

1.1 **Department of Natural Resources**

1.2 **Proposed Permanent Rules Relating to Falconry**

1.3 **6238.1200 DEFINITIONS.**

1.4 Subpart 1. **Scope.** The terms used in this chapter have the meanings given them in  
1.5 this part.

1.6 Subp. 2. **Abatement.** "Abatement" means using raptors to remove animals from  
1.7 undesirable locations through disturbance or capture.

1.8 Subp. 3. **Abatement permit.** "Abatement permit" means a permit issued under part  
1.9 6238.1250, subpart 6, for residents to conduct abatement activities using raptors.

1.10 Subp. 4. **Bred in captivity or captive-bred.** "Bred in captivity" or "captive-bred"  
1.11 means raptors, including eggs, hatched or produced in captivity from parents that mated or  
1.12 otherwise transferred gametes in captivity or were artificially inseminated.

1.13 Subp. 5. **Commissioner.** "Commissioner" means the commissioner of natural  
1.14 resources.

1.15 Subp. 6. **Eyases.** "Eyases" means young raptors not yet capable of sustained flight.

1.16 Subp. 7. **Falconry or practice of falconry.** "Falconry" or "practice of falconry"  
1.17 means training raptors for pursuit of wild game and hunting wild game with raptors.  
1.18 Falconry includes taking raptors from the wild to use in the sport and caring for, training,  
1.19 and transporting raptors held for falconry.

1.20 Subp. 8. **Falconry permit.** "Falconry permit" means a permit issued under part  
1.21 6238.1250, subpart 2, for residents and for nonresidents who practice falconry in  
1.22 Minnesota for more than 120 days within a given year to take, possess, transport, transfer,  
1.23 use, sell, purchase, or barter raptors or offer to sell, purchase, or barter raptors.

1.24 Subp. 9. **Federal regulations.** "Federal regulations" means Code of Federal  
1.25 Regulations, title 50, sections 21.29 and 21.30.

2.1 Subp. 10. **Hacking.** "Hacking" means the temporary release of a falconry raptor or a  
2.2 raptor produced under a propagation permit to the wild so that it must survive on its own.

2.3 Subp. 11. **Hybrid.** "Hybrid" means offspring of birds listed as two or more distinct  
2.4 species or subspecies.

2.5 Subp. 12. **Imprinted raptor.** "Imprinted raptor" means a raptor that is hand-raised  
2.6 from two weeks of age until it has fledged and that has identified itself with humans rather  
2.7 than its own species. An imprinted raptor is considered to be so for its entire lifetime.

2.8 Subp. 13. **Nonresident take permit.** "Nonresident take permit" means a permit issued  
2.9 under part 6238.1250, subpart 4, for residents of the United States who are not Minnesota  
2.10 residents to take and possess wild Minnesota raptors while in Minnesota and to transport  
2.11 or receive wild Minnesota raptors directly from the state of Minnesota.

2.12 Subp. 14. **Passage raptor.** "Passage raptor" means a fledged juvenile raptor less  
2.13 than one year old that is capable of flight.

2.14 Subp. 15. **Propagation permit.** "Propagation permit" means a permit issued under  
2.15 part 6238.1250, subpart 5, for residents to breed and raise raptors; capture raptors from the  
2.16 wild; and possess, transport, import, purchase, barter, or offer to sell, purchase, or barter  
2.17 any raptor, raptor egg, or raptor semen for propagation purposes.

2.18 Subp. 16. **Raptor.** "Raptor" means a bird of the family Falconidae, the great horned  
2.19 owl (*Bubo virginianus*), or a bird of the family Accipitridae, other than the bald eagle  
2.20 (*Haliaeetus leucocephalus*).

2.21 Subp. 17. **Raptors not native to Minnesota.** "Raptors not native to Minnesota"  
2.22 means any raptor species that does not naturally spend some portion of its life cycle,  
2.23 including migration, breeding, or wintering, in Minnesota.

2.24 Subp. 18. **Season.** "Season" in falconry means from May 1 to April 30 of the next  
year.

3.1 Subp. 19. **Season of experience.** "Season of experience" means the experience gained  
3.2 by a falconer who has one or more raptors in the falconer's possession for a minimum of  
3.3 six calendar months within a season. Half months are counted from the first day of the  
3.4 month to the 15th day of the month or from the 16th day of the month to the last day of the  
3.5 month. Periods less than half months are not included in the total.

3.6 Subp. 20. **Take.** "Take" means to trap, capture, or attempt to trap or capture wild  
3.7 raptors, raptor eggs, or raptor semen for falconry or propagation purposes.

3.8 Subp. 21. **Wild Minnesota raptor.** "Wild Minnesota raptor" means a wild raptor that  
3.9 was removed from the wild within the state of Minnesota.

