

298.227 TACONITE ECONOMIC DEVELOPMENT FUND.

(a) An amount equal to that distributed pursuant to each taconite producer's taxable production and qualifying sales under section 298.28, subdivision 9a, shall be held by the Iron Range Resources and Rehabilitation Board in a separate taconite economic development fund for each taconite and direct reduced ore producer. Money from the fund for each producer shall be released by the commissioner after review by a joint committee consisting of an equal number of representatives of the salaried employees and the nonsalaried production and maintenance employees of that producer. The District 11 director of the United States Steelworkers of America, on advice of each local employee president, shall select the employee members. In nonorganized operations, the employee committee shall be elected by the nonsalaried production and maintenance employees. The review must be completed no later than six months after the producer presents a proposal for expenditure of the funds to the committee. The funds held pursuant to this section may be released only for workforce development and associated public facility improvement, or for acquisition of plant and stationary mining equipment and facilities for the producer or for research and development in Minnesota on new mining, or taconite, iron, or steel production technology, but only if the producer provides a matching expenditure equal to the amount of the distribution to be used for the same purpose beginning with distributions in 2014. Effective for proposals for expenditures of money from the fund beginning May 26, 2007, the commissioner may not release the funds before the next scheduled meeting of the board. If a proposed expenditure is not approved by the board, the funds must be deposited in the Taconite Environmental Protection Fund under sections 298.222 to 298.225. If a producer uses money which has been released from the fund prior to May 26, 2007 to procure haulage trucks, mobile equipment, or mining shovels, and the producer removes the piece of equipment from the taconite tax relief area defined in section 273.134 within ten years from the date of receipt of the money from the fund, a portion of the money granted from the fund must be repaid to the taconite economic development fund. The portion of the money to be repaid is 100 percent of the grant if the equipment is removed from the taconite tax relief area within 12 months after receipt of the money from the fund, declining by ten percent for each of the subsequent nine years during which the equipment remains within the taconite tax relief area. If a taconite production facility is sold after operations at the facility had ceased, any money remaining in the fund for the former producer may be released to the purchaser of the facility on the terms otherwise applicable to the former producer under this section. If a producer fails to provide matching funds for a proposed expenditure within six months after the commissioner approves release of the funds, the funds are available for release to another producer in proportion to the distribution provided and under the conditions of this section. Any portion of the fund which is not released by the commissioner within one year of its deposit in the fund shall be divided between the taconite environmental protection fund created in section 298.223 and the Douglas J. Johnson economic protection trust fund created in section 298.292 for placement in their respective special accounts. Two-thirds of the unreleased funds shall be distributed to the taconite environmental protection fund and one-third to the Douglas J. Johnson economic protection trust fund.

(b)(i) Notwithstanding the requirements of paragraph (a), setting the amount of distributions and the review process, an amount equal to ten cents per taxable ton of production in 2007, for distribution in 2008 only, that would otherwise be distributed under paragraph (a), may be used for a loan or grant for the cost of providing for a value-added wood product facility located in the taconite tax relief area and in a county that contains a city of the first class. This amount must be deducted from the distribution under paragraph (a) for which a matching expenditure by the producer is not required. The granting of the loan or grant is subject to approval by the board. If the money is provided as a loan, interest must be payable on the loan at the rate prescribed in section 298.2213, subdivision 3. (ii) Repayments of the loan and interest, if any, must be deposited in the taconite environment protection fund under sections 298.222 to 298.225. If a loan or grant is not made under this paragraph by July 1, 2012, the amount that had been made available for the

loan under this paragraph must be transferred to the taconite environment protection fund under sections 298.222 to 298.225. (iii) Money distributed in 2008 to the fund established under this section that exceeds ten cents per ton is available to qualifying producers under paragraph (a) on a pro rata basis.

(c) Repayment or transfer of money to the taconite environmental protection fund under paragraph (b), item (ii), must be allocated by the Iron Range Resources and Rehabilitation Board for public works projects in house legislative districts in the same proportion as taxable tonnage of production in 2007 in each house legislative district, for distribution in 2008, bears to total taxable tonnage of production in 2007, for distribution in 2008. Notwithstanding any other law to the contrary, expenditures under this paragraph do not require approval by the governor. For purposes of this paragraph, "house legislative districts" means the legislative districts in existence on May 15, 2009.
