10.2 Subpart 1. **Requirements.** Each plan or ten-year plan amendment shall contain
10.3 specific measurable goals that address issues identified under subparts 2 to 8 in conjunction
10.4 with the priority issues that are identified by the organization under part 8410.0045. The
10.5 goals must be consistent with the intent of the metropolitan water management program
10.6 purposes in Minnesota Statutes, section 103B.201, and state and federal standards.
10.7 The goals of the organization shall coordinate and attempt to resolve conflict with
10.8 town, city, county, regional, or state goals. The goals must contain sufficient detail to
10.9 provide direction regarding what the goals should accomplish, provide direction to the
10.10 organization's board, and allow for the success or failure of the goals to be measured. A
10.11 procedure must be included to evaluate progress for each goal defined in this part at a
10.12 minimum of every two years according to part 8410.0150, subpart 3, item E.

10.13 Subp. 2. **Water quantity.** Water quantity goals must be established to address
10.14 priority issues, at a minimum, considering volume, peak rate, base flow, and
10.15 ~~imperviousness, or similar issues.~~ The goals must recognize current trend direction and
10.16 the fundamental relationship between water quantity and land use.

10.17 Subp. 3. **Water quality.** Water quality goals must be established to address priority
10.18 issues considering the uses of the water resource. The goals must recognize current trend
10.19 direction and the fundamental relationship between water quality and land use. If water
10.20 quality goals in the plan are less stringent than state water quality standards, the plan
10.21 must acknowledge this.

10.22 Subp. 4. [See repealer.]

10.23 Subp. 5. [See repealer.]

10.24 Subp. 6. **Public drainage systems.** Public drainage system management goals
10.25 must be established. The goals must define the organization's relationship to the drainage
10.26 authority. The plan may recommend whether or not there are advantages to managing the

11.1 drainage systems under the Metropolitan Water Management Act or through transferring
11.2 the drainage authority according to Minnesota Statutes, section 103E.812, and may
11.3 determine whether drainage maintenance activities have the potential of adversely
11.4 impacting any goal of the organization. The plan must generally describe the effect of the
11.5 plan on existing drainage systems.

11.6 Subp. 7. **Groundwater.** Goals must be established to address groundwater-surface
11.7 water interactions defined in approved and adopted county groundwater plans that are in
11.8 effect. Organizations ~~are encouraged to~~ shall establish goals to address groundwater issues
11.9 identified within the area of the organization in the Twin Cities Metropolitan Area Master
11.10 Water Supply Plan, or the Metropolitan Council's subsequent equivalent, and source water
11.11 protection plans, ~~and local water supply plans.~~ Additional goals may be established as
11.12 determined by the organization.

11.13 Subp. 8. **Wetlands.** Goals must be established for wetland management. The goals
11.14 must recognize the fundamental relationship between wetland management and land use.

11.15 Subp. 9. [See repealer.]

11.16 **8410.0105 IMPLEMENTATION ACTIONS.**

11.17 Subpart 1. **Requirements.** Each plan shall contain prioritized implementation
11.18 actions through the year the plan extends to that consists of administrative processes and
11.19 programs to address the goals defined under part 8410.0080 and that is consistent with the
11.20 principles of part 8410.0045, subpart 1, item A. The programs described in subparts 2
11.21 to 6 must be included in each plan unless the plan sufficiently justifies that a program or
11.22 program element is not needed. Each plan shall include a procedure to evaluate progress
11.23 for the implementation actions at a minimum of every two years according to part
11.24 8410.0150, subpart 3, item E. Each plan shall:

12.1 A. include a table that briefly describes each component of the implementation
12.2 actions, the schedule, estimated cost, and funding sources for each component including
12.3 annual budget totals;

12.4 B. clearly define the responsibilities of the organization, the local government
12.5 units, and other entities for carrying out the implementation actions;

12.6 C. define the organization's process for evaluating implementation of local
12.7 water plans and procedures to address a local government unit failing to implement its
12.8 local water plan or parts of its local water plan; and

12.9 D. include a procedure to establish an advisory committee, committees, or other
12.10 means of public and technical participation acceptable to the board, for the purpose of
12.11 making recommendations on a ten-year plan amendment.

12.12 Subp. 2. **Capital improvement program.** Each plan must consider the feasibility of
12.13 implementing structural solutions for attaining the goals defined under part 8410.0080
12.14 that cannot be resolved by nonstructural, preventative actions. Each plan must include
12.15 a table for a capital improvement program that identifies structural and nonstructural
12.16 alternatives that would lessen capital expenditures and sets forth, by year, details of each
12.17 contemplated capital improvement that includes the need, schedule, estimated cost, and
12.18 funding source. The information may be combined with subpart 1, item A. In assigning
12.19 priorities, consideration must be given to federal, state, regional, local, and private
12.20 partners and regional and state plans.

12.21 Subp. 3. **Operation and maintenance programs.** The plan must define who is
12.22 responsible for inspection, operation, and maintenance of storm water infrastructure,
12.23 public works, facilities, and natural and artificial watercourses and specify any new
12.24 programs or revisions to existing programs needed to accomplish the goals defined under
12.25 part 8410.0080.

13.1 Subp. 4. **Information and education program.** Each plan must provide for an
13.2 information and education program in consideration of the goals defined under part
13.3 8410.0080. The program must, at a minimum, include the purpose, targeted audiences,
13.4 and actions. An annual communication must be distributed to residents of the organization
13.5 in compliance with Minnesota Statutes, section 103B.227, subdivision 4.

