

Table of Contents

Document Name	Description
01_Members	Contact information for members of the working group.
02_Executive_Summary	Summary of the MARSS Pilot Project final report.
03_Final_Report	Final report of the MARSS Pilot Project that evaluated requirements, technology and cost estimates to build the MARSS System. The MARSS Pilot Project plans and cost estimates were based on the development phases to be used to build the system. Overall project schedule and cost estimates included in the final report will be affected by changes in requirements or reorganizing a requirement to be included in an earlier phase. Full mapping of specific requirements to the development phase is in 06_Requirements_APPENDIX_B.
04_In_House_Plan	Currently being prepared and will be made available once complete. An additional project plan and cost estimate for building the MARSS system leveraging the existing Revisor technology stack. Modifications to requirements and phases found in 06_Requirement_APPENDIX_B will have impacts on this plan.
05_Glossary_APPENDIX_A	Final report appendix of the glossary of terms used throughout the final report, requirements, and other documentation for the MARSS Pilot Project.
06_Requirements_APPENDIX_B	Final report appendix detailing the system requirements and the development phases that the requirements fall into. See 12a_User_Stories_Without_Hearing, 12b_User_Stories_Admin_Functions, and 12c_User_Stories_Search_View for an alternative more user-friendly description of the primary functionality of the system.
07_Vendors_APPENDIX_C	Final report appendix detailing the vendors contacted for the MARSS Pilot Project.
08_Swimlanes_APPENDIX_D	Final report appendix of swimlane diagrams for several rule proceeding types.
09_Rulemaking_Record_Items	A list of rulemaking record items – both official and supplemental – identified in the MARSS Pilot Project.
10_Life_Cycle_Models	Models that illustrate the life cycles of the rulemakings.
11_Requirements_Refinement_Areas	Listing of areas in the 06_Requirements_APPENDIX_B document that will require the most refinement and expertise of agency personnel to accurately develop the MARSS system.
12a_User_Stories_Without_Hearing	User stories that describe how users will interact with the MARSS system when following the rulemaking proceeding without a hearing. This document will map to the 06_Requirements_APPENDIX_B for specific technical

	requirements that support the user stories. Most requirements are represented in this type of proceeding, however, user stories can be built out for all of the rulemaking proceeding types that will be supported by the MARSS system.
12b_User_Stories_Admin_Functions	User stories that describe how users will interact with the MARSS system when performing administrative functions.
12c_User_Stories_Search_View	User stories that describe how users wishing to search and view information on rulemakings will interact with the system.
13_Background_Presentation	Slides from the PowerPoint presentation about the background of the MARSS Pilot Project.

The documents have been provided to the working group in PDF format. If you need them in an additional format contact the Revisor’s Office. If needed by the working group there are additional materials that were produced with the MARSS Pilot project that can be made available (eg. initial swimlane diagrams for all proceedings the system will support, event and notification matrices).
