Minnesota Rules: Amendments and Additions

NOTICE: How to Follow State Agency Rulemaking in the State Register

The *State Register* is the official source, and only complete listing, for all state agency rulemaking in its various stages. State agencies are required to publish notice of their rulemaking action in the *State Register*. Published every Monday, the *State Register* makes it easy to follow and participate in the important rulemaking process. Approximately 80 state agencies have the authority to issue rules. Each agency is assigned specific **Minnesota Rule** chapter numbers. Every odd-numbered year the **Minnesota Rules** are published. Supplements are published to update this set of rules. Generally speaking, proposed and adopted exempt rules do not appear in this set because of their short-term nature, but are published in the *State Register*.

An agency must first solicit **Comments on Planned Rules** or **Comments on Planned Rule Amendments** from the public on the subject matter of a possible rulemaking proposal under active consideration within the agency (*Minnesota Statutes* §§ 14.101). It does this by publishing a notice in the *State Register* at least 60 days before publication of a notice to adopt or a notice of hearing, or within 60 days of the effective date of any new statutory grant of required rulemaking.

When rules are first drafted, state agencies publish them as **Proposed Rules**, along with a notice of hearing, or a notice of intent to adopt rules without a hearing in the case of noncontroversial rules. This notice asks for comment on the rules as proposed. Proposed emergency rules, and withdrawn proposed rules, are also published in the *State Register*. After proposed rules have gone through the comment period, and have been rewritten into their final form, they again appear in the *State Register* as **Adopted Rules**. These final adopted rules are not printed in their entirety, but only the changes made since their publication as Proposed Rules. To see the full rule, as adopted and in effect, a person simply needs two issues of the *State Register*, the issue the rule appeared in as proposed, and later as adopted.

The *State Register* features partial and cumulative listings of rules in this section on the following schedule: issues #1-13 inclusive; issues #14-25 inclusive (issue #26 cumulative for issues #1-26); issues #27-38 inclusive (issue #39, cumulative for issues #1-39); issues #40-52 inclusive, with final index (#1-52, or 53 in some years). An annual subject matter index for rules was separately printed usually in August, but starting with Volume 19 now appears in the final issue of each volume. For copies or subscriptions to the *State Register*, contact Minnesota's Bookstore, 660 Olive Street (one block east of I-35E and one block north of University Ave), St. Paul, MN 55155, phone: (612) 297-3000, or toll-free 1-800-657-3757. Notice of Availability of the Draft Watershed Restoration and Protection Strategies Report and Total Maximum Daily Loads for the Buffalo River Watershed and Request for Comment

Public Comment Period Begins:

March 30, 2015

Public Comment Period Ends:

April 29, 2015

The Minnesota Pollution Control Agency (MPCA) is requesting comments on the Watershed Restoration and Protection Strategies (WRAPS) Report and Total Maximum Daily Loads (TMDLs) for the Buffalo River Watershed in Northwestern Minnesota. The watershed is located in portions of Becker, Clay, Wilkin, and Ottertail Counties. The draft WRAPS Report and TMDL report are available for review at:

<http://www.pca.state.mn.us/index.php/water/water-types-and-programs/minnesotas-impaired-waters-and-tmdls/tmdl-projects/red-river-basin-tmdl/buffalo-river-major-watershed.html>

and: <http://www.pca.state.mn.us/index.php/view-document.html?gid=22026>.

Written comments on the draft WRAPS Report and TMDLs must be sent to the MPCA contact person listed below by April 29, 2015. The comments should indicate as to whether they are about the WRAPS Report or the TMDLs, and specifically which TMDL. The MPCA will prepare responses to comments received and make any necessary revisions of the two documents. Subsequent to the revision(s), the draft TMDLs will be submitted to the U.S. Environmental Protection Agency (EPA) for approval; the WRAPS Report will be forwarded to the MPCA Commissioner for approval.

Required by the state Clean Water Legacy Act, a WRAPS Report is a document summarizing scientific studies of a major watershed no larger than a hydrologic unit code 8. The WRAPS Report includes the physical, chemical, and biological assessment of the water quality in the watershed; identification of impairments and water bodies needing protection; and identification of biotic stressors and sources of pollution, point and nonpoint. The science, analysis and strategy development described in this Report began before accountability provisions were added to the Clean Water Legacy Act in 2013 (*Minnesota Statutes* 114D); thus, this Report does not address all of those provisions. When this watershed is revisited (according to the 10-year cycle), the information will be updated according to the statutorily required elements of a Watershed Restoration and Protection Strategy Report. TMDLs are explained for the impairments and an implementation table is included with the strategies to achieve and maintain water quality standards and goals.

