### **32.391 DEFINITIONS; PASTEURIZATION; COOLING AFTER PASTEURIZATION.**

**Subdivision 1. Milk; skim milk; lowfat milk; fluid milk products; goat milk.** Milk is defined as the whole, fresh, clean lacteal secretion, practically free from colostrum, obtained by the complete milking of one or more healthy cows. When prepared for market in final package form for beverage use, milk shall contain not less than 8.7 percent milk solids-not-fat and not less than 3.25 percent of milk fat. The name "milk," unqualified, means cow's milk.

Skim milk is milk from which milk fat has been removed so that its milk fat content is less than .25 percent. Skim milk in final package form for beverage use must contain at least nine percent milk solids-not-fat, for a total of at least 9.25 percent milk solids. Skim milk may be homogenized.

Lowfat milk is milk from which milk fat has been removed so that its milk fat content is either one or two percent, within limits of good manufacturing practices. Lowfat milk in final package form for beverage use must contain at least ten percent milk solids-not-fat. Lowfat milk may be homogenized.

Milk solids-not-fat may be added to fluid milk products to meet the above standards from the following sources: partially-skimmed milk, skim milk, concentrated partially-skimmed milk, concentrated skim milk, and nonfat dry milk, used alone or in any combination.

"Milk solids-not-fat" is the portion of a milk product that is not water and is not fat as determined by procedures outlined in Standard Methods For The Examination Of Dairy Products (fifteenth edition).

Fluid milk products shall be taken to mean and include cream, sour cream, half and half, reconstituted half and half, concentrated milk, concentrated milk products, skim milk, nonfat milk, chocolate flavored milk, chocolate flavored drink, chocolate flavored reconstituted milk, chocolate flavored reconstituted drink, buttermilk, cultured buttermilk, cultured milk, vitamin D milk, reconstituted or recombined milk, reconstituted cream, reconstituted skim milk, homogenized milk, and any other fluid milk product made by the addition of any substance to milk or to any of the above enumerated fluid milk products, when the same is declared to be a fluid milk product by rule promulgated by the commissioner.

Goat milk is a whole, fresh, clean lacteal secretion free from colostrum, obtained by the complete milking of one or more healthy goats.

**Subd. 2. Pasteurization.** The terms "pasteurization," "pasteurized," and similar terms shall be taken to refer (a) to the process of heating every particle of milk, fluid milk products, or goat milk, in properly operated equipment approved by the commissioner, to a temperature of least 143 degrees Fahrenheit and holding such temperature

for at least 30 minutes, or (b) to the process of heating every particle of milk, fluid milk products, or goat milk, in properly operated equipment approved by the commissioner, to a temperature of at least 161 degrees Fahrenheit and holding such temperature for at least 15 seconds, or (c) to the process of heating every particle of milk, fluid milk products, or goat milk, in properly operated equipment approved by the commissioner, to such temperatures and holding for such times as the commissioner may prescribe by rule adopted in accordance with law containing standards more stringent than those imposed by this subdivision. Nothing contained in this definition shall be construed as excluding any other process which has been demonstrated to be equally efficient and is approved by the commissioner.

**Subd. 3. Cooling after pasteurization.** Immediately following pasteurization, all milk, fluid milk products and goat milk shall be cooled, in properly operated equipment approved by the commissioner, to a temperature of 50 degrees Fahrenheit or lower, and maintained at 50 degrees Fahrenheit or lower until delivered; provided, however, that if the milk, fluid milk products, or goat milk is to be cultured immediately after pasteurization, then such cooling may be delayed until after the culturing process is completed; provided further that the commissioner may prescribe by rule adopted in accordance with law standards more stringent than those imposed by this subdivision.

**History:** 1945 c 384 s 1,2; 1953 c 536 s 1; 1967 c 219 s 3-5; 1985 c 248 s 70; 1986 c 354 s 1

**NOTE:** Subdivision 1, as amended by Laws 1986, chapter 354, section 1, is effective the first day of the third month after the governor certifies by executive order published in the State Register that all states in which processors licensed in Minnesota sell milk have in effect content requirements identical to those in subdivision 1. See Laws 1986, chapter 354, section 2.

### 32.392 APPROVAL OF DAIRY PLANTS.

No person shall operate a dairy plant in this state unless the dairy plant, and the equipment, water supply and plumbing system connected therewith shall have been first approved by the commissioner and a permit issued to operate the same. At the time of filing the application for a permit, the applicant shall submit to the commissioner duplicate floor plans of such plant which shall show the placement of equipment, the source of water supply and method of distribution, and the location of the plumbing system, including the disposal of wastes. All new construction or alteration of any existing dairy plants shall be made only with the approval of the commissioner and duplicate plans for such construction or alteration shall be submitted to the commissioner for approval. Any permit may be revoked by the commissioner for due cause after the holder of the permit has been given the opportunity for a hearing, in which case the holder of the permit shall be notified in writing, at least seven days prior to the date of such hearing, of the time and place of such hearing.