3.10 Subp. 22. **Wild raptor.** "Wild raptor" means a raptor or raptor egg removed from the  
3.11 wild for falconry or propagation. A wild raptor remains a wild raptor regardless of how  
3.12 long the bird is held in captivity or whether the bird is transferred to another permittee or  
3.13 permit type; however, the wild raptor is considered to be taken from the wild only by the  
3.14 person who originally captured the raptor. The wild raptor is not considered to be taken  
3.15 from the wild by any subsequent permittee to whom the raptor is legally transferred.

3.16 **6238.1250 PERMIT REQUIREMENTS.**

3.17 Subpart 1. **State and federal regulations.** All persons conducting activities under  
3.18 subparts 2 to 6 must comply with all applicable provisions of this chapter and federal  
3.19 regulations. Permits issued under this part shall include:

3.20 A. **conditions that specify measures to prevent adverse impacts to wild**  
populations;

3.21 B. **restrictions for compliance with other game and fish laws; and**

3.22 C. **other restrictions the commissioner deems necessary for public health and**  
3.23 safety and for the welfare of raptors described in this chapter.

3.24 Subp. 2. Resident falconry permit requirements. All Minnesota residents who  
3.25 practice falconry within the state must obtain a Minnesota falconry permit from the  
4.1 commissioner. A person must not take, possess, transport, transfer, use, sell, purchase, or  
4.2 barter raptors or offer to sell, purchase, or barter raptors or their eggs without a falconry  
4.3 permit issued under this subpart, except as provided under subparts 3 to 5 and Minnesota  
4.4 Statutes, section 97A.401.

4.5 Subp. 3. Nonresident falconry permit requirements.

4.6 A. This subpart applies to a resident of the United States who is not a Minnesota  
4.7 resident and who has in possession a valid permit or other written documentation that  
4.8 authorizes the person to practice falconry in the state, tribe, or territory of the person's  
4.9 residence.

4.10 B. A nonresident described under item A who moves to Minnesota or who  
4.11 practices falconry in Minnesota for 120 days or more within a given year must obtain  
4.12 a Minnesota falconry permit. The nonresident must submit a copy of the permit or  
4.13 documentation that authorizes the person to practice falconry in the state, tribe, or territory  
4.14 of the person's residence and apply for a Minnesota falconry permit under part 6238.1300,  
4.15 except that the nonresident need only comply with part 6238.1300, subpart 1, items C and  
4.16 D. If approved, the Minnesota permit shall be for the same or an equivalent permit class  
4.17 listed on the falconry permit of the state, tribe, or territory of the person's residence.

4.18 C. A nonresident described under item A may transport, possess, and use raptors  
4.19 for falconry purposes without obtaining a Minnesota falconry permit, provided such  
4.20 activities do not exceed 120 days within a given year.

4.21 D. While in this state, nonresidents conducting activities under this subpart must  
4.22 comply with all applicable provisions of this chapter.

4.23 E. A nonresident described under item  
A may acquire, transfer, and sell propagated

4.24 raptors or their eggs or transfer wild raptors that are not wild Minnesota raptors from or to  
4.25 a person with a falconry or propagation permit issued under this part.

5.1 F. For all raptors acquired under this  
subpart, a nonresident must submit the report  
5.2 required under part 6238.1650, subpart 1, to the commissioner, in addition to any required  
5.3 reporting to the person's state of residence.

5.4 Subp. 4. **Nonresident take permit requirements.** A nonresident described in  
5.5 subpart 3, item A, must obtain a nonresident take permit, issued by the commissioner, to  
5.6 take and possess wild Minnesota raptors while in Minnesota and to transport or receive  
5.7 wild Minnesota raptors directly from the state of Minnesota, except that a nonresident  
5.8 described in subpart 3, item B, who has obtained a Minnesota falconry permit does not  
5.9 need a nonresident take permit unless the nonresident is removing a wild Minnesota raptor  
5.10 from the state of Minnesota. Nonresident take permits are valid for up to one year and  
5.11 do not need to be renewed to maintain possession of a wild Minnesota raptor previously  
5.12 transported outside of Minnesota under a valid nonresident take permit. The nonresident  
5.13 take permittee must submit a summary of the activities conducted under the permit to the  
5.14 commissioner by January 31 of the following year. Nonresident take permittees must  
5.15 follow all other applicable provisions under subpart 3.

5.16 Subp. 5. **Propagation permit requirements.** A person must obtain a propagation  
5.17 permit, issued by the commissioner, to breed or raise raptors; capture raptors from the  
5.18 wild for propagation purposes; or possess, transport, import, purchase, barter, or offer to  
5.19 sell, purchase, or barter any raptor, raptor egg, or raptor semen for propagation purposes.

5.20 Subp. 6. **Abatement permit requirements.** A person must obtain an abatement  
5.21 permit, issued by the commissioner, to use raptors to remove animals from undesirable  
5.22 locations through disturbance or capture or to remove animals under a state or federal  
5.23 depredation permit through disturbance or capture. Other permits or licenses may be

5.24 required under game and fish laws for the capture or taking of animals. An abatement  
5.25 permit may contain specifications on raptors authorized for use in abatement activities;  
5.26 qualifications, requirements, and restrictions for subpermittees; requirements on raptor  
6.1 transfers between abatement permittees and their subpermittees; and other requirements  
6.2 necessary to administer abatement permits, the raptors used for abatement, and abatement  
6.3 jobs performed. Minnesota falconers do not need an abatement permit to disturb or  
6.4 capture game species during the game season, provided no payment is received for the  
6.5 activity and they have the appropriate game permit, license, or stamp for the game to be  
6.6 taken or disturbed.

