stop. Back slippage must also be prevented.

Subp. 2. **Hold-down device.** A hold-down device must be provided which will anchor the container to the farm wagon at one or more places on each side of the container.

Subp. 3. **Weight distribution.** If containers are mounted on four-wheel farm wagons, the weight must be distributed evenly over both axles.

Subp. 4. **Friction.** If the cradle and the container are not welded together, suitable material must be used between them to eliminate metal-to-metal friction. See part 1513.0120, subparts 2 and 4, with regard to welding on a container.
