326.243 SAFETY STANDARDS. All electrical wiring, apparatus and equipment for electric light, heat and power shall comply with the rules and regulations of the railroad and warehouse commission, the commissioner of insurance, or the industrial commission, as applicable, and be installed in conformity with accepted standards of construction for safety to life and property. For the purposes of this chapter, the regulations and safety standards stated at the time the work is done in the then most recently published edition of the National Electrical Code as approved by the United States of America Standards Institute, and the National Electrical Safety Code as issued by the National Bureau of Standards, shall be prima facie evidence of accepted standards of construction for safety to life and property; provided further, that in the event a Minnesota building code is formulated pursuant to Minnesota Statutes 1965, Section 16.85, containing approved methods of electrical construction for safety to life and property, compliance with said methods of electrical construction of said Minnesota building code shall also constitute compliance with this section, and provided further, that nothing herein contained shall prohibit any political subdivision from making and enforcing more stringent requirements than set forth herein and such requirements shall be complied with by all licensed electricians working within the jurisdiction of such political subdivisions.

[1967 c 602 s 3]

326.244 INSPECTION. Subdivision 1. **Required inspection.** Except in cities of the first and second class and such other political subdivisions as have inspection similar to that herein provided, every new electrical installation in any construction, remodeling, replacement, or repair, except minor repair work as the same is defined by the board by rule or regulation, shall be inspected by the board for compliance with accepted standards of construction for safety to life and property.

Subd. 2. Procedure. At or before commencement of any installation required to be inspected by the board, the electrical contractor, installer, special electrician, or owner making such installation shall submit to the board a request for inspection, in a form prescribed by the board, together with a supervisory fee of 50 cents and the inspection fees required for such installation.

If the inspector finds that the installation is not in compliance with accepted

standards of construction for safety to life and property as required by section 326.243, he shall by written order condemn the installation or noncomplying portion thereof, or order service to such installation disconnected, and shall send a copy of his order to the board. If the installation or the noncomplying part thereof is such as to seriously and proximately endanger human life and property, the order of the inspector when approved by his superior shall require immediate condemnation or disconnection. In all other cases, the order of the inspector shall permit a reasonable opportunity for the installation to be brought into compliance with accepted standards of construction for safety to life and property prior to the effective time established therein for condemnation or disconnection.

Copies of each condemnation or disconnection order shall be served personally or by mail upon the property owner, and the electrical contractor, installer, or special electrician making the installation, and such other persons as the board by rule or regulation may direct. An aggrieved party may appeal any such condemnation or disconnection order by filing with the board a notice of appeal within ten days after (a) service upon him of the condemnation or disconnection order, if such service is required, or (b) filing of the order with the board, whichever is later. Thereupon the appeal shall proceed and the order of the inspector shall have such effect not inconsistent herewith as the order by its terms and the rules and regulations of the board may provide. The board shall adopt rules or regulations providing procedures for the conduct of such appeals, including provisions for the stay of enforcement of the order of the inspector pending such appeal when justified by the circumstances.

Subd. 3. Duty of electrical utility. No electrical installation subject to inspection by the board shall be newly connected or reconnected for use until there is filed with the electrical utility supplying power a certificate of the property owner or licensed electrician, directing the work that inspection has been requested and that the conditions of the installation are safe for energization, provided further, that in all cases where an order of condemnation or disconnection has been issued against the installation or any part thereof, prior to connection or reconnection there shall also first be filed with the electrical utility supplying the power a copy of an order of the inspector or the board dismissing such prior order of condemnation or disconnection or approving the installation as being in compliance with accepted standards of construction for safety to life and property. With respect to transient projects, the aforesaid certificate shall also contain a certification that the request for inspection has been or will be filed with the board so as to be received by it at least five days prior to the date and time energization of the installation by the utility is to occur, and that the request for inspection states such date and time, and it shall be the responsibility of the board to have inspection of such transient project occur prior to the date and time at which the request states energization is to occur.

Subd. 4. Powers of political subdivisions. Any political subdivision may make provision for inspection of electrical installations within its jurisdiction, in which case it shall keep on file with the board copies of its current inspection ordinances and codes. No political subdivision shall require any individual, partnership, corporation or other business association holding a license from the state board of electricity under Laws 1967, Chapter 602 to pay any license or registration fee, provided however, that any such political subdivision may provide by ordinance a requirement that each individual, partnership, corporation or other business association doing electrical work within the jurisdiction of such political subdivision have on file with said political subdivision a copy of the current license issued by the state board of electricity or such other evidence of such license as may be provided by the state board of electricity.

Each electrical inspector of any political subdivision must be a licensed master or journeyman electrician under section 326.242, subdivision 1(1) or subdivision 2(1) and may not otherwise engage or be employed in the sale or installation of electrical wiring, devices, appliances or equipment, and shall have no financial interest in any concern engaged in any such business.

Subd. 5. Exemptions from inspections. Installations, materials, or equipment shall not be subject to inspection under Laws 1967, Chapter 602:

1. When owned or leased, operated and maintained by any employer whose maintenance electricians are exempt from licensing under Laws 1967, Chapter 602, except any electrical installations in any new construction or major remodeling; or

2. When owned or leased, and operated and maintained by any electric, communications or railway utility in the exercise of its utility function; and

(i) are used in connection with the generations, transformation, distribution, transmission, or metering of electric current, or the operation of railway signals, or the transmission of intelligence, and do not have as a principal function the consumption or use of electric current by or for the benefit of any person other than such utility; and

(ii) are generally accessible only to employees of such utility or persons acting under its control or direction; or

3. When used in the street lighting operations of an electric utility; or

326.61 DEFINITION OF WATER CONDITIONING INSTALLATION. Subdivision 1. "Water conditioning installation" as used in sections 326.57 to 326.66 means the installation of appliances, appurtenances, and fixtures designed to treat water so as to alter, modify, add or remove mineral, chemical or bacterial content, said installation to be made in a water distribution system serving a single family residential unit, which has been initially established by a licensed plumber, and does not involve a direct connection without an air gap to a soil or waste pipe.

Subd. 2. "Water conditioning servicing" as used in sections 326.57 to 326.66 means the servicing (including servicing prior to installation) of a water conditioning installation.

Such regulations, upon approval of the attorney general and their legal publication, shall have the force of law, and the violation of any part thereof shall constitute a misdemeanor. The installation of water heaters shall not constitute water conditioning installation and consequently such work shall be accomplished in accordance with the provisions of sections 326.37 to 326.45.

Subd. 4. "Single family residential unit" as used in sections 326.57 to 326.66 means a building or portion thereof which is arranged, designed, used or intended to be used for residential occupancy by one family, but not including a motel, hotel or rooming house.
