Minnesota Rules: Amendments and Additions

NOTICE: How to Follow State Agency Rulemaking in the State Register

The *State Register* is the official source, and only complete listing, for all state agency rulemaking in its various stages. State agencies are required to publish notice of their rulemaking action in the *State Register*. Published every Monday, the *State Register* makes it easy to follow and participate in the important rulemaking process. Approximately 75 state agencies have the authority to issue rules. Each agency is assigned specific *Minnesota Rule* chapter numbers. Every odd-numbered year the *Minnesota Rules* are published. This is a ten-volume bound collection of all adopted rules in effect at the time. Supplements are published to update this set of rules. Proposed and adopted emergency rules do not appear in this set because of their short-term nature, but are published in the *State Register*.

If an agency seeks outside opinion before issuing new rules or rule amendments, it must publish a NOTICE OF INTENT TO SOLICIT OUTSIDE OPINION in the *Official Notices* section of the *State Register*. When rules are first drafted, state agencies publish them as **Proposed Rules**, along with a notice of hearing, or notice of intent to adopt rules without a hearing in the case of noncontroversial rules. This notice asks for comment on the rules as proposed. Proposed emergency rules and withdrawn proposed rules are also published in the *State Register*. After proposed rules have gone through the comment period, and have been rewritten into their final form, they again appear in the *State Register* as **Adopted Rules**. These final adopted rules are not printed in their entirety in the *State Register*, only the changes made since their publication as Proposed Rules. To see the full rule, as adopted and in effect, a person simply needs two issues of the *State Register*, the issue the rule appeared in as proposed, and later as adopted. For a more detailed description of the rulemaking process, see the *Minnesota Guidebook to State Agency Services*.

The *State Register* features partial and cumulative listings of rules in this section on the following schedule: issues 1-13 inclusive; issues 14-25 inclusive; issue 26, cumulative for issues 1-26; issues 27-38 inclusive; issue 39, cumulative for 1-39; issues 40-51 inclusive; and issue 52, cumulative for 1-52. An annual subject matter index for rules appears in August. For copies of the *State Register*, a subscription, the annual index, the *Minnesota Rules* or the *Minnesota Guidebook to State Agency Services*, contact the Print Communications Division, 117 University Avenue, St. Paul, MN 55155 (612) 297-3000 or toll-free in Minnesota 1-800-9747.

Proposed Rules

Pursuant to Minn. Stat. §§ 14.22, an agency may propose to adopt, amend, suspend or repeal rules without first holding a public hearing, as long as the agency determines that the rules will be noncontroversial in nature. The agency must first publish a notice of intent to adopt rules without a public hearing, together with the proposed rules, in the *State Register*. The notice must advise the public:

1. that they have 30 days in which to submit comment on the proposed rules;
2. that no public hearing will be held unless 25 or more persons make a written request for a hearing within the 30-day comment period;
3. of the manner in which persons shall request a hearing on the proposed rules; and
4. that the rule may be modified if the modifications are supported by the data and views submitted.

If, during the 30-day comment period, 25 or more persons submit to the agency a written request for a hearing of the proposed rules, the agency must proceed under the provisions of §§ 14.14-14.20, which state that if an agency decides to hold a public hearing, it must publish a notice of intent in the *State Register*.

Pursuant to Minn. Stat. §§ 14.29 and 14.30, agencies may propose emergency rules under certain circumstances. Proposed emergency rules are published in the *State Register* and, for at least 25 days thereafter, interested persons may submit data and views in writing to the proposing agency.

Department of Agriculture

Proposed Permanent Rules Relating to Waste Pesticide Collection

Notice of Intent to Adopt a Rule Without a Public Hearing

NOTICE IS HEREBY GIVEN that the Minnesota Department of Agriculture intends to adopt the above-entitled rule without a public hearing following the procedures set forth in the Administrative Procedures Act for adopting rules without a public hearing in *Minnesota Statutes*, sections 14.22-14.28. The statutory authority to adopt this rule is *Minnesota Statutes*, section 18B.065.