6.7 **6238.1300 PERMIT QUALIFICATIONS.**

6.8 Subpart 1. **Permit application.** A form, provided by the commissioner, must be  
6.9 submitted to obtain the following permits and renewal of the following permits: falconry,  
6.10 nonresident take, propagation, abatement, and eagle. The commissioner shall specify  
6.11 the information or supporting documentation required on the application, including  
6.12 information or documentation required by federal regulations. In addition to other  
6.13 requested documentation, the documentation under items A to D must be submitted for  
6.14 falconry permits and the documentation under items C and D must be submitted for  
6.15 propagation and abatement permits:

6.16 A. documentation of a passing score of at least 80 percent on a supervised  
6.17 examination provided by the commissioner. A person who fails to score at least 80 percent  
6.18 on the examination must wait a minimum of two weeks before retaking the examination;

6.19 B. a sponsorship acceptance letter from  
a sponsor for an individual who is applying  
6.20 for a falconry permit at the junior apprentice or apprentice level, who is a new resident of the  
6.21 United States, or who has had a falconry permit revoked and is eligible for reinstatement;

6.22 C. documentation of inspection and approval of the applicant's raptor equipment  
6.23 and housing facilities, including indoor mews and outdoor weathering area, by an agent  
6.24 of the commissioner to ensure compliance with standards under federal regulations.  
6.25 This item also applies to permit renewal and upgrade. Other documentation, such as  
7.1 photographs and schematics, must be submitted when multiple raptors will be housed  
7.2 in the permittee's facilities; and

7.3 D. a form provided by the commissioner and signed by the applicant stating that  
7.4 the falconer or propagator has read and understands all applicable state and federal  
7.5 regulations; will maintain the facilities and equipment according to federal regulations for  
7.6 the duration of the permit; and will allow inspection of the facilities, equipment, raptors,  
7.7 and supporting documentation according to federal regulations.

7.8 Subp. 2. **Propagation permits.** To obtain a propagation permit, in addition to the  
7.9 requirements in subpart 1, a person must:

7.10 A. be the holder of a valid master falconry permit in good standing under part  
7.11 6238.1350, item D; or

7.12 B. demonstrate through written or other documentation at least two years'  
7.13 experience propagating raptors and:

7.14 (1) have a valid general falconry  
permit in good standing under part 6238.1350,  
7.15 item C, with 24 months' experience with a raptor at the general level; or

7.16 (2) be conducting research on raptors for an educational or governmental  
7.17 institution and submit a research proposal.

7.18 Subp. 3. **Eagle permits.** A master falconer in good standing may apply to possess up  
7.19 to three eagles, which count as part of the falconer's raptor possession limit. To obtain

7.20 an eagle permit, falconers must submit the supporting documentation required by federal  
7.21 regulations. Falconers may not possess bald eagles under a permit issued under this subpart.

7.22 Subp. 4. **Abatement permits.** To obtain an abatement permit, a person must be the  
7.23 holder of a valid master falconry permit in good standing under part 6238.1350, item D, in  
7.24 addition to the requirements in subpart 1. Holders of a valid master falconry permit in  
7.25 good standing under part 6238.1350, item D, or a valid general falconry permit in good  
8.1 standing under part 6238.1350, item C, may conduct abatement activities as subpermittees  
8.2 of a holder of an abatement permit.

8.3 **6238.1350 PERMIT CLASSES; REQUIREMENTS.**

8.4 Specifications for permit classes are contained in items A to F. Permittees under all  
8.5 permit classes are only allowed to take or possess raptors defined under part 6238.1200,  
8.6 subpart 16, unless further restricted in this part and in federal regulations.

8.7 A. A junior apprentice falconry permittee:

8.8 (1) must be at least 12 years old and less than 16 years old;

8.9 (2) must have a parent or legal guardian sign the application. The parent or  
8.10 guardian must agree to take legal responsibility for the activities of the permittee;

8.11 (3) must have a sponsor who is the  
8.12 holder of a valid master falconry permit or who  
8.13 is the holder of a valid general falconry permit and has two seasons of experience or 24  
8.14 total months of experience with the sponsor's own raptors at the general level. A sponsor  
8.15 must not have more than three apprentices at any one time. A permittee must notify the  
8.16 commissioner within ten days if there is a change in sponsorship;

8.17 (4) must not possess more than one  
raptor and must not obtain more than two wild  
raptors for replacement during any season;

8.18                   (5) must house the raptor at the  
8.19                   legal residence of an adult, preferably a parent  
8.20                   or legal guardian, who is in possession of a valid falconry permit or at the permitted  
8.21                   location of the adult's raptors. If the adult falconry permittee is an apprentice, only one  
8.22                   raptor is allowed under either the junior apprentice falconry permit or the adult's permit  
8.22                   unless the raptor is housed with the sponsor;

8.23                   (6) may take and possess only red-tailed hawk (*Buteo jamaicensis*); and

8.24                   (7) must not possess an imprinted  
8.25                   raptor or a raptor that was taken from the wild  
8.25                   as a nestling.

