NOTE: Laws 1961, Chapter 223, Section 15 reads: "This act shall not be construed as repealing any acts relating to forestry other than herein expressly repealed but shall be deemed and construed as supplementary thereto."

89.01 COMMISSIONER, POWERS AND DUTIES. Subdivision 1. The commissioner shall ascertain and observe the best methods of reforesting cut-over and denuded lands, foresting waste and prairie lands, preventing destruction of forests and lands by fire, administering forests on forestry principles, encouraging private owners to preserve and grow timber for commercial purposes, and conserving the forests around the head waters of streams and on the watersheds of the state.

Subd. 2. The commissioner shall execute all rules and regulations pertaining to forestry and forest protection within the jurisdiction of the state; have charge of the work of protecting all forests and lands from fire; shall investigate the origin of all forest fires; and prosecute all violators as provided by law; shall prepare and print for public distribution an abstract of the forest fire laws of Minnesota, together with such rules and regulations as may be formulated.

STATE FORESTS; TREE PLANTING 89.021

The commissioner shall prepare printed notices calling attention to the dangers from forest fires and cause them to be posted in conspicuous places.

Subd. 3. Damage by fire occurring to state timber, reproduction or lands, when coming to the knowledge of the commissioner, shall be promptly reported to the attorney general, who, at his discretion, may either enforce collection of such demands directly or may employ private attorneys therefor on such terms, not contingent, as he deems for the best interests of the state. The amount so collected, after deducting therefrom the fees of such attorneys, if any, and other necessary expenses incurred in investigation, preparation for trial, and trial, shall be paid into the state treasury and credited to the fund that would have been entitled to receive the sale price of the lands, reproduction, or timber if sold; or, if there be no such fund, then such money shall be credited to the general revenue fund. The attorney general, either in or out of court, may compromise and settle state claims for fire damage to state lands, reproduction, or timber, on such terms as he deems for the best interests of the state.

Subd. 4. The commissioner shall cooperate with the several departments of the state and federal governments and with counties, towns, corporations, or individuals in the preparation of plans for forest protection, management, replacement of trees, wood lots, and timber tracts, using his influence as time will permit toward the establishment of scientific forestry principles in the management, protection, and promotion of the forest resources of the state.

Subd. 5. When any tract or tracts of land that are included in areas set apart as state forests are found to be more valuable for agriculture than for forestry or other conservation purposes, the commissioner by written order may eliminate such lands from state forests whereupon such lands shall be subject to sale the same as other lands not reserved. When any tract or tracts of land that are included in areas set apart as state forests are found to be more valuable for the construction of industrial plants or for purposes including forestry essential to the establishment of or expansion of substantial commercial developments, the commissioner, by written order, with the unanimous approval of the Land Exchange Commission may eliminate such lands from state forests whereupon such lands shall be subject to sale the same as other lands not reserved.

Subd. 6. When any state lands not reserved or set aside are found by the commissioner to be more valuable for the production of timber than for agriculture he may by written order designate such lands as state forest subject to the approval of the state legislature at its next regular session.

89.015 SOUTHERN MINNESOTA TREE SPECIES, RESEARCH. Research shall be carried on by the University of Minnesota School of Forestry in cooperation with the Division of Forestry of the Department of Conservation, Lake States Forest Experiment Station of the United States Forest Service, individual timber land owners and others directly concerned on such valuable southern Minnesota tree species as basswood, red elm, rock elm, red and white oak, black walnut, black cherry, butternut and green ash to develop means of increasing the contribution of the large acreage of farm woodlands to the agricultural economy. The research effort will be concentrated on such important problems as means of reproducing basswood, development of planting stock, selection of superior strains of these species, methods of field planting, management of existing stands, and methods of increasing the representation of these species in woodlands and forests in need of rehabilitation because of past damage from high-grading, burning, and grazing.
