

CHAPTER 32

DAIRY PRODUCTS

32.01	Definitions.
32.21	Adulterated dairy products.
32.391	Definitions.

32.394	Grade A pasteurized milk.
32.415	Milk for manufacturing; quality standards.

32.01 DEFINITIONS.

[For text of subds 1 to 9, see M.S.2002]

Subd. 10. **Dairy product.** "Dairy product" means milk as defined by Code of Federal Regulations, title 21, cream, any product or by-product of either, or any commodity among the principal constituents or ingredients of which is one or a combination of two or more of them, as determined by standards, grades, or rules duly adopted by the commissioner.

[For text of subds 11 and 12, see M.S.2002]

History: 2003 c 107 s 20

32.21 ADULTERATED DAIRY PRODUCTS.

[For text of subds 1 to 3, see M.S.2002]

Subd. 4. **Penalties.** (a) A person, other than a milk producer, who violates this section is guilty of a misdemeanor or subject to a civil penalty up to \$1,000.

(b) A milk producer may not change milk plants within 30 days, without permission of the commissioner, after receiving notification from the commissioner under paragraph (c) or (d) that the milk producer has violated this section.

(c) A milk producer who violates subdivision 3, clause (1), (2), (3), (4), or (5), is subject to clauses (1) to (3) of this paragraph.

(1) Upon notification of the first violation in a 12-month period, the producer must meet with the qualified dairy sanitarian to initiate corrective action within 30 days.

(2) Upon the second violation within a 12-month period, the producer is subject to a civil penalty of \$300. The commissioner shall notify the producer by certified mail stating the penalty is payable in 30 days, the consequences of failure to pay the penalty, and the consequences of future violations.

(3) Upon the third violation within a 12-month period, the producer is subject to an additional civil penalty of \$300 and possible revocation of the producer's permit or certification. The commissioner shall notify the producer by certified mail that all civil penalties owed must be paid within 30 days and that the commissioner is initiating administrative procedures to revoke the producer's permit or certification to sell milk for at least 30 days.

(d) The producer's shipment of milk must be immediately suspended if the producer is identified as an individual source of milk containing residues causing a bulk load of milk to test positive in violation of subdivision 3, clause (6) or (7). The Grade A or manufacturing grade permit must be converted to temporary status for not more than 30 days and shipment may resume only after subsequent milk has been sampled by the commissioner or the commissioner's agent and found to contain no residues above established tolerances or safe levels.

The Grade A or manufacturing grade permit may be restored if the producer completes the "Milk and Dairy Beef Residue Prevention Protocol" with a licensed veterinarian, displays the signed certificate in the milkhouse, and sends verification to the commissioner within the 30-day temporary permit status period. If the producer does not comply within the temporary permit status period, the Grade A or manufacturing grade permit must be suspended. A milk producer whose milk supply is in

violation of subdivision 3, clause (6) or (7), and has caused a bulk load to test positive is subject to clauses (1) to (3) of this paragraph.

(1) For the first violation in a 12-month period, the penalty is the value of all milk on the contaminated load plus any costs associated with the disposition of the contaminated load. Future pickups are prohibited until subsequent testing reveals the milk is free of drug residue. A farm inspection must be completed by a qualified dairy sanitarian and the producer to determine the cause of the residue and actions required to prevent future violations.

(2) For the second violation in a 12-month period, the penalty is the value of all milk on the contaminated load plus any costs associated with the disposition of the contaminated load. Future pickups are prohibited until subsequent testing reveals the milk is free of drug residue. A farm inspection must be completed by the regulatory agency or its agent to determine the cause of the residue and actions required to prevent future violations.

(3) For the third violation in a 12-month period, the penalty is the value of all milk on the contaminated load plus any costs associated with the disposition of the contaminated load. Future pickups are prohibited until subsequent testing reveals the milk is free of drug residue. The commissioner or the commissioner's agent shall also notify the producer by certified mail that the commissioner is initiating administrative procedures to revoke the producer's right to sell milk for a minimum of 30 days.

(4) If a bulk load of milk tests negative for residues and there is a positive producer sample on the load, no civil penalties may be assessed to the producer. The plant must report the positive result within 24 hours and reject further milk shipments from that producer until the producer's milk tests negative. A farm inspection must be completed by the plant representative and the producer to determine the cause of the residue and actions required to prevent future violations. The department shall suspend the producer's permit and count the violation on the producer's record. The Grade A or manufacturing grade permit must be converted to temporary status for not more than 30 days during which time the producer must review the "Milk and Dairy Beef Residue Prevention Protocol" with a licensed veterinarian, display the signed certificate in the milkhouse, and send verification to the commissioner. If these conditions are met, the Grade A or manufacturing grade permit must be reinstated. If the producer does not comply within the temporary permit status period, the Grade A or manufacturing grade permit must be suspended.

(e) A milk producer that has been certified as completing the "Milk and Dairy Beef Residue Prevention Protocol" within 12 months of the first violation of subdivision 3, clause (7), need only review the cause of the violation with a field service representative within three days to maintain Grade A or manufacturing grade permit and shipping status if all other requirements of this section are met.

