

**7035.2605 EMERGENCY PROCEDURES.**

Subpart 1. **Containment measures.** During an emergency, the owner or operator must take all reasonable measures to ensure that fires, explosions, and releases do not occur, recur, or spread. The owner or operator must also contain, recover, and treat liquids that come in contact with the waste during an emergency response action.

Subp. 2. **Report.** The owner or operator shall submit to the commissioner within two weeks after an emergency a written report describing the emergency and the procedures followed to minimize potential hazards to human health and the environment. After the owner or operator completes emergency procedures to control any possible hazards resulting from the release, explosion, or fire, the owner or operator must refer to the contingency action plan to determine the necessary follow-up actions. The owner or operator must assess the adequacy of the emergency procedural manual and make appropriate changes to correct any inadequacies.