All persons have 30 days in which to submit comment in support of or in opposition to the proposed rule or any part or subpart of the rule. Comment is encouraged. Each comment should identify the portion of the proposed rule addressed, the reason for the comment, and any change proposed.

Any person may make a written request for a public hearing on the rule within the 30-day comment period. If 25 or more persons submit a written request for a public hearing within the 30-day comment period, a public hearing will be held unless a sufficient number withdraw their request in writing. Any person requesting a public hearing should state their name and address, and is encouraged to identify the portion of the proposed rule addressed, the reason for the request, and any proposed change. If a public hearing is required, the department will proceed according to *Minnesota Statutes*, sections 14.131-14.20.

Comments or written requests for a public hearing must be submitted to: Carol Milligan, Minnesota Department of Agriculture, 90 West Plato Boulevard, St. Paul, MN 55107, (612) 296-6906.

The proposed rule may be modified if the modifications are supported by the data and views submitted to the department and do not result in a substantial change in the proposed rule as noticed.

A copy of the proposed rule is attached to this notice.

A Statement of Need and Reasonableness that describes the need for and reasonableness of each provision of the proposed rule and identifies the data and information relied upon to support the proposed rule has been prepared and is available upon request from Ms. Milligan.

The proposed rule deals with a program entered into voluntarily by local units of government and therefore, has no significant impact on small businesses.

If no hearing is required, upon adoption of the final rule, the rule and the required supporting documents will be submitted to Attorney General for review as to legality and form to the extent the form relates to legality. Any person may request notification of the date of submission to the Attorney General. Persons who wish to be advised of the submission of this material to the Attorney General, or who wish to receive a copy of the adopted rule must submit a written request to Ms. Milligan.

Minnesota Regulated Loan Act—Adjustment of Dollar Amounts

Commissioner of Commerce Bert J. McKasy announced today that an additional 10% change will occur in certain dollar amounts indexed in the Regulated Loan Act (The Act), *Minnesota Statutes*, Chapter 56. The Act provides for periodic adjustment in dollar amounts that would be effective on July 1, in even-numbered years based on a percentage change in the Implicit Price Deflator for the Gross National Product.

Information obtained from the U.S. Department of Commerce, Bureau of Economic Analysis indicates a percentage change from the revised reference base to be 58% calculated to the nearest whole percentage point as required. The index was revised nationally to 1987 = 100, with the statutory reference based index for dollar adjustments being December 1980. The rebased index for December 1980 is 74.4, increasing to 117.9 in 1991, for a percentage change of 58.47%. The statute requires that the percentage change in the reference base index be 10% or more in order to adjust the dollar amounts. The portion of the percentage change in the index in excess of a multiple of ten percent shall be disregarded as dollar amounts change only in multiples of ten percent. The law was effective August 1, 1981, and there was no change in dollar amounts in 1982.

According to Commissioner McKasy, this means indexed dollar limits will increase an additional 10% effective July 1, 1992 after factoring out prior year's adjustments. The results of indexing are as follows, with the percentage increased noted under the various dates:

	<u>Original</u>	<u>7-1-84</u> <u>10%</u>	<u>7-1-86</u> <u>10%</u>	<u>7-1-88</u> <u>10%</u>	<u>7-1-90</u> <u>10%</u>	<u>7-1-92</u> <u>10%</u>

Section 56.131, subdivision 1(a)(1) was amended in 1990, effective April 24, 1990, increasing the principal loan amount subject to the 33% per year interest rate. This dollar amount was not subject to indexing on July 1, 1990 as indicated in the 1990 revisors' technical corrections bill.

***Important.** These amounts may change prior to the July 1, 1992 effective date based on the passage of S.F. No. 2213 as it amends Section 56.131 subdivision 4. The legislature passed the bill which has not yet been signed by the Governor. The bill provides publication before June 30 to confirm the amendment that establishes December 30, 1990 as the reference base index for dollar adjustments to the \$750 in subdivision 1(a)(1) and the \$1,000 in subdivision in 2(d). These dollar amounts will remain unchanged from 1990.

