# Minnesota Rules: Amendments and Additions

## NOTICE: How to Follow State Agency Rulemaking in the State Register

The *State Register* is the official source, and only complete listing, for all state agency rulemaking in its various stages. State agencies are required to publish notice of their rulemaking action in the *State Register*. Published every Monday, the *State Register* makes it easy to follow and participate in the important rulemaking process. Approximately 80 state agencies have the authority to issue rules. Each agency is assigned specific **Minnesota Rule** chapter numbers. Every odd-numbered year the **Minnesota Rules** are published. Supplements are published to update this set of rules. Generally speaking, proposed and adopted exempt rules do not appear in this set because of their short-term nature, but are published in the *State Register*.

An agency must first solicit **Comments on Planned Rules** or **Comments on Planned Rule Amendments** from the public on the subject matter of a possible rulemaking proposal under active consideration within the agency (*Minnesota Statutes* §§ 14.101). It does this by publishing a notice in the *State Register* at least 60 days before publication of a notice to adopt or a notice of hearing, or within 60 days of the effective date of any new statutory grant of required rulemaking.

When rules are first drafted, state agencies publish them as **Proposed Rules**, along with a notice of hearing, or a notice of intent to adopt rules without a hearing in the case of noncontroversial rules. This notice asks for comment on the rules as proposed. Proposed emergency rules, and withdrawn proposed rules, are also published in the *State Register*. After proposed rules have gone through the comment period, and have been rewritten into their final form, they again appear in the *State Register* as **Adopted Rules**. These final adopted rules are not printed in their entirety, but only the changes made since their publication as Proposed Rules. To see the full rule, as adopted and in effect, a person simply needs two issues of the *State Register*, the issue the rule appeared in as proposed, and later as adopted.

The *State Register* features partial and cumulative listings of rules in this section on the following schedule: issues #1-13 inclusive; issues #14-25 inclusive (issue #26 cumulative for issues #1-26); issues #27-38 inclusive (issue #39, cumulative for issues #1-39); issues #40-52 inclusive, with final index (#1-52, or 53 in some years). An annual subject matter index for rules was separately printed usually in August, but starting with Volume 19 now appears in the final issue of each volume. For copies or subscriptions to the *State Register*, contact Minnesota's Bookstore, 660 Olive Street (one block east of I-35E and one block north of University Ave), St. Paul, MN 55155, phone: (612) 297-3000, or toll-free 1-800-657-3757.

## Adopted Rules

A rule becomes effective after the requirements of *Minnesota Statutes* §§ 14.05-14.28 have been met and five working days after the rule is published in the *State Register*, unless a later date is required by statutes or specified in the rule. If an adopted rule is identical to its proposed form as previously published, a notice of adoption and a citation to its previous *State Register* publication will be printed. If an adopted rule differs from its proposed form, language which has been deleted will be printed with strikeouts and new language will be underlined. The rule's previous *State Register* publication will be cited.

**KEY: Proposed Rules** - Underlining indicates additions to existing rule language. ~~Strikeouts~~ indicate deletions from existing rule language. If a proposed rule is totally new, it is designated "all new material." **Adopted Rules** - Underlining indicates additions to proposed rule language. ~~Strikeout~~ indicates deletions from proposed rule language.

## Minnesota Pollution Control Agency (MPCA) Adopted Permanent Rules Relating to Sewage Treatment Systems

The rules proposed and published at *State Register*, Volume 34, Number 51, pages 1789-1820, June 21, 2010 (34 SR 1789), are adopted with the following modifications:

### 7080.1100 DEFINITIONS.

Subp. 11. **Building**. "Building" means any lot improvement with a foundation. ~~[See repealer.]~~

Subp. 41. **Individual subsurface sewage treatment system or ISTS**. "Individual subsurface sewage treatment system" or "ISTS" means a subsurface sewage treatment system or part thereof, as set forth in *Minnesota Statutes*, sections 115.03 and 115.55, that employs sewage tanks or other treatment devices with final discharge into the soil below the natural soil elevation or elevated final grade that are designed to receive a sewage design flow of 5,000 gallons per day or less.

ISTS also includes all holding tanks that are designed to receive a ~~sewage~~ design flow of ~~5,000~~ 10,000 gallons per day or less; sewage collection systems and associated tanks that discharge into ISTS treatment and dispersal components; and privies. ISTS does not include those components defined as plumbing under chapter 4715.

