

**4761.2620 PROHIBITED PRACTICES FOR LEAD HAZARD REDUCTION.**

The following work practices are prohibited during any lead hazard reduction:

- A. open-flame burning or torching;
- B. heat guns operating at more than 700 degrees Fahrenheit;
- C. chemical strippers containing methylene chloride;
- D. all powered-machine methods unless the resulting dust is immediately captured by HEPA filters;
- E. dry scraping, dry sanding, and dry wire brushing, except for removing deteriorated paint around electrical outlets, electrical fixtures, or other areas totaling no more than:
  - (1) two square feet in any one room;
  - (2) 20 square feet on exterior surfaces; or
  - (3) ten percent of the surface area on trim around doors and windows or other small building components;
- F. dry sweeping;
- G. dry vacuuming, unless a vacuum cleaner with a HEPA filter that is specifically designated for hazardous materials is used; and
- H. wet/dry vacuum cleaners used for any purpose other than to collect wash and rinse water during lead hazard reduction within a containment.