9.1                   B. An apprentice falconry permittee:

9.2                   (1) must be at least 16 years old;

9.3                   (2) must have a parent or legal guardian sign the application if the permittee  
9.4                   is under 18 years old, in which case the parent or guardian must agree to take legal  
9.5                   responsibility for the activities of the permittee;

9.6                   (3) must have a sponsor, regardless  
9.7                   of the age of the permittee. A permittee must  
9.8                   notify the commissioner within ten days if there is a change in sponsorship. A sponsor  
9.9                   must be the holder of a valid master falconry permit or the holder of a valid general  
9.10                   falconry permit who has two seasons of experience or 24 total months of experience with  
9.11                   the sponsor's own raptors at the general level. A sponsor may have no more than three  
9.12                   apprentices at any one time. All new residents of the United States age 16 or older must be  
9.13                   initially permitted at the apprentice level. After a minimum of four months of practicing  
9.14                   falconry with their own raptors, new residents of the United States with falconry records  
9.15                   from their country of origin and their sponsor's approval may apply for a general or  
9.15                   master falconry permit;

9.16                   (4) must not possess more than one  
9.17                   raptor and must not obtain more than two wild  
                          raptors for replacement during any season;

9.18                   (5) may take and possess only  
                          passage red-tailed hawk (*Buteo jamaicensis*), except  
9.19                   that, with approval from the permittee's sponsor, an apprentice permittee with a minimum  
9.20                   of two seasons of experience may take and possess any raptor allowed for an apprentice  
9.21                   class falconer under federal regulations and under part 6238.1200, subpart 16; and

9.22                   (6) must not possess an imprinted  
                          raptor or a raptor that was taken from the wild  
9.23                   as a nestling.

9.24                   C. A general falconry permittee:

9.25                   (1) must be at least 18 years old;

10.1                   (2) must submit documentation from the permittee's junior apprentice or  
10.2                   apprentice sponsor stating that the permittee has practiced falconry under the sponsor's  
10.3                   supervision as a junior apprentice or apprentice falconer for at least two seasons of  
10.4                   experience with the permittee's own raptors and the permittee's training included  
10.5                   capturing, maintaining, training, flying, hunting, and releasing raptors;

10.6                   (3) must not possess more than  
                          two raptors and must not obtain more than two  
10.7                   wild raptors for replacement during any season;

10.8                   (4) may take and possess any  
                          raptor, except the permittee must not possess, take,  
10.9                   or transport a bald eagle, white-tailed eagle (*Haliaeetus albicilla*), Steller's sea-eagle

10.10 (Haliaeetus pelagicus), or golden eagle (Aquila chrysaetos) or any species listed as  
10.11 threatened or endangered under state or federal regulations; and

10.12 (5) may possess captive-bred raptors and hybrids.

10.13 D. A master falconry permittee:

10.14 (1) must have at least five seasons

of experience with the permittee's own raptors

10.15 as a general falconer;

10.16 (2) must not possess more than five raptors except as authorized under an

10.17 abatement permit under part 6238.1250, subpart 6;

10.18 (3) must not possess more than three wild raptors at any time;

10.19 (4) must not obtain more than two wild raptors during any season;

10.20 (5) must not take any species listed

as endangered in state or federal regulations,

10.21 but may transport or possess endangered species according to applicable rules;

10.22 (6) must not take, transport, or possess a golden eagle, white-tailed eagle, or

10.23 Steller's sea-eagle for falconry purposes, unless authorized in writing according to

10.24 appropriate federal regulations and approved by the commissioner; and

11.1 (7) must not take in any 12-month period, as a part of the three wild raptor

11.2 limitation, more than one raptor listed as threatened in state or federal regulations, and

11.3 then only according to applicable state and federal regulations.

11.4 E. A propagation permittee:

11.5 (1) must meet the minimum qualifications under part 6238.1300, subpart 2,

11.6 and must comply with all applicable provisions in this chapter and associated federal

11.7 regulations under Code of Federal Regulations, title 50, sections 21.29 and 21.30;

11.8                   (2) must not possess more than six raptors under the propagation permit as a  
11.9 standard propagator unless:

11.10                   (a) the propagation is conducted  
for a specialized purpose such as education,  
11.11 business, reintroduction, research, abatement, or another similar activity authorized by the  
11.12 commissioner; and

