

7037.0810 STORAGE OF PETROLEUM CONTAMINATED SOIL BEFORE BATCH APPROVAL.

Following preliminary approval under part 7037.1100, petroleum contaminated soil may be stored at the approved land treatment site on the plot or at a storage area meeting the criteria of part 7037.1000, subpart 6, provided that the application required under part 7037.1300 is filed within 30 days of initial soil storage, and runoff control is provided in accordance with part 7037.1600, subpart 1, item A. If approval under part 7037.1300 is denied, the generator or the owner or operator of the land treatment site shall remove the soil within 30 days.