13.6 Subp. 5. **Data collection programs.** Each plan must address whether established
13.7 water quality, water quantity, and other monitoring programs implemented by the
13.8 organization and others are capable of producing an accurate evaluation of the progress
13.9 being made toward the goals defined under part 8410.0080. The programs shall, at a
13.10 minimum, include the location of sampling, the frequency of sampling, the proposed
13.11 parameters to be measured, and the requirement of periodic analysis of the data. Each
13.12 organization must annually submit the collected data ~~consistent with state compatibility~~
13.13 guidelines that has been quality-controlled and quality-assured to the appropriate state
13.14 agency ~~for entry into public databases.~~

13.15 Subp. 6. **Regulatory program.** Controls or performance standards must be
13.16 described in the plan, although an organization's rules in place at the time of plan approval
13.17 may be referenced instead. The plan must specifically describe how the organization's
13.18 controls will be implemented in coordination with local official controls. The plan must
13.19 clearly distinguish between the responsibilities of the organization and the affected
13.20 local government units relative to controls established according to this subpart. The
13.21 enforcement process for violations of controls of the organization must be defined.
13.22 Controls must take effect within two years of plan adoption by the organization. The plan
13.23 must include an assessment of existing controls within the organization's jurisdiction and
13.24 address any deficiencies or redundancies related to attaining the goals defined under part
13.25 8410.0080. If a plan notes the existence of certain land uses that could adversely affect the
13.26 organization's ability to achieve the goals defined under part 8410.0080, the organization

14.1 must provide written notification to that unit of government specifying the issue. The
14.2 following items must be considered in developing a regulatory program:

14.3 A. standards or controls that may be more restrictive than those required by the
14.4 Wetland Conservation Act determined to be necessary to achieve the goals defined under
14.5 part 8410.0080. Local wetland management controls must include maps or inventories of
14.6 wetlands, existing comprehensive wetland protection and management plans, descriptions
14.7 of existing local wetland banking programs, and procedures used in determining
14.8 replacement of wetland functions and values for evaluating wetland replacement proposals;

14.9 B. standards or controls for managing storm water runoff must, at a minimum,
14.10 address:

14.11 (1) erosion and sediment transport to receiving waters;

14.12 (2) nutrient loading and concentration; and

14.13 (3) maximum permissible runoff rates and volumes;

14.14 C. standards or controls to address flood impacts; and

14.15 D. management programs establishing a classification system for the
14.16 management of water bodies must be consistent with chapter 7050. If the organization
14.17 classifications are inconsistent, the organization must petition the Pollution Control
14.18 Agency to revise the classifications in chapter 7050.

14.19 Subp. 7. **Incentive programs.** The plan must define, for cost share or grant
14.20 programs, if any, the general purpose, scope, time period, amount of funds, funding
14.21 source, general eligibility criteria for ~~dispensing~~ disbursing funds, and a clear link to
14.22 the goals the program addresses.

14.23 Subp. 8. **Waters restoration and protection program.**

15.1 A. A plan may implement a restoration and protection program for waters that
15.2 are impaired or need to be protected. The program may involve monitoring, assessment,
15.3 and water quality restoration and protection actions.

15.4 B. An organization may take the lead on developing a total maximum daily load
15.5 (TMDL) or a TMDL implementation plan as a third party under Minnesota Statutes, section
15.6 114D.25, subdivision 5. The TMDL or TMDL implementation plan must be developed in
15.7 coordination with, and provided to, the Pollution Control Agency for review and approval.

15.8 C. An organization may take the lead on developing a watershed restoration and
15.9 protection strategy as described in Minnesota Statutes, section 114D.15, by entering into
15.10 an agreement with the Pollution Control Agency.

15.11 D. An organization may submit a request as a third party for a Category 4b
15.12 determination to the Pollution Control Agency as allowed under the federal Clean Water
15.13 Act, section 303(d).

15.14 E. An organization may possess other authorities in addition to those listed in
15.15 items A to D.

15.16 ~~Subp. 9. **Trading programs.** An organization may establish and implement an~~
15.17 ~~environmental trading program that allows for water-related impacts to be offset at~~
15.18 ~~different locations than the site of impact.~~

15.19 Subp. ~~10~~ 9. **Local water plans.**

15.20 A. An organization plan must specify to what degree the organization plan may
15.21 be adopted by reference by a local government unit for all or part of its local water plan.
15.22 Upon request of a local government unit, an organization must provide a list to the local
15.23 government unit and the plan review agencies of local water plan revisions necessary for
15.24 compliance with the organization plan. A local water plan may serve as a storm water
15.25 pollution prevention program if it is approved by the Pollution Control Agency and it

16.1 complies with the requirements of any applicable national pollutant discharge elimination
16.2 system/state disposal system storm water permit.

16.3 B. A plan must include a schedule for implementation of local water plans
16.4 that requires all local water plans to be adopted not ~~less than one year~~ but no more than
16.5 two years before the local comprehensive plan is due. A plan must not deviate from the
16.6 schedule. Extensions of local comprehensive plan due dates do not alter the schedule.
16.7 Organizations may extend all or portions of local water plans to align with the local
16.8 comprehensive plan schedule during the initial three years of transition to the ~~revised~~
16.9 amended rule. Notwithstanding local water plan schedules in previously approved plans,
16.10 all local water plans must be adopted according to this subpart after December 31, 2016.

16.11 **8410.0140 PLAN AMENDMENTS.**

16.12 Subpart 1. **Amendment section.**

16.13 A. Each plan must contain a section entitled "Amendments to Plan" containing
16.14 the year the plan extends to and establishing the process by which amendments, as defined

26.2 organization's performance, financial, and activity information resulted in any corrective
26.3 actions or areas of concern;

26.4 G. whether the organization sufficiently implemented the actions in its previous
26.5 plan and made progress on attaining the goals in its previous plan;

26.6 H. whether the organization maintains a Web site that complies with part