Subp. 66a. **Rock fragments**. "Rock fragments" means pieces of rock greater than two millimeters in diameter ~~or larger~~ that are strongly cemented and resistant to rupture. Rock fragments are commonly known as gravel, stones, cobbles, and boulders.

Subp. 66b. **Sand**. "Sand" means a sand soil texture, as described in the ~~Field Book for Describing and Sampling Soils, which is incorporated by reference in subpart 36~~ Soil Survey Manual (1993) developed by the Natural Resource Conservation Service, United

# Adopted Rules

---

States Department of Agriculture. The manual is incorporated by reference, is not subject to frequent change, and is available through the Minitex interlibrary loan system.

Subp. 80a. **Structure.** “Structure” means a constructed lot improvement that does not have a foundation but the location of which will be intended or used for human occupancy or that is determined by the local unit of government to:

A. interfere with the dispersal, treatment construction, operation, or maintenance of an SSTS. Structure includes, but is not limited to, animal shelters, decks, paved areas, and sheds; or

B. be interfered with by the construction, operation, or maintenance of an SSTS.

Subp. 89a. **Uniform distribution.** “Uniform distribution” means a method that, upon activation of the SSTS, reliably distributes effluent evenly over the entire absorption area of a component over both time and space.

## 7080.1500 COMPLIANCE CRITERIA.

Subp. 4. **Compliance criteria for existing systems.** To be in compliance, an existing ISTS must meet the provisions of this subpart.

D. ISTS built after March 31, 1996, or in an SWF area as defined under part 7080.1100, subpart 84, must have at least a three-foot vertical separation or a vertical separation in compliance with part 7080.2350, subpart 2, Table XI. The local ordinance is allowed to provide for a reduced vertical separation in the following cases: for existing systems that were designed with at least a three-foot vertical separation distance.

(1) Types I, II, and III systems; and

(2) Types IV and V systems that are designed with at least a three-foot separation distance.

The local ordinance must not allow more than a 15 percent reduction in the vertical separation distance. A 15 percent reduction is only allowed to account for settling of sand or soil, normal variation of measurements, and interpretations of the limiting layer conditions.

## 7080.1720 FIELD EVALUATION.

Subp. 5. **Soil descriptions for determination of limiting layer.** Each soil profile observed at the proposed soil treatment area must be evaluated under adequate light conditions with the soil in a moist unfrozen state for the characteristics in items A to H:

E. depth to the periodically saturated soil for new construction or replacement as determined by redoximorphic features and other indicators, as determined in subitems (1) to (3):

(3) in the upper 12 inches of the topsoil layer, if it is immediately followed by a periodically saturated horizon, the depth of seasonal saturation is determined by one or more of the indicators in units (a) to (f):

(f) the soil expressing indicators of seasonal saturation as determined in Field Indicators of Hydric Soils in the United States: A Guide for Identifying and Delineating Hydric Soils, USDA Natural Resource Conservation Service (2006 and as subsequently amended). The field indicators are incorporated by reference, are available through the Minitex interlibrary loan system, and are subject to frequent change;

### Public Notice of Maximum Allowable Costs of Medical Assistance Outpatient Prescribed Drugs

**NOTICE IS HEREBY GIVEN** to recipients, providers of services, and to the public of additions to the state Medical Assistance maximum allowable cost (state MAC) list for certain outpatient prescribed drugs.

At least once each calendar year, the United States Department of Health and Human Services, Centers for Medicare & Medicaid Services, publishes a federal upper limit (FUL) payment schedule for many commonly prescribed multiple-source drugs. The federal upper limit is set at a rate equal to 150 percent of the published price for the least costly therapeutic equivalent that can be purchased by pharmacists. This FUL payment schedule constitutes the federal MAC list. For many multiple-source drugs that are not on the federal MAC list, the Department establishes a state MAC list. Additionally, the Department imposes a state MAC for many multiple-source drugs that are on the federal MAC list, as long as the savings are at least as much as the savings would be using the federal MAC list.

The Department requires Medical Assistance pharmacy providers to submit their usual and customary costs. Pharmacy providers are reimbursed at the lower of:

- 1) the federal or state MAC, plus a dispensing fee;
- 2) the submitted usual and customary charge to the general public; or
- 3) a discount off of average wholesale price, plus a dispensing fee.