11.13                   (b) the propagator has submitted  
a proposal or business plan that outlines the  
11.14 number and type of raptors to be propagated, facility schematics, number of assistants that  
11.15 are necessary to care for the raptors, documentation necessary to determine compliance  
11.16 with state law pertaining to the operation of large animal facilities, and other information  
11.17 the commissioner deems necessary for public health and safety and for the welfare of  
11.18 the raptors;

11.19                   (3) must transfer propagated young  
to another permit type or permittee within one  
11.20 year of hatch unless the propagated young will be included under the six raptor limit for  
11.21 standard propagators or included under the limit specified in the permit of a specialized  
11.22 propagation program issued under subitem (2), units (a) and (b). If the propagated  
11.23 raptors are to be released to the wild, the propagator must comply with part 6238.1500  
11.24 and federal regulations;

12.1                   (4) must have adequate raptor propagation facilities maintained according to  
12.2 federal regulations for the number and species of raptors to be held under the permit;

12.3                   (5) must not take more than two  
passage raptors from the wild per year under the  
12.4 permit, which also counts against the take limit under a general or a master falconry  
12.5 permit held by the propagation permittee;

12.6                   (6) must not possess more than six wild raptors total, including the number of  
12.7 wild raptors possessed under a general or master falconry permit held by the propagation  
12.8 permittee; and

12.9                   (7) must submit a completed  
propagation form provided by the commissioner by  
12.10 January 31 of each year for January 1 through December 31 of the preceding year.

12.11               F. An abatement permittee:

12.12                   (1) must meet the minimum  
qualifications under part 6238.1300, subpart 4, and  
12.13 must comply with all applicable provisions in this chapter, associated federal regulations  
12.14 under Code of Federal Regulations, title 50, section 21.29, and federal abatement  
12.15 regulations and requirements;

12.16                   (2) may have subpermittees under the permittee's abatement permit. A  
12.17 subpermittee must be a Minnesota falconer with a valid general or master falconry permit;

12.18                   (3) is responsible for the conduct of subpermittees on the permit while the  
12.19 subpermittees conduct abatement activities;

12.20                   (4) must not use wild raptors in abatement activities;

12.21                   (5) must not use golden eagles in abatement activities;

12.22                   (6) must carry a copy of the abatement permit while conducting abatement  
12.23 activities. A subpermittee must carry a copy of the abatement permit that the subpermittee  
12.24 is working under while conducting abatement activities;

13.1                   (7) may possess additional propagated raptors under a falconry permit for  
13.2 abatement use, provided the permittee submits a proposal or business plan that outlines  
13.3 the number and type of raptors, facility schematics, number of assistants that are necessary  
13.4 to care for the raptors, documentation necessary to determine compliance with state

13.5 law pertaining to the operation of large animal facilities, and other information the  
13.6 commissioner deems necessary for public health and safety and for the welfare of the  
13.7 raptors; and

13.8 (8) must submit a completed  
abatement form provided by the commissioner by  
13.9 January 31 of each year for January 1 to December 31 of the preceding year.

13.10 **6238.1400 RESTRICTIONS ON TAKING RAPTORS.**

13.11 **Subpart 1. Raptors taken in Minnesota.**

13.12 A. A permittee taking raptors from  
the wild in this state must comply with this part  
13.13 and applicable federal regulations.

13.14 B. The commissioner may include conditions in a permit to prevent depletion of  
13.15 wild raptor populations. These conditions include:

13.16 (1) limits on the number of raptors that may be taken;

13.17 (2) restrictions on species of raptors that may be taken;

13.18 (3) limits on the geographical area where raptors may be taken;

13.19 (4) restrictions on when raptors may be taken; and

13.20 (5) other similar conditions that  
the commissioner deems necessary to prevent  
13.21 depletion of wild raptor populations.

13.22 C. A trap used to capture raptors must be attended at all times, except a trap that  
13.23 entirely encapsulates the raptor within a protective cage must be checked at least once  
13.24 every 24 hours.

14.1 D. If a raptor is injured while a permittee is attempting to take the raptor, the  
14.2 permittee must report the injury to the commissioner, whether the raptor is kept or given  
14.3 directly to a veterinarian, a permitted wildlife rehabilitator, or an appropriate wildlife  
14.4 agency employee as provided under federal regulations.

14.5 E. Permits under this chapter do not authorize trespass. A permittee must  
14.6 not take raptors within state parks, state scientific and natural areas, state wildlife  
14.7 management areas, or state game refuges unless specifically authorized in a permit from  
14.8 the commissioner. A permittee must not take raptors from private property without  
14.9 permission from the property owner.

14.10 F. Taking a raptor from the wild, as well as any subsequent transfer of the  
14.11 wild raptor, must be reported according to federal regulations, with the reporting form  
14.12 submitted to the commissioner according to part 6238.1650, subpart 1, within ten days  
14.13 of the taking or transfer.

14.14 G. Wild raptors must not be purchased, sold, traded, or bartered, but may only be  
14.15 transferred or released. As provided under federal regulations, a raptor may be transferred  
14.16 to another permit type if the recipient of the raptor, which could be the possessor, has the  
14.17 necessary permit for the other activity. Both the transferor and transferee must report  
14.18 the transfer to the commissioner within ten days by submitting a reporting form under  
14.19 part 6238.1650, subpart 1, and each must also submit any documentation required under  
14.20 federal regulations, such as veterinarian or rehabilitator certification, at that time.