**History:** 1945 c 384 s 3; 1949 c 403 s 1; 1953 c 536 s 2; 1955 c 658 s 1; 1967 c 219 s 6; 1986 c 444

### 32.393 LIMITATION ON SALE.

**Subdivision 1. Pasteurization.** No milk, fluid milk products, or goat milk shall be sold, advertised, offered or exposed for sale or held in possession for sale for the purpose of human consumption in fluid form in this state unless the same has been pasteurized and cooled, as defined in section 32.391; provided, that this section shall not apply to milk, cream, skim milk, or goat milk occasionally secured or purchased for personal use by any consumer at the place or farm where the milk is produced.

**Subd. 2. Labels.** All pasteurized milk, fluid milk products, or goat milk sold, offered or exposed for sale or held in possession for sale shall be labeled or otherwise designated as pasteurized milk, pasteurized fluid milk products, or pasteurized goat milk, and in case of pasteurized fluid milk products the label shall also state the name of the specific product.

**History:** 1945 c 384 s 4; 1949 c 403 s 1; 1953 c 536 s 3; 1986 c 444

**32.394 GRADE A PASTEURIZED MILK.**

Subdivision 1. Grade A pasteurized milk, fluid milk products and goat milk are Grade A raw milk, fluid milk products and goat milk for pasteurization which have been pasteurized, cooled and prepared for distribution in a dairy plant approved by the commissioner, the bacterial count of which at no time after pasteurization and until delivery exceeds 30,000 bacteria per milliliter, standard plate count, as determined by averaging the logarithms of the results of the last four consecutive tests of samples taken on separate days, except that such average may be over 30,000 bacteria per milliliter if the last individual result is 30,000 bacteria per milliliter or lower, and not more than one of the last four coliform counts of which shall exceed 10 per milliliter unless the last individual result is 10 per milliliter or lower; provided, that the standard plate count standard shall be omitted in the case of sour cream, cultured buttermilk, other cultured fluid milk products and cultured goat milk; provided further that the commissioner may prescribe standards and rules adopted in accordance with law more stringent than those imposed by this subdivision.

Subd. 2. Grade A raw milk or goat milk for pasteurization purposes is raw milk or goat milk which complies with all the requirements for its production, the bacterial count of which does not exceed 200,000 bacteria per milliliter, standard plate count or direct microscopic clump count, as determined by averaging the logarithms of the results of the last four consecutive tests of samples taken on separate days, except that such average may be over 200,000 bacteria per milliliter if the last individual result is 200,000 bacteria per milliliter or lower; provided that the commissioner may prescribe standards and rules adopted in accordance with law more stringent than those imposed by this subdivision.

Subd. 3. Nothing in this section shall be construed to mean compulsory grading of pasteurized milk, pasteurized fluid milk products, pasteurized goat milk, raw milk for pasteurization, or raw goat milk for pasteurization; such grade shall apply only to pasteurized milk, pasteurized fluid milk products, pasteurized goat milk, raw milk for pasteurization, or raw goat milk for pasteurization on which the grade is declared on the label.

Subd. 4. The commissioner shall by rule promulgate identity, production and processing standards for milk, milk products and goat milk which are intended to bear the Grade A label.

In the exercise of the authority to establish requirements for Grade A milk, milk products and goat milk, the commissioner may adopt definitions, standards of identity, and requirements for production and processing recommended by the United States public health service, in a manner provided for and not in conflict with law.

Subd. 5. No person shall sell, offer or expose for sale, any milk, milk products or goat milk labeled Grade A, unless the milk, milk products or goat milk have been produced and processed in accordance with the requirements of Minnesota law and rule. Any processor desiring to use the Grade A label on milk, milk products or goat milk shall make application for a permit to the commissioner on a form prescribed and furnished by the commissioner. The permit shall be issued by the commissioner when the commissioner has determined that the applicant has complied with the requirements of Minnesota law and rule. Permits shall not be transferable with respect to person or location. A permit may be suspended by the commissioner upon failure by the holder of the permit to comply with any of the terms of Minnesota law and rule or for interference with inspection, and may be revoked by the commissioner for due cause after the holder of the permit has been given the opportunity for a hearing, in which case the holder of the permit shall be given a notice in writing of the time and place of such hearing at least seven days before the date of such hearing.

