

1.1 **Environmental Quality Board**

1.2 **Proposed Permanent Rules Relating to Environmental Review**

1.3 **4410.4300 MANDATORY EAW CATEGORIES.**

1.4 [For text of subps 1 to 14, see M.R.]

1.5 Subp. 15. **Air pollution.** Items A and B designate the RGU for the type of project
1.6 listed.

1.7 A. For construction of a stationary source facility that generates 250 tons or
1.8 more per year or modification of a stationary source facility that increases generation
1.9 by 250 tons or more per year of any single air pollutant, other than those air pollutants
1.10 described in item B, after installation of air pollution control equipment, the PCA shall be
1.11 the RGU.

1.12 B. For construction of a stationary source facility that generates a combined
1.13 100,000 tons or more per year or modification of a stationary source facility that increases
1.14 generation by a combined 100,000 tons or more per year of greenhouse gas emissions, after
1.15 installation of air pollution control equipment, expressed as carbon dioxide equivalents,
1.16 the PCA shall be the RGU. For purposes of this subpart, "greenhouse gases" include
1.17 carbon dioxide, methane, nitrous oxide, hydrofluorocarbons (HFCs), perfluorocarbons
1.18 (PFCs), and sulfur hexafluoride, and their combined carbon dioxide equivalents shall be
1.19 computed by multiplying the mass amount of emissions for each of the six greenhouse
1.20 gases in the pollutant GHGs by the gas's associated global warming potential published in
1.21 the Federal Register, volume 74, pages 56395 and 56396, as amended, to be codified as
1.22 Table A-1 to subpart A of Code of Federal Regulations, title 40, part 98, Global Warming
1.23 Potentials, as amended, and summing the resultant value for each.

1.24 [For text of subps 16 to 37, see M.R.]
