16 States Government Printing Office, Washington, D.C. 20402, (202)
17 783-3238; and

18 H. [Unchanged.]

19 7045.0552 FACILITIES GOVERNED BY INTERIM STATUS.

20 Subpart 1. General requirements. Parts 7045.0552 to
21 7045.0642 establish minimum standards for the management of
22 hazardous waste during the period of interim status and until
23 certification of final closure or, if the facility is subject to
24 post-closure requirements, until post-closure responsibilities
25 are fulfilled. These standards apply to owners and operators of
26 existing facilities who have fully complied with the
27 requirements for state or federal interim status until a permit
28 is issued or until applicable interim status closure and
29 post-closure responsibilities are fulfilled, and those who have
30 failed to achieve state or federal interim status. These
31 standards apply to all treatment, storage, or disposal of
32 hazardous waste at these facilities after July 16, 1984, except
33 as specifically provided otherwise.

34 For existing facilities which were not required to obtain
35 federal interim status under the Resource Conservation and

1 Recovery Act, United States Code, title 42, sections 6901 to
 2 6986, as amended through June 30, 1983, but are required to
 3 obtain state interim status, the requirements of parts
 4 7045.0590; 7045.0592; 7045.0632, subpart 4, items A and B;
 5 7045.0634, subpart 2; 7045.0638, subparts 2, 7, and 8, become
 6 effective 12 months after July 16, 1984, and the requirements of
 7 parts 7045.0608 to 7045.0624 become effective 90 days after July
 8 16, 1984.

9 Subp. 2. and 3. [Unchanged.]

10 7045.0638 LANDFILLS.

11 Subpart 1. to 3. [Unchanged.]

12 Subp. 4. Closure and post-closure. Closure and
 13 post-closure requirements are as follows:

14 A. At final closure of the landfill or upon closure
 15 of any landfill cell, the owner or operator shall cover the
 16 landfill or landfill cell with a final cover designed and
 17 constructed to:

18 (1) provide long-term minimization of migration
 19 of liquids through the closed landfill;

20 (2) function with minimum maintenance;

21 (3) promote drainage and minimize erosion or
 22 abrasion of the cover;

23 (4) accommodate settling and subsidence so that
 24 the cover's integrity is maintained; and

25 (5) have a permeability less than or equal to the
 26 permeability of any bottom liner system or natural subsoils
 27 present.

28 B. After final closure, the owner or operator shall
 29 comply with all post-closure requirements contained in parts
 30 7045.0600 to 7045.0606 including maintenance and monitoring
 31 throughout the post-closure care period. The owner or operator
 32 must:

33 (1) maintain the integrity and effectiveness of
 34 the final cover, including making repairs to the cover as
 35 necessary to correct the effect of settling, subsidence,
 36 erosion, or other events;

1 (2) maintain and monitor the ground water
2 monitoring system and comply with all other applicable
3 requirements of parts 7045.0590 and 7045.0592;

4 (3) prevent run-on and run-off from eroding or
5 otherwise damaging the final cover; and

6 (4) protect and maintain surveyed bench marks
7 used in complying with part 7045.0638, subpart 3.

8 Subp. 5. to 7. [Unchanged.]

9 Subp. 8. **Special requirements for containers.** Unless they
10 are very small, such as an ampule, containers must be either:

11 A. at least 90 percent full when placed in the
12 landfill; or

13 B. crushed, shredded, or similarly reduced in volume
14 to the maximum practical extent before burial in the landfill.

15 Subp. 9. [Unchanged.]

16

17 **REPEALER.** Minnesota Rules, parts 7045.1240, 7045.1250, and
18 7045.1260 are repealed.
