Minnesota Rules: Amendments and Additions

NOTICE: How to Follow State Agency Rulemaking in the State Register

The State Register is the official source, and only complete listing, for all state agency rulemaking in its various stages. State agencies are required to publish notice of their rulemaking action in the State Register. Published every Monday, the State Register makes it easy to follow and participate in the important rulemaking process. Approximately 80 state agencies have the authority to issue rules. Each agency is assigned specific Minnesota Rule chapter numbers. Every odd-numbered year the Minnesota Rules are published. Supplements are published to update this set of rules. Generally speaking, proposed and adopted exempt rules do not appear in this set because of their short-term nature, but are published in the State Register.

An agency must first solicit Comments on Planned Rules or Comments on Planned Rule Amendments from the public on the subject matter of a possible rulemaking proposal under active consideration within the agency (Minnesota Statutes §§ 14.101). It does this by publishing a notice in the State Register at least 60 days before publication of a notice to adopt or a notice of hearing, or within 60 days of the effective date of any new statutory grant of required rulemaking.

When rules are first drafted, state agencies publish them as Proposed Rules, along with a notice of hearing, or a notice of intent to adopt rules without a hearing in the case of noncontroversial rules. This notice asks for comment on the rules as proposed. Proposed emergency rules, and withdrawn proposed rules, are also published in the State Register. After proposed rules have gone through the comment period, and have been rewritten into their final form, they again appear in the State Register as Adopted Rules. These final adopted rules are not printed in their entirety, but only the changes made since their publication as Proposed Rules. To see the full rule, as adopted and in effect, a person simply needs two issues of the State Register, the issue the rule appeared in as proposed, and later as adopted.

The State Register features partial and cumulative listings of rules in this section on the following schedule: issues #1-13 inclusive; issues #14-25 inclusive (issue #26 cumulative for issues #1-26); issues #27-38 inclusive (issue #39, cumulative for issues #1-39); issues #40-52 inclusive, with final index (#1-52, or 53 in some years). An annual subject matter index for rules was separately printed usually in August, but starting with Volume 19 now appears in the final issue of each volume. For copies or subscriptions to the State Register, contact Minnesota's Bookstore, 660 Olive Street (one block east of I-35E and one block north of University Ave), St. Paul, MN 55155, phone: (612) 297-3000, or toll-free 1-800-657-3757. Watershed Division

Notice of Availability and Request for Comment on the draft Sand Hill River Watershed Restoration and Protection Strategy Report and Total Maximum Daily Load Study

Public Comment Period Begins: May 31, 2016

Public Comment Period Ends: June 29, 2016

The Minnesota Pollution Control Agency (MPCA) is requesting comments on the draft Sand Hill River Watershed Restoration and Protection Strategy (WRAPS) Report and Total Maximum Daily Load (TMDL) Study. The draft WRAPS report and TMDL study are available for review at:

<https://www.pca.state.mn.us/water/watersheds/red-river-north-%E2%80%94-sand-hill-river>

Written comments on the draft WRAPS report and TMDL study must be sent to the MPCA contact person, listed below, by **June 29, 2016**. The comments should indicate as to whether they are about the WRAPS report or the TMDL study, and identify the specific TMDL(s). The MPCA will prepare responses to comments received and revise the document(s) as necessary. Subsequent to the revisions, the draft TMDL study will be submitted to the U.S. Environmental Protection Agency (EPA) for final approval; the WRAPS report will be forwarded to the MPCA Commissioner for final approval.

Required by the state Clean Water Legacy Act, a WRAPS report is a document summarizing scientific studies of a major watershed. The WRAPS report includes the physical, chemical, and biological assessment of the water quality in the watershed; identification of impairments and water bodies needing protection; and identification of biotic stressors and sources of point and nonpoint pollution. The science, analysis, and strategy development described in this WRAPS report began before accountability provisions were added to the Clean Water Legacy Act in 2013 (MS114D); thus, this WRAPS report does not address all of those provisions. When this watershed is revisited (according to the 10-year assessment cycle), the information will be updated according to the statutorily required elements of a WRAPS report. The TMDL study explains the watershed's impairments and includes an implementation table with strategies to achieve and maintain water quality standards and goals.

The Sand Hill River Watershed has a total of 15 impairment listings: four for *E. coli*, two for turbidity, four for excess nutrients, two for aquatic macroinvertebrate bioassessment, two for fish bioassessment, and one for dissolved oxygen. The TMDL study addresses ten of those impairments: four lakes impaired by excessive nutrients, two stream reaches impaired by TSS (formerly turbidity), and four stream reaches impaired by *E. coli*.

The Sand Hill River Watershed, located in northwest Minnesota, comprises over 486 square miles and includes portions of Polk, Norman, Mahnomen Counties. Flow direction in the Sand Hill River Watershed is generally east-to-west. Flow enters the Red River of the North and proceeds north to the U.S. – Canada border. Land use within the watershed is predominantly agricultural.

The Sand Hill River Watershed Restoration and Protection Strategy Report and TMDL Study are being developed through a collaboration of state agencies and local watershed stakeholders.