This TMDL Report focuses on pollution caused by excess nutrients in lakes and turbidity in streams. The TMDL Report is a scientific study that calculates the maximum amount of a pollutant that a water body can receive (known as the "loading capacity") without exceeding water quality standards. 1,100 square miles within Clay, Becker, Wilkin, and Otter Tail counties. The Watershed is located in the Red River of the North Basin and spans three ecoregions: the Lake Agassiz Plain (LAP), the North Central Hardwood Forests (NCHF), and the Northern Lakes and Forests (NLF). Land use within the Watershed is predominantly agricultural, occurring in the west and central portions; the eastern portion of the Watershed is mostly forested. Municipalities located within the BRW include Glyndon, Hawley, Lake Park, Audubon, Callaway, Georgetown, and Barnesville.

Official Notices

The MPCA has listed 38 waterbodies in the BRW as impaired for water quality (i.e., not meeting the standards that have been set for them) and needing a TMDL. The draft 2014 303(d) list contains a total of 61 impairment listings for the BRW's waterbodies: 22 for *E. coli*, 13 for turbidity, 16 for excess nutrients, 4 for aquatic macroinvertebrate bioassessment, 3 for fish bioassessment, 2 for dissolved oxygen (DO), and 1 for mercury. Of the 61 listings on the 303(d) list, 53 are addressed in this TMDL, i.e. a TMDL calculation is performed. They include the 22 *E. coli*, 13 turbidity, 15 excess nutrients, and 3 biologic impairments. The remaining 8 listings are not addressed because either they already have an approved TMDL (1 mercury impairment), are the result of non-conventional stressors like altered hydrology (4 biological impairments), are wholly located within a National Wildlife Refuge (1 excess nutrient impairment – North Tamarack Lake), or will be completed in the future because of a lack of necessary data (2 DO impairments).

2. A proposed list of publications, references, or studies to be introduced and relied upon at a contested case hearing; and
3. An estimate of time required for you to present the matter at a contested case hearing.

MPCA Decision: You may submit a petition to the Commissioner requesting that the MPCA Citizens' Board consider the WRAPS and/or TMDL Report approval. To be considered timely, the petition must be received by the MPCA by 4:30 p.m. on the date the public comment period ends, identified on page 1 of this notice. Under the provisions of *Minnesota Statutes* § 116.02, subd 6(4), the decision whether to submit the WRAPS and/or TMDL Report and, if so, under what terms will be presented to the Board for decision if: (1) the Commissioner grants the petition requesting the matter be presented to the Board; (2) one or more Board members request to hear the matter before the time the Commissioner makes a final decision on the TMDL Report; or (3) a timely request for a contested case hearing is pending. You may participate in the activities of the MPCA Board as provided in *Minnesota Rules* 7000.0650.

The written comments, requests, and petitions submitted on or before the last day of the public comment period will be considered in the final decision on the WRAPS and TMDL Reports. The Minnesota Pollution Control Agency (MPCA) is requesting comments on the Watershed Restoration and Protection Strategies (WRAPS) Report and Total Maximum Daily Loads (TMDL) for the LeSueur River Watershed. The draft WRAPS Report and TMDLs are available for review at: <http://www.pca.state.mn.us/yrwc6a9>.

Written comments on the draft WRAPS Report and TMDLs must be sent to the MPCA contact person listed below by April 29, 2015, 2015 4:30 p.m. The comments should indicate as to whether they are about the WRAPS Report or the TMDLs, and specifically which TMDL. The MPCA will prepare responses to comments received and make any necessary revisions of the two documents. required elements of a Watershed Restoration and Protection Strategy Report. TMDLs are explained for the impairments and an implementation table is included with the strategies to achieve and maintain water quality standards and goals.

This TMDL Report addresses impairment listings for six stream reaches and four lakes in the LeSueur River Watershed. Impairments addressed include five stream reaches for *Escherichia coli* and one for dissolved oxygen and four lakes impaired for eutrophication standards. The TMDL Report is a scientific study that calculates the maximum amount of a pollutant that a water body can receive (known as the “loading capacity”) without exceeding water quality standards.

Located in south central Minnesota, the Le Sueur River watershed covers 710,832 acres in the Western Corn Belt Plains (WCBP) and North Central Hardwood Forests (NCHF) ecoregions and drains portions of five counties (Blue Earth, Faribault, Freeborn, Steele and Waseca). The eastern portion of the watershed is a gently rolling landscape, while the western half of the watershed is dominated by the relatively flat remnant of glacial Lake Minnesota. As the Le Sueur River approaches its confluence with the Blue Earth River, the gradient increases as it cuts through high bluffs. Eagle Lake, Wells and Janesville are the largest towns in the largely rural watershed.

The Watershed Restoration and Protection Strategies Report and TMDLs for the LeSueur River Watershed are being developed by a collaboration of state agencies and local watershed stakeholders.