(f) Civil penalties collected under this section must be deposited in the milk inspection services account established in this chapter.

History: 2003 c 107 s 21

32.391 DEFINITIONS.

[For text of subd 1, see M.S.2002]

Subd. 1a. [Repealed, 2003 c 107 s 33]

Subd. 1b. [Repealed, 2003 c 107 s 33]

Subd. 1c. [Repealed, 2003 c 107 s 33]

[For text of subs 1d to 3, see M.S.2002]

32.394 GRADE A PASTEURIZED MILK.

[For text of subs 1 to 3, see M.S.2002]

Subd. 4. **Rules.** The commissioner shall by rule promulgate identity, production and processing standards for milk, milk products and goat milk which are intended to bear the Grade A label.

In the exercise of the authority to establish requirements for Grade A milk, milk products, and goat milk, the commissioner adopts definitions, standards of identity, and requirements for production and processing contained in the "2001 Grade A Pasteurized Milk Ordinance" and the "1995 Grade A Condensed and Dry Milk Ordinance" of the United States Department of Health and Human Services, in a manner provided for and not in conflict with law.

[For text of subds 5 to 7, see M.S.2002]

Subd. 8. Grade A inspection fees. A processor or marketing organization of milk, milk products, sheep milk, or goat milk who wishes to market Grade A milk or use the Grade A label must apply for Grade A inspection service from the commissioner. A pasteurization plant requesting Grade A inspection service must hold a Grade A permit and pay an annual inspection fee of no more than \$500. For Grade A farm inspection service, the fee must be no more than \$50 per farm, paid annually by the processor or by the marketing organization on behalf of its patrons. For a farm requiring a reinspection in addition to the required biannual inspections, an additional fee of \$45 per reinspection must be paid by the processor or by the marketing organization on behalf of its patrons.

[For text of subd 8a, see M.S.2002]

Subd. 8b. Manufacturing grade farm certification. A processor or marketing organization of milk, milk products, sheep milk, or goat milk who wishes to market other than Grade A milk must apply for a manufacturing grade farm certification inspection from the commissioner. A manufacturing plant that pasteurizes milk or milk by-products must pay an annual fee based on the number of pasteurization units. This fee must not exceed \$140 per unit. The fee for farm certification inspection must not be more than \$25 per farm to be paid annually by the processor or by the marketing organization on behalf of its patrons. For a farm requiring more than the one inspection for certification, a reinspection fee of \$45 must be paid by the processor or by the marketing organization on behalf of its patrons.

Subd. 8c. Grade A or manufacturing grade raw milk. Grade A or manufacturing grade raw milk must not have been stored longer than 72 hours when it is picked up at the farm by the receiving plant. The commissioner or an agent of the commissioner may waive the 72-hour time limit in a case of hardship, emergency, or natural disaster. On farms permitted or certified for bulk tank storage, the milk may only be picked up from approved bulk milk tanks in proper working order.

Subd. 8d. Processor assessment. (a) A manufacturer shall pay to the commissioner a fee for fluid milk processed and milk used in the manufacture of fluid milk products sold for retail sale in Minnesota in an amount not less than five cents and not more than nine cents per hundredweight as set by the commissioner's order except that beginning July 1, 2003, the fee is set at seven cents per hundredweight and thereafter no change within any 12-month period may be in excess of one cent per hundredweight.

(b) Processors must report quantities of milk processed under paragraph (a) on forms provided by the commissioner. Processor fees must be paid monthly. The commissioner may require the production of records as necessary to determine compliance with this subdivision.

(c) The commissioner may create within the department a dairy consulting program to provide assistance to dairy producers who are experiencing problems meeting the sanitation and quality requirements of the dairy laws and rules.

The commissioner may use money appropriated from the dairy services account created in subdivision 9 to pay for the program authorized in this paragraph.

[For text of subds 8e to 12, see M.S.2002]

History: 2003 c 107 s 22,23; 2003 c 128 art 3 s 31-33

32.415 MILK FOR MANUFACTURING; QUALITY STANDARDS.

(a) The commissioner may adopt rules to provide uniform quality standards, and producers of milk used for manufacturing purposes shall conform to the standards contained in Subparts B, C, D, E, and F of the United States Department of Agriculture Consumer and Marketing Service Recommended Requirements for Milk for Manufacturing Purposes and its Production and Processing, as revised through June 17, 2002, except that the commissioner shall develop methods by which producers can comply with the standards without violation of religious beliefs.

(b) The commissioner shall perform or contract for the performance of the inspections necessary to implement this section or shall certify dairy industry personnel to perform the inspections.

(c) The commissioner and other employees of the department shall make every reasonable effort to assist producers in achieving the milk quality standards at minimum cost and to use the experience and expertise of the University of Minnesota and the Agricultural Extension Service to assist producers in achieving the milk quality standards in the most cost-effective manner.

(d) The commissioner shall consult with producers, processors, and others involved in the dairy industry in order to prepare for the implementation of this section including development of informational and educational materials, meetings, and other methods of informing producers about the implementation of standards under this section.