No earlier than March 8, 2011 the Department may add the following outpatient prescribed drugs to the state MAC list:

<b>Drug Name</b>
VORICONAZOLE
PROPAFERONE
FEM HRT

These additions are made to bring Medical Assistance reimbursement to pharmacists more closely in line with the actual acquisition cost of the drugs listed above. The Department estimates that there will be a state savings of \$25,000.00 for State Fiscal Year 2010 (July 1, 2010 through June 30, 2011).

This notice is published pursuant to *Code of Federal Regulations*, Title 42, section 447.205, which requires publication of a notice when there is a rate change in the methods and standards for setting payment rates for Medical Assistance services.

Written comments and requests for information may be sent to Pharmacy Program Manager Sara Drake R.Ph., Health Services and Medical Management Division, Health Care Administration, Minnesota Department of Human Services, P.O. Box 64984, St. Paul, Minnesota 55164-0984.

Permit coverage is for all people or entities discharging a pesticide to a water of the state to control Forest Canopy Insect Pests and begins upon permit issuance for all entities performing the activities covered. This Use Pattern does not include control of vegetation. Only entities that exceed a Threshold as listed in Section 1.3 of each permit are required to submit a NOI for permit coverage.

#### Hennepin County

Public Utilities Docket No: E-002/CN-10-694

**NOTICE IS HEREBY GIVEN** that on November 29, 2010 Northern States Power Company d/b/a Xcel Energy (Xcel, the Applicant) filed a certificate of need application with the Minnesota Public Utilities Commission (Commission) for two 115 kV HVTLs and two new distribution substations in the Midtown Area of South Minneapolis. The proposal is known as the Hiawatha project. The project is designed to meet the distribution needs of Xcel's customers in south Minneapolis. The Applicant asserts that the demand for power in this community has increased beyond the capability of the system due to population growth, higher load density, and recent successful urban revitalization efforts.

In 2010, the Legislature enacted a new provision that requires a Certificate of Need for transmission lines of this size and length, if it is in an area with high population density and if the lines are within one-half mile of, and parallel to, a below-grade bike and pedestrian path that connects with other bike paths along a river. (2010 *Minnesota Laws*, chapter 361, article 5, section 19)

The certificate of need rules pertaining to the review of this filing are in *Minnesota Rules* Chapter 7849. On February 16, 2011 the Commission accepted the Application as complete as of the filing date. In the Order, the Commission noted the apparent absence of disputed material facts and ordered an informal review process under *Minnesota Rules* 7829.1200. This order and other documents associated with the need application can be viewed at [www.puc.state.mn.us](http://www.puc.state.mn.us) by clicking "Search e-Dockets" then enter the "year" (10) and the "docket number" (694).

Interested persons are encouraged to provide written comments on the need application and whether the proposed project is needed and in the public interest. The Commission is particularly interested in whether there are any contested issues of fact with respect to the representations made in the application. Initial comments should be filed by **Thursday, March 31, 2011** and reply comments by **Friday, April 29, 2011**. The objective of this RFP is to contract with up to seven (7) qualified Responder(s) to perform the tasks and services set forth in this RFP. The term of any resulting contract is anticipated to be from **July 1, 2011 through June 30, 2013**, when funds must be expended. **Projects must begin working with clients by September 1, 2011.**

## Department of Labor and Industry (DLI) Workplace Safety Consultation Unit Notice of Safety Grants for Employers

The Department of Labor and Industry (DLI) announces continuation of its safety hazard abatement matching grant program under *Minnesota Statutes*, section 79.253, and *Minnesota Rules*, parts 5203.0010 through 5203.0070. Employers covered by workers' compensation insurance, and those approved as self-insured employers, are eligible to apply for safety/health matching grants to abate safety hazards in their workplace. The safety/health hazards must have been identified in an on-site survey conducted by one of the following:

- 1) MNOSHA safety/health investigator,
- 2) DLI Workplace Safety Consultation safety/health consultant,
- 3) in-house employee safety/health committee,
- 4) workers' compensation underwriter,
- 5) private safety/health consultant or
- 6) a person under contract with the Assigned Risk Plan.

The on-site safety/health survey must have resulted in specifically recommended safety and/or health practices or equipment, training for purchased equipment, and/or tuition reimbursement designed to reduce the risk of injury to employees. Costs eligible for program participation are all or part of the cost of purchasing and installing recommended safety/health equipment, training for purchased equipment, tuition reimbursement, the cost of operating or maintaining safety/health equipment, and/or the cost of purchasing or renting real property, if necessary, to meet criteria established by the on-site safety/health survey. Automobiles, weapons, or personnel costs, such as salary and benefits, will not be covered by these grants.

