3 Adopted Permanent Rules Relating to Swine

4

5 Rules as Adopted

6 1700.2590 DEFINITIONS.

7 [For text of subps 1 to 4, see M.R.]

8 Subp. 5. Separation of breeding swine. "Separation of
9 breeding swine" means the maintenance of the swine at least six
10 feet from other swine or divided by solid partitions that will
11 prevent nose-to-nose contact with other swine.

12 1700.2800 CONTENTS OF CERTIFICATE OF VETERINARY INSPECTION.

13 Certificates of veterinary inspection for feeder swine must
14 list identification numbers, the herd of origin, the
15 destination, and one of the following statements: "these feeder
16 swine originate from a pseudorabies monitored herd," "these
17 feeder swine originate from a pseudorabies qualified herd,"
18 "these feeder swine have all been tested for pseudorabies within
19 30 days before importation and found negative," or "these feeder
20 swine originate from an officially designated Stage III, IV, or
21 V pseudorabies area," as defined in part 1705.2400, subpart 5a,
22 and the State-Federal Program Standards for Pseudorabies
23 Eradication.

24 Certificates of veterinary inspection for breeding swine
25 must show the individual identification number of each animal.
26 Acceptable individual identification must be either eartag,
27 tattoo, registration number, or approved ear notch system, the
28 date of test, if tested, the validated and qualified herd number
29 and date of last test, if not tested within 30 days before
30 importation.

31 Certificates of veterinary inspection for feral swine must
32 list individual eartag numbers and show that the swine were for
33 pseudorabies and found negative within 30 days before
34 importation.

35 One copy of the certificate of veterinary inspection

1 approved by the animal health department of the state of origin
2 must be forwarded to the board within 14 days.

3 1700.2850 FEEDER SWINE.

4 Feeder swine must originate from pseudorabies monitored
5 herds, qualified pseudorabies negative herds, or an officially
6 designated Stage III, IV, or V pseudorabies area, or must be
7 tested negative within 30 days, and must not be transported or
8 confined with swine of unknown status. Feral swine may not be
9 imported into Minnesota without a negative pseudorabies test
10 within the previous 30 days.

11 1700.2900 BREEDING SWINE.

12 Breeding swine must be:

13 A. negative to the brucellosis buffered antigen test
14 conducted at a state or federal laboratory within 30 days prior
15 to importation, or originate from a validated brucellosis free
16 swine herd, or originate directly from a nonquarantined herd in
17 a validated brucellosis free state;

18 B. negative to an official test for pseudorabies
19 within 30 days prior to importation or originate from a
20 qualified pseudorabies negative herd; and

21 C. ~~isolated~~ separated from all other swine until
22 tested negative not less than 30 nor more than 60 days following
23 importation according to the following sample size:

24 (1) if there are ten or less breeding swine, all
25 must be tested;

26 (2) if there are 11 to 35 breeding swine, ten
27 must be tested; and

28 (3) if there are 36 or more breeding swine, 30
29 percent or 30 head, whichever is less, must be tested.

30 This item does not apply to breeding stock sales centers in
31 Minnesota as provided in parts 1705.2400, subpart 15, and
32 1705.2480, subpart 9.

33 Breeding swine must not be transported or confined with
34 swine of unknown status.