Subd. 6. To assure compliance with the laws and rules governing the production, handling, processing, and sale of Grade A milk, Grade A milk products and Grade A goat milk, the commissioner is hereby authorized to provide a service to be performed by trained and duly qualified milk sanitarians, for the inspection of such milk, milk products and goat milk, and of the premises and plants where such milk, milk products

and goat milk are produced, handled and processed. Such service shall be for acquainting the processor and producers with the requirements for a Grade A milk supply, for preliminary inspection to determine if a processor has brought the processor's farms and plant to the state of compliance which will qualify the processor's products for the Grade A label, and for continuous inspection to assure that any farms and plants so accepted and all products therefrom so labeled shall remain in compliance. Said Grade A processor shall provide a continuous field service to assist the producers, who sell their milk to the processor's plant, to attain and to maintain compliance with Grade A requirements. Any person who performs such field service for such Grade A processor first shall obtain a permit therefor from the commissioner. Any person desiring to secure such permit shall make application therefor on a form provided by the commissioner, and before a permit is issued the commissioner shall determine that the applicant is competent and qualified to perform such field service. Said permit shall not be transferable and may be revoked for due cause after the holder of the permit has been given the opportunity for a hearing in which case the holder of the permit shall be given a notice in writing of the time and place of such hearing at least seven days before the date of such hearing.

Subd. 7. The aforesaid state service shall be available to all processors who wish to use the Grade A label on their milk, milk products and goat milk and who have not available to them substantially equivalent service, imposed with equal effectiveness by a city within the state.

Subd. 8. **Grade A inspection fees.** A processor or marketing organization of milk, milk products, sheep milk, or goat milk who wishes to market Grade A milk or use the Grade A label must apply for Grade A inspection service from the commissioner. A pasteurization plant requesting Grade A inspection service must hold a Grade A permit and pay an annual inspection fee of no more than \$500. For Grade A farm inspection service, the fee must be no more than \$66 per farm, paid annually by the processor or by the marketing organization on behalf of its patrons. For a farm requiring a reinspection in addition to the required biannual inspections, an additional fee of no more than \$33 per reinspection must be paid by the processor or by the marketing organization on behalf of its patrons. If the commissioner deems it necessary to more nearly meet the cost of the service, the commissioner may annually adjust the assessments within the limits set in this subdivision. No fee increase may be implemented until after the commissioner has held three or more public hearings.

Subd. 8a. A laboratory, before conducting a test the results of which are to be used in the enforcement of requirements for distribution of milk, milk products or goat milk under the Grade A label, must be certified as meeting the requirements for laboratory approval that are established by rule of the commissioner, and must receive a permit from the commissioner. The permit shall remain valid without renewal unless suspended or revoked by the commissioner for failure to comply with the requirements. Satisfactory analytical procedures and results for split samples, the nature, number and frequency of which shall be in accordance with rules established by the commissioner, shall be required of a certified laboratory for retention of its certification and permit.

An application for initial certification or for recertification following suspension or revocation of a permit shall be accompanied by a fee of not less than \$100 nor more than \$350. The fee for each set of split samples shall be not less than \$25 nor more than \$75. The commissioner may annually adjust assessments within the limits established by this subdivision to meet the cost of the services required by this subdivision.

A certified laboratory of record on June 5, 1975 shall be issued a permit without having to pay the initial certification fee.

Subd. 8b. **Manufacturing grade farm certification.** A processor or marketing organization of milk, milk products, sheep milk, or goat milk who wishes to market other than Grade A milk must apply for a manufacturing grade farm certification inspection from the commissioner. A manufacturing plant that pasteurizes milk or milk by-products must pay an annual fee based on the number of pasteurization units.

This fee must not exceed \$140 per unit. The fee for farm certification inspection must not be more than \$33 per farm to be paid annually by the processor or by the marketing organization on behalf of its patrons. For a farm requiring more than the one annual inspection required for certification, an additional fee of no more than \$33 must be paid by the processor or by the marketing organization on behalf of its patrons. The fee must be set by the commissioner in an amount necessary to meet the cost of the service but must not exceed the limits in this subdivision. No fee increase may be implemented until after the commissioner has held three or more public hearings.

**Subd. 9. Payments; refunds; disposition.** Fees are payable by a processor or marketing organization by July 1 of each year for Grade A, and by January 1 of each year for manufacturing grade, and if not paid within 30 days of the due date, the service must be discontinued, and permission to market manufacturing grade or Grade A milk or milk products or use the Grade A label must be withdrawn. A processor may terminate payment and service without loss of the Grade A label if written notice of that intention is given prior to the due date of the payment of an assessment and if the continuous inspection of the plant is assumed by a city whose milk control ordinance is substantially equivalent to Minnesota law and rule and is enforced with equal effectiveness. If a farm discontinues the production of milk within six months of the billing date, a request for a refund based on inspection services not received may be made by the processor or by the marketing organization on behalf of its patrons. This request must be made in writing by July 1 for manufacturing grade, or by December 31 for Grade A, and on approval by the commissioner refunds must be made to the processor or marketing organization.

The fees for services performed by the activities of this section must be deposited in the state treasury and constitute a separate account to be known as the milk inspection service account, which is hereby created, set aside, and appropriated as a revolving fund to be used to help to defray the cost of administration, refunds and expenses of the preliminary and continuous milk inspection services and is in addition to and not in substitution for the sums appropriated or otherwise made available for this purpose to the department of agriculture.