14.21 **Subp. 2. Raptor take time periods.**

14.22 A. Eyases may be taken from the wild from May 27 through July 31 only. A  
14.23 person must be a general or master falconer or have the equivalent classification in the  
14.24 person's state, tribe, or territory of residence to take eyases from the wild. A permittee  
14.25 must not take more than two eyases during a calendar year. At least one eyas must be left  
14.26 in a nest from which other eyases are taken.

15.1 B. Passage raptors may be taken from the wild from August 21 through February  
15.2 28 only.

15.3 C. A permittee under this chapter must not take raptors over one year old from  
15.4 the wild, except for:

15.5 (1) American kestrels and great horned owls; and

15.6 (2) any raptor, other than state or federally listed endangered or threatened  
15.7 species, taken under a depredation or special purpose permit under Minnesota Statutes,  
15.8 section 97A.401, and used for falconry by general or master falconers.

15.9 **6238.1450 RESTRICTIONS ON IMPORTING RAPTORS INTO MINNESOTA.**

15.10 Subpart 1. **Importing hybrid raptors and raptors not native to Minnesota.** A  
15.11 permittee who plans to obtain a hybrid raptor or raptor not native to Minnesota from outside  
15.12 the state must notify the commissioner ten days before importing the raptor and must  
15.13 submit a reporting form under part 6238.1650, subpart 1, to the commissioner within ten  
15.14 days of obtaining the raptor. A permittee must obtain the required Board of Animal Health  
15.15 certification from a veterinarian and submit a copy to the commissioner before importation.

15.16 Subp. 2. **Importing raptors native to Minnesota.** A permittee who obtains a  
15.17 raptor that is native to Minnesota while outside the state must submit a reporting form  
15.18 under part 6238.1650, subpart 1, to the commissioner within ten days of obtaining the  
15.19 raptor. A permittee must obtain the required Board of Animal Health certification from a  
15.20 veterinarian and submit a copy to the commissioner before importation.

15.21 **6238.1500 FLYING AND INTENTIONAL RELEASE OF RAPTORS.**

15.22 Subpart 1. **Flying raptors.** Permits under this chapter do not authorize trespass. All  
15.23 applicable state and federal trespass regulations must be followed. Further restrictions  
15.24 on the practice of hunting by falconry are provided under part 6234.0800 and in federal

16.1 regulations. All applicable state and federal game and fish laws, licenses, permits, and  
16.2 stamps apply for taking game.

16.3 Subp. 2. **Flying hybrid raptors or raptors not native to Minnesota.** When flown  
16.4 free, a hybrid raptor or a raptor that is not native to Minnesota must have at least two  
16.5 functioning radio transmitters attached to assist in locating the raptor. A raptor listed as an  
16.6 unregulated species under part 6216.0270 is exempt from this subpart. A raptor designated  
16.7 as appropriate for introduction according to the process under part 6216.0290 for the  
16.8 review of proposed introductions of unlisted nonnative species is exempt from this subpart.

16.9 Subp. 3. **Intentional release of raptors.** A person must not permanently release a  
16.10 hybrid raptor into the wild. A person must not permanently release a raptor that is not  
16.11 native to Minnesota into the wild. A person releasing a raptor into the wild:

16.12 A. must obtain permission from the commissioner to release a captive-bred raptor  
16.13 species that is native to Minnesota;

16.14 B. may hack the raptor and allow it to adjust to the wild, at an appropriate time of  
16.15 year and an appropriate location, according to federal regulations;

16.16 C. must make a reasonable determination that a raptor held in captivity for an  
16.17 extended period of time can capture and consume native prey prior to release into the wild;

16.18 D. must release the raptor only at an appropriate time of year and an appropriate  
16.19 location for the species to be released;

16.20 E. must remove falconry bands before release and surrender the bands to the  
16.21 commissioner, but propagation bands must be left in place; and

16.22 F. must report release of the raptor within ten days as provided under part  
16.23 6238.1650, subpart 1.

17.1 **6238.1550 TRANSPORTING, RELOCATING, AND HOLDING RAPTORS.**

17.2 Subpart 1. **State and federal regulations.** This part and applicable federal regulations  
17.3 apply when transporting, relocating, housing, and temporarily holding raptors in the state.

17.4 Subp. 2. **Carrying permit when trapping, transporting, working with, or flying**  
17.5 **raptor.** A person trapping, transporting, working with, or flying raptors must have the  
17.6 person's permits, or legible copies of the permits, in the person's immediate possession  
17.7 when not at the location of the person's permitted raptor facilities.

17.8 Subp. 3. **Permanent change of address.** A person with a falconry or propagation  
17.9 permit must report a permanent change in the location of permitted facilities to the  
17.10 commissioner within five days following the move. Until new facilities are inspected, the  
17.11 permittee must house raptors as described under subpart 7. Persons moving out of state  
17.12 must comply with required notifications under federal regulations.