Whether we approve your grant application or not, in no way diminishes delays or absolves you of any obligation to abate hazards as required by law. No state funds will be distributed until all grant documents are signed by all parties; funds expended before that must not rely on grant approval. Invoices dated prior to your fully executed grant agreement are not eligible for this program.

## State Grants & Loans

Grants are limited to a total maximum match of up to \$10,000 per project. The employer must provide at least \$1.00 (one dollar) in project costs for every dollar awarded after completion of the safety grant project. No grant will be awarded for more than half the amount of the approved project. Grant applications postmarked on or before April 15, 2011, will be evaluated and processed so that grant contracts or denial letters will be issued by June 15, 2011.

Projects will be judged according to the criteria established by law. Qualified projects having the greatest impact and feasibility will be given priority. Priority will also be given to projects meeting the other requirements for grants: creating production jobs in an area, preventing loss of jobs due to safety problems, and in areas that are the current focus of Minnesota OSHA compliance and consultation strategic plan, including:

General Industry Primary Group; utilities except nuclear, food manufacturing, construction, beverage and tobacco product manufacturing, wood product manufacturing, nonmetallic mineral product manufacturing, primary metal manufacturing except foundries, transportation equipment manufacturing, furniture and related product manufacturing, building material and garden equipment and supplies dealers, warehouse and storage, combustible dust, foundries, refineries, grain facilities, meatpacking, public sector, tree trimming/logging, and industries with high risk of amputations. Health Primary Group: asthma, lead, Methylene chloride, popcorn, silica, Process Safety Management, ergonomics and safe patient handling, including hospitals, surgical centers and nursing homes.

An employer that has received a grant for a particular worksite will not be eligible to receive another grant for that worksite during the two years after the date of the award. All applicable information requested on the grant application form is required for grant approval. Missing information will result in your application being returned to you. Less than the requested amount may be awarded if program resources are insufficient to provide full assistance to all approved applicants and if the reduced grant could still achieve safety objectives.

Eligible applicants for grants can submit their proposals to: Patricia Todd, Project Manager, Workplace Safety Consultation, 443 Lafayette Road N., St. Paul, MN 55155, or applications can be submitted on-line at: <http://www.dli.mn.gov/WSC/Grants.asp>. ## Minnesota State Lottery

### Request for Proposals for Sponsorship Agreements

#### Description of Opportunity

The Minnesota State Lottery develops sponsorship agreements throughout the year with organizations, events, and sports teams to create excitement for lottery players, to interest new players and increase the visibility of lottery games. The Lottery encourages and continually seeks new sponsorship agreements to help achieve current Lottery marketing goals.

#### Proposal Content

A sponsorship proposal presented to the Lottery should meet the following three criteria:

**1. Maximize Lottery Visibility** – the event, sports or tie-in proposal should draw a large number of desired participants (typically 50,000 or more) whose demographics match the Lottery player profile. The Lottery is interested in effectively delivering its message of fun and entertainment to Minnesota adults whose demographics skew primarily towards those aged 25-64, with a household income of \$35,000-\$75,000, and having an educational background of some college or higher. The Lottery does not market to those under the age of 18, and family events with high levels of children present are generally not accepted. Attendance, on-site signage visibility and paid media exposure will be critical components that will be evaluated.

**2. Enhance Lottery Image-** – the event, sports or tie-in proposal should inherently project the attitude that the Lottery is a fun and socially acceptable part of the community. The Lottery's presence should fit well within the lineup of other sponsors. The Lottery is interested in creating opportunities whereby the sponsorship can translate into sales revenue, either via on-site sales from a Lottery booth, from sales-generating promotions with Lottery retailers or from joint programs with the sponsor's media partners.

**3. Provide Promotional Extensions** – the event, sports or tie-in proposal should offer exciting, value-added ways to interact with our players and have opportunities to motivate attendees, listeners and viewers to participate in and purchase Lottery games. The proposal must include proper staffing availability or other considerations to help the Lottery implement any appropriate promotional extension ideas.

# Non-State Bids, Contracts & Grants

The *State Register* also serves as a central marketplace for contracts let out on bid by the public sector. It is recommended that contracts and RFPs include the following: 1) name of contact person; 2) institution name, address, and telephone number; 3) brief description of commodity, project or tasks; 4) cost estimate; and 5) final submission date of completed contract proposal. Allow at least three weeks from publication date (four weeks from the date article is submitted for publication).
