

1540.2150 SPECIMENS FOR EDUCATIONAL PURPOSES.

Specimens of diseased, condemned, and inedible materials, including pig or lamb embryos and specimens of animal parasites, may be released for educational purposes by the commissioner; provided, that the party desiring such specimens makes a written application for same, stating the use to be made of them; and provided further, that the applicant arranges with and receives permission from the official establishment to obtain the specimens. If the application is satisfactory, the commissioner shall issue a permit authorizing the removal of the specimens. Such permits shall be numbered and issued for not beyond the then current calendar year.