17.13 Subp. 4. **Multiple facilities; part-year residents.** If a permittee houses permitted  
17.14 raptors in a location other than the permittee's primary facilities for more than 120  
17.15 consecutive days, the facilities at the other location must comply with federal regulations  
17.16 and be listed on the permit. A permittee who resides part of the year in another jurisdiction  
17.17 may be required to obtain a permit in the state, tribe, or territory where the permittee  
17.18 lives part time.

17.19 Subp. 5. **Location of facilities.** Falconry facilities may be on property not owned by  
17.20 the permittee if the permittee's primary residence is also located at that property. The  
17.21 falconry facilities may be on property owned by the permittee that is not the permittee's  
17.22 primary residence if the facilities are 30 miles or less from the permittee's primary  
17.23 residence or if the facilities are over 30 miles from the permittee's primary residence and  
17.24 used for 120 days or less annually. Regardless of location, the raptors must be maintained  
17.25 in a humane and healthy manner, and the facilities must comply with federal regulations.

18.1 Subp. 6. **Temporary care.** A permitted  
18.2 raptor, including a nestling, may be temporarily  
18.3 held by a person other than the permittee according to federal regulations. The permittee  
18.4 must inform the commissioner, in writing, within ten days of the transfer, specifying where  
18.5 the raptor is being held, the reason for the transfer, who is to care for the raptor, what that  
18.6 person is allowed to do with the raptor, and approximately how many days the raptor is  
18.7 expected to be in the care of the person. If the person caring for the raptor is a permitted  
18.8 falconer or propagator, the raptor must be reported as a loan or transfer with appropriate  
18.9 paperwork submitted within ten days as provided under part 6238.1650, subpart 1.

18.9 Subp. 7. **Temporary facilities.** A raptor may be transported or held in temporary  
18.10 facilities for a period not to exceed 30 days, unless written authorization to extend the  
18.11 period is obtained from the commissioner. The temporary facilities must provide a suitable  
18.12 perch and protection from predators, domestic animals, extreme temperatures, wind, and  
18.13 excessive disturbance. If the temporary facilities are to be used more than 120 calendar  
18.14 days, the falconry permittee must follow federal regulations for falconry facilities, have  
18.15 the facilities inspected, and request an updated permit with the change of address or the  
18.16 addition of the secondary housing location.

18.17 **6238.1600 BANDING OR TAGGING OF RAPTORS.**

18.18 A. All propagated and wild raptors for falconry or propagation purposes must be  
18.19 banded according to federal regulations, except that banding applies to all raptor species  
18.20 and hybrid raptors. In addition to bands, a permittee may use International Organization  
18.21 for Standardization (ISO)-compliant microchips (134.2 kHz), but microchips must not  
18.22 be used alone unless the permittee provides documentation of health issues or injury that  
18.23 prevents the use of the bands on the raptor according to federal regulations.

18.24 B. Captive-bred nestlings must be  
banded with a numbered, seamless metal United

18.25 States Fish and Wildlife Service band provided by the United States Fish and Wildlife  
18.26 Service or by the commissioner. The band is generally referred to as a propagation band.

19.1 C. Propagated raptors that have been  
transferred to another permit type or permittee  
19.2 or that have lost their propagation band and wild raptors must be banded with a permanent,  
19.3 nonreusable, numbered plastic United States Fish and Wildlife Service leg band supplied  
19.4 by the commissioner. The band is generally referred to as a falconry band.

19.5 D. Eagles must be banded with an eagle  
band provided by the United States Fish and  
19.6 Wildlife Service or by the commissioner. The band is generally referred to as an eagle band.

19.7 **6238.1650 REPORTING REQUIREMENTS.**

19.8 **Subpart 1. Required federal reporting; permittee's duties.**

19.9 A. A permittee must comply with  
reporting requirements under federal regulations  
19.10 and must submit a paper or digital copy of the federal reporting form to the commissioner  
19.11 within ten days of the date that:

19.12 (1) the permittee takes, purchases, receives, or otherwise acquires a raptor;

19.13 (2) the permittee sells, barter, or otherwise disposes of a raptor;

19.14 (3) the permittee transfers a raptor to another type of permit (their own or that  
19.15 of another permittee), except that falconers do not need to transfer a raptor from a falconry  
19.16 permit to the permittee's own propagation permit if the raptor is used in propagation  
19.17 for less than eight months in a given year;

19.18 (4) the permittee loans a raptor or has a raptor returned from a loan. A raptor  
19.19 may be loaned between falconers or propagators for up to 120 days, after which the raptor  
19.20 must be either returned to the permittee or transferred to the recipient's permit. During the

19.21 time of loan, the raptor counts toward the limit of the original holder. Upon transfer, the  
19.22 raptor counts toward the limit of the recipient;

19.23 (5) the permittee loses a raptor to the wild and does not recover the raptor  
19.24 within 30 days, except that hybrid raptors and raptors not native to Minnesota must also be  
19.25 reported within 48 hours according to the invasive species rules under part 6216.0280;

20.1 (6) a raptor dies while under a permit;

20.2 (7) a raptor is stolen from the permittee; or

20.3 (8) the permittee rebands or  
20.4 microchips a raptor, except that old band removal  
20.5 must be reported within five days. The reporting form must include the old band number  
20.6 and the new band or microchip number.