**Section 56.131, subdivision 2(d), setting a minimum advanced required to charge discount points and appraisal fees, was added by a 1990 amendment. This statutory amount was to have been adjusted in 1990 to \$1,400; however, its publication was inadvertently overlooked. The \$1,000 will remain the correct level for compliance purposes. The dollar adjustment is subject to amendment, and no change, based on #S.F. No. 2213 as previously discussed.

The minimum default charge permitted in Section 56.131, subdivision 1(f)(4) increased to \$4.00 by amendment effective June 25, 1985. Section 56.131, subdivision 4 was also amended to use December 1984 as the reference base index date for dollar adjustments on default charges. The rebased index for December 1984 is 92.3, increasing to 117.9 in December 1991, for a percent change of 27.74%. The portion of the percent change in the index in excess of a multiple of ten percent shall be disregarded as dollar amounts shall change only in multiples of ten percent of amounts appearing in law. This results in an additional 10% increase effective July 1, 1992 with historic and current indexing of the default charge as follows, with the percentage increase noted under the indexed dates:

	<u>Original</u>	<u>7-1-86 No change</u>	<u>7-1-88 No change</u>	<u>7-1-90 10%</u>	<u>7-1-92 10%</u>
Default change	\$4.00	\$4.00	\$4.00	\$4.40	\$4.80

The next published adjustment is scheduled on or before April 30, 1994, for July 1, 1994, based on the December 1993 index.

Adjustment of Dollar Amounts Restrictions on Deficiency Judgments and Minnesota Property Exemption

Commissioner of Commerce Bert J. McKasy announced today dollar increases in both the deficiency judgment *Minnesota Statutes*, Section 325G.22, and the property exemption from creditor collection action provided in *Minnesota Statutes*, Section 550.37. These statutes provide that the dollar amounts will be adjusted in even numbered years based on a percentage change in the Implicit Price Deflator for the Gross National Product.

DOLLAR ADJUSTMENT FOR RESTRICTIONS ON DEFICIENCY JUDGMENTS

Minnesota Statutes, Section 325G.22 was amended in 1990 to provide indexing of the \$3,000 amount found in subdivision 1 relating to financing a purchase money security interest in a consumer credit transaction. Subdivision 1a states the periodic adjustments are to follow the indexing provisions of section 550.37, subdivision 4a. The amendment was effective April 24, 1990 requiring a cumulative 40% increase to be used for July 1, 1990 as the reference base index for this dollar adjustment is December 1980.

DOLLAR ADJUSTMENTS FOR EXEMPT PROPERTY

Minnesota Statutes, Section 550.37 subdivision 4(a) required indexing the \$4,500 personal property exemption in Subdivision 4 since 1984. Subdivision 4(a) was amended in 1985, effective July 1, 1986, to include dollar amount adjustments for other exempt property within this section of statute, which received a cumulative 30% adjustment in 1988 as the reference base index for dollar adjustments is December 1980. A further amendment to subdivision 4(a) in 1989 fixed \$13,000 as the maximum amount for subdivision 5 and 7 and established \$30,000 as the amount for employee benefits in subdivision 24(2). The \$30,000 was adjusted a cumulative 40% in 1990 when the percent change from the December 1980 reference base index was applied.

The historic and 1992 dollar adjustments for *Minnesota Statutes*, Section 550.37 by subdivision are as follows, with the percentage increase noted under the various dates:

SCH Cost-Sharing Schedule

The applicant's share is one percent of cost for each \$1,000 or fraction of income above 60 percent of the State gross median income for a household of the same size as the applicant's. The applicant's percent share is found on the schedule by looking under the number which corresponds with the number of members in the applicant's household to find the income level which includes the applicant's annual household income. The applicant's percent share is shown on the far left of that income level. For each additional household member greater than 10, add 3 percent to 144 percent for each additional household member and multiply the new percentage by the State's dollar amount for four-person households.

