

4410.2900 PERMIT DECISIONS IN CASES REQUIRING EIS.

A. Within 30 days after the determination of adequacy of a final EIS, final decisions shall be made by the appropriate governmental units on those permits which were identified as required in the scoping process and for which information was developed concurrently with the preparation of the EIS. The 30-day period may be extended with the consent of the permit applicant, where a longer period is required by federal law or state statute, or where a longer period is permitted by Minnesota Statutes, section 15.99.

B. At the time of its permit decision, for those permits that were identified during the scoping process as requiring a record of decision, each permitting unit of government shall prepare a concise public record of how it considered the EIS in its decision. That record shall be supplied to the EQB for the purpose of monitoring the effectiveness of the process created by parts 4410.0200 to 4410.6500 and to any other person requesting the information. The record may be integrated into any other record prepared by the permitting unit of government.

C. The RGU or other governmental unit shall, upon request, inform commenting governmental units and interested parties on the progress in carrying out mitigation measures which the commenting governmental units have proposed and which were adopted by the RGU making the decision.