20.7 B. Under item A, subitems (2) to (4), a permittee must verify that any person  
20.8 receiving a raptor from the permittee has obtained all required permits necessary to  
20.9 receive the raptor.

20.10 C. A permittee must keep copies of all submissions listed under item A for a  
20.11 minimum of five years from the submission date.

20.12 Subp. 2. **Required possession reporting.**  
20.13 Annually or as requested according to federal  
20.14 regulations, holders of falconry and propagation permits must report to the commissioner:

20.15 A. for all raptors in possession at the time of the report, the species, band numbers,  
20.16 sex (if known), and age (if known); whether wild or propagated; the date acquired; and  
20.17 where and, if applicable, from whom acquired;

20.18 B. for all raptors possessed since the previously submitted report but no longer in  
20.19 possession at the time of the current report, the species, band numbers, sex (if known),  
20.20 and age (if known); the date acquired; where and, if applicable, from whom acquired; and

20.19 the date of disposition listing to whom given or whether the raptor escaped, died, or  
20.20 was released; and

20.21 C. all unused bands in possession.

20.22 **6238.1700 PERMIT DURATION, RENEWAL, AND TERMINATION.**

20.23 Subpart 1. **Duration of permits; nontransferable.** Falconry, propagation, and  
20.24 abatement permits are valid for three years or until September 30 of the third year  
21.1 following issuance, whichever comes first. Nonresident take permits are valid for one year  
21.2 or until December 31, whichever comes first. Permits are not transferable.

21.3 Subp. 2. **Permit renewal.** Falconry,  
abatement, and propagation permits are renewable.

21.4 A request for renewal must be made at least 30 days before the permit expiration date.

21.5 Subp. 3. **Transfer of raptors if permittee dies.** A surviving spouse, executor,  
21.6 administrator, or other legal representative of a deceased permittee may transfer or sell any  
21.7 propagated raptor or transfer any wild raptor held by the permittee to another permittee  
21.8 authorized to possess raptors within 90 days of the death of the permittee, provided the  
21.9 recipient is allowed to possess that species and the recipient's permit raptor quota is not  
21.10 exceeded. The commissioner shall make temporary exceptions in quota or species in order  
21.11 to place a raptor, if necessary. The transaction must be reported within ten days as provided  
21.12 under part 6238.1650, subpart 1. Wild Minnesota raptors must either be released according  
21.13 to part 6238.1500, subpart 3, or transferred to another falconer. After 90 days, disposition of  
21.14 a raptor held under the permit of a deceased person is at the discretion of the commissioner.

21.15 Subp. 4. **Permit revocation.** A permittee violating this chapter is subject to permit  
21.16 revocation, and all raptors held are subject to seizure and confiscation in the manner  
21.17 provided by law. If a permit issued under this chapter is revoked, all other permits that the  
21.18 permittee holds under this chapter shall be revoked at that time. For any activities under  
21.19 this chapter that also require federal permits, if the permittee's federal permit is revoked,

21.20 the associated state permit shall be revoked pending reinstatement of the federal permit.  
21.21 Permittees who have any incidence of raptor mortality or a high incidence of raptor loss  
21.22 are subject to additional review. Examples of review are additional inspections and  
21.23 required submission of veterinarian's or rehabilitator's notes or necropsies on the subject  
21.24 raptors. If evidence is provided to the commissioner that the permittee is neglecting the  
21.25 health, safety, or welfare of raptors in the permittee's possession, the permittee is subject  
21.26 to one or more of the following measures:

22.1 A. reduction in permit class;

22.2 B. required sponsorship; or

22.3 C. permit revocation.

22.4 **6238.1750 DISCLAIMER OF LIABILITY.**

22.5 A permit issued under this chapter is permissive only and no liability is incurred by  
22.6 the state or by any of its officers, agents, or employees by reason of issuing the permit  
22.7 or by reason of any acts or operations of the permittee or any wildlife. At all times, the  
22.8 state, its officers, agents, and employees are held harmless from any liability for damage  
22.9 or injury arising from issuing the permit.

22.10 **REPEALER.** Minnesota Rules, parts 6238.0100, subparts 1, 2, 3, 4, 4a, 5, 6a, 7, 7a, and  
22.11 8; 6238.0200, subparts 1, 1a, 1b, 2, 3, 4, 4a, 5, 6, and 7; 6238.0300; 6238.0400; 6238.0500;  
22.12 6238.0600; 6238.0700; 6238.0800; 6238.0900; 6238.1000; and 6238.1100, are repealed.
