

4770.3020 SAFETY TESTING PROCEDURES.

A. A batch of dried raw cannabis sample must pass safety testing at a testing laboratory before any finished goods produced from that batch are transported to a distribution facility.

B. A manufacturer must submit a minimum of 15 grams of dried raw cannabis to a testing laboratory for the full spectrum of safety testing. The testing laboratory must notify in writing both the manufacturer and the commissioner if the testing laboratory requires more than 15 grams of dried raw cannabis to conduct the testing.

C. A batch of dried raw cannabis sample must pass both microbiological and mycotoxins testing under part 4770.3021 and heavy metals testing under part 4770.3022 to pass safety testing.