Minnesota Pollution Control Agency

Public Notice and Opportunity to Comment on Proposed Revisions to Minnesota State Implementation Plan for Sulfur Dioxide for the Twin Cities Metropolitan Area

NOTICE IS HEREBY GIVEN, that the Commissioner of the Minnesota Pollution Control Agency (MPCA) proposes to present to the MPCA Board at its May 27, 1992, meeting at 520 Lafayette Road, St. Paul, Minnesota, modifications to the Minnesota State

Implementation Plan (SIP) for Sulfur Dioxide (SO₂) in the Twin Cities seven county metropolitan area. Members of the public are invited to attend this meeting and address the MPCA Board. The public may also submit written comments to the MPCA regarding the proposed SIP, which is available for review.

The Clean Air Act (CAA) Amendments of 1977 requires states to prepare and submit to the United States Environmental Protection Agency (EPA) a SIP, which is the state's plan to implement measures to attain and maintain national ambient air quality standards (NAAQS) and other requirements of the CAA. Sulfur dioxide is a criteria air pollutant for which the EPA has established national primary and secondary NAAQS.

The Twin Cities seven county metropolitan area SO₂ nonattainment area includes the counties of Anoka, Carver, Dakota, Hennepin, Ramsey, Scott, and Washington. The MPCA requested the EPA to designate this area as nonattainment for SO₂ in response to the CAA Amendments of 1977. The designation is based on monitored primary NAAQS violations in the area from 1975 through 1977.

The overall SIP involves regulating emissions from all sources contributing SO₂ to the nonattainment area through issuance of administrative orders. The MPCA proposes issuing administrative orders to the following sources impacting the Twin cities SO₂ nonattainment area:

Northern States Power Company

–Riverside Plant

3100 Marshall Street Northeast

Minneapolis, Minnesota

Minneapolis Energy Center, Inc.

–Main Plant

816 Fourth Avenue South

–Baker Boiler Plant

706 Second Avenue South

–Soo Line Boiler Plant

101 Fifth Street South

Minneapolis, Minnesota

GAF Corporation

–Asphalt Roofing Products Manufacturing Facility

50 Lowry Avenue North

Minneapolis, Minnesota

FMC and U.S. Navy

–Naval Weapons Manufacturing Plant

4800 River Road

Fridley, Minnesota

Federal Hoffman, Incorporated

–Anoka Manufacturing Facility

900 Ehlen Drive

Anoka, Minnesota

There are several other SO₂ emission sources in the seven county metropolitan area that have been or will be addressed in administrative orders. MPCA has issued administrative orders to Koch Refining Company and Koch's Sulfuric Acid Unit Plant. The MPCA will propose to issue administrative orders to Northern States Power Company–Inver Hills, Continental Nitrogen and Resources Corporation, and Ashland Petroleum Company. Administrative orders for these emission sources will be included in subsequent SO₂ SIP submittals.

The MPCA has determined that if the facilities receiving administrative orders under this proposed SO₂ SIP comply with the requirements of the administrative orders, Minnesota should attain and maintain compliance with the NAAQS for SO₂ in the seven county metropolitan area. This determination is based on air dispersion modeling.

In addition to the administrative orders, the SIP includes background on Minnesota SIP submittals, EPA administrative requirements for SIPs, and a technical support document (TSD). The TSD, through air dispersion modeling, provides the technical justification for the emission and operating requirements in the administrative orders.

A copy of the proposed SO₂ SIP and all associated exhibits will be available for inspection at the MPCA offices in St. Paul at 520 Lafayette Road North, 6th floor, Air Quality Division, telephone (612) 296-8326 between the hours of 8:00 a.m. and 4:30 p.m., Monday through Friday.

All persons are encouraged to provide written comments on the SIP. Written comments will be accepted until 4:30 p.m., Wednesday, May 13, 1992. Written comments should be sent to:

Minnesota Public Utilities Commission

Notice of Intent to Solicit Outside Information or Opinions Regarding Proposed Rules Governing Service Standards and Practices Related to Testing, Mitigation, and General Policies in the Matter of Stray Voltage on the Farm, Docket No. E-999/R-92-245

NOTICE IS HEREBY GIVEN that the Minnesota Public Utilities Commission (Commission) is seeking information or opinions from outside sources in preparing to propose the adoption of rules governing service standards and practices related to stray voltage on the farm. The adoption of these rules is authorized by *Minnesota Statutes* §§ 216A.05, 216B.04, 216B.08, 216B.09. The Commission requests information or opinions concerning the subject matter of the rules. In addition to soliciting general information and opinions which interested parties deem relevant, the Commission has identified the following specific issues:

I. STRAY VOLTAGE DEFINITION

1) Should the rules incorporate the definition of stray voltage set forth in the USDA's draft "White Paper"? If not, how should the term be defined?

II. INVESTIGATION AND TESTING PROCEDURES

1) What test protocols should be established for stray voltage investigations? NRECA? U of M guidelines? Wisconsin PSC protocols? Others?

Official Notices

- 2) What data and educational information should be included in a standard test reporting form explaining test results to farmers?
- 3) What role should independent testing play in stray voltage investigations?
- 4) What response time requirements should be placed on utilities for testing in response to complaints?
- 5) What should a utility's obligation be to investigate wiring on the farm?

III. CORRECTIVE ACTION THRESHOLDS

- 1) What AC test values, in the following areas, should trigger mitigation?

a. PRIMARY NEUTRAL

What threshold values for mitigation should be set up for primary neutral voltage levels? What role should ampere flow in the service pole primary neutral grounding conductor or the primary to secondary bonding jumper play in setting mitigation standards?

b. SECONDARY NEUTRAL

Should a threshold level for mitigation be established for secondary neutral voltage? If so, at what value? Should ampere level in secondary grounding conductors be used as a threshold standard? If so, at what value?

c. COW CONTACT AREA

What is a proper voltage threshold level for mitigation in this area? Should cow contact area measurements include a current standard either through the cow body or to an earth reference?

- 2) How should thresholds for mitigation be established to address DC, harmonics, and transient conditions?

IV. CORRECTION AND MITIGATION PRACTICES

- 1) What guidelines should be established to indicate when different mitigation strategies should be used on the farm. Please comment on equipotential planes, isolating devices, electronic grounding systems, NEC article 547 four wire systems and other practices as appropriate.
- 2) Should isolating devices be allowed as a permanent mitigative action or temporary only?
- 3) What response time requirements should be placed on utilities for mitigation action after testing?
- 4) When should different distribution designs be considered as mitigation strategies?
- 5) When are utility counterpoise systems appropriate?
- 6) Should a neutral impedance test be used as a guide for requiring line upgrades?

V. COST ISSUES RELATED TO INVESTIGATION, CORRECTION, AND DAMAGES

- 1) How should the cost of an investigation be allocated between the utility and an individual customer? Should the answer depend on whether utility-caused stray voltage is found?
- 2) Who should pay the cost of independent investigators?
- 3) Who should pay for installation and maintenance of isolating devices and other mitigation techniques?
- 4) What mechanism can be established to facilitate financial compensation to farmers who suffer economic loss as a result of stray voltage caused by a utility?
- 5) What financial role can the utilities play in funding wiring corrections or improvements on the farm?

VI. SERVICE STANDARD REQUIREMENTS

- 1) Can a standard be established beyond minimum NESC requirements for ground rod separation distance where an isolator has been installed?
- 2) Are rules relating to primary grounding practices necessary?
- 3) Do rules need to address the allowable proximity of a service pole or pad mount transformer to a barn or well?
- 4) Should a rule be established regulating use of primary underground wiring with a bare concentric neutral?
- 5) What standards should be used to decide voltage quality issues at the meter for slow and fast transient level changes?

VII. TARIFF AND PROCEDURES REQUIREMENTS

- 1) What programs or procedures should be established by the utilities for educating dairy and other livestock operators to the potential risk from stray voltage?

- 2) What types of changes to existing tariff language or new filings are necessary regarding stray voltage policies?
- 3) How can, or should, utilities assist the farmer in obtaining dairy process evaluations?
- 4) What special appeal rules should be established for circumstances where a farmer disagrees with a utility's assessment of stray voltage exposure?
- 5) Should utilities be required to provide periodic information updates to the Commission or the Department on stray voltage investigation activity? If so, what specific requirements, including time periods, should the rules establish?

Interested persons or groups may submit data or views in writing or orally. Written statements or comments should be directed to:

PROJECT DETAILS:

This project will include the remodeling of the existing building and construction of an addition of approximately 50,000 gross square feet for the following: administration and staff, i.e., information, admissions, conferencing rooms, staff offices, etc.; visitation areas and public rest rooms, mechanical systems and building maintenance, resident rooms, bathing rooms, nourishment/medication stations, nursing stations, storage areas for program supplies and equipment, industrial/vocational therapy, recreation, resident dining areas and laundry areas.

This project will involve the installation of an electronic security and surveillance system, other security devices, fire safety systems, and the extension of electrical/mechanical systems from the existing building or the design and installation of new HVAC equipment; and the identification and specification of related program equipment.

The facility should be designed using techniques that are consistent with the construction and design of medium security correctional facilities as a minimum.

WORK TO BE PERFORMED BY THE DESIGNER:

The work for this project will include planning, programming, and designing the remodeling of existing space and the addition of new space. The following items are included: the preparation of specifications, drawings and related documents, including schematics, design development documents, construction documents and bidding documents; presiding at the bid opening; the handling of contract documents; general supervision of the construction work for the owner; preparation of supplemental agreements; review and approval of shop drawings and pay request; and assisting in the final acceptance of the work.

DESIGNER'S QUALIFICATION:

The designer selected for this project shall have a demonstrated track record in the design and construction of minimum, medium and maximum security correctional facilities.

7b) PROJECT 10-92

Mechanical Systems Improvements
North Hennepin Community College
Total Project Budget: \$2,620,000.00

PROJECT SUMMARY:

North Hennepin Community College has experienced severe heating and cooling plant problems due to insufficient capacity and age of equipment. The distribution piping and pumping systems that deliver heating and cooling water are inadequate and need revision. HVAC modifications and repairs are needed in most campus buildings. Some of the problems and possible have been identified in a recent campus study.

Professional, Technical & Consulting Contracts

The mechanical HVAC Systems require constant repair and many components are close to failure. Recently two cooling towers have failed and are being replaced. A lack of proper temperature control and poor design have resulted in extremely high energy usage. Many buildings are equipped with "Reheat Type" systems and radiation without thermostat control. The State would prepare the design team to be directed by an engineering firm with a strong mechanical background. The construction phase of work is anticipated to be implemented by a Construction Manager.

PROJECT DESCRIPTION:

1. INVESTIGATION: Provide investigation and testing of building systems as needed to identify problem areas and needed solutions. This shall include estimates on the costs of asbestos abatement.

2. ENERGY PLANT: Build and equip a new heating cooling plant with efficient boilers and chillers. Modify distribution piping and pumping systems to satisfy heating and cooling needs of individual campus buildings. Also design and construct additional storage and receiving areas. Provide necessary Architectural design related to construction of new building areas and miscellaneous repairs as needed.

3. ENERGY MANAGEMENT: Upgrade and complete a campus wide control system. This will include replacement of existing faulty control devices and new control strategies as needed to achieve efficient operation.

4. FIRE SUPPRESSION: Install a dedicated fire suppression loop and additional hydrants as needed to meet code.

PROJECT SIZE:

New construction is estimated at 7,400 square feet plus associated sitework.

DESIGN FEE:

A fee of 7% is proposed for consultant services.

Questions concerning this project may be referred to Pat Ferrin at (612) 297-3454.
