

62U.10 HEALTH CARE TRANSFER, SAVINGS, AND REPAYMENT.

Subdivision 1. **Health care access fund transfer.** On June 30, 2009, the commissioner of management and budget shall transfer \$50,000,000 from the health care access fund to the general fund.

Subd. 2. **Projected spending baseline.** (a) By June 1, 2009, the commissioner of health shall calculate the annual projected total private and public health care spending for residents of this state and establish a health care spending baseline, beginning for calendar year 2008 and for the next ten years based on the annual projected growth in spending.

(b) In establishing the health care spending baseline, the commissioner shall use the Centers for Medicare and Medicaid Services forecast for total growth in national health care expenditures and adjust this forecast to reflect the demographics, health status, and other factors deemed necessary by the commissioner. The commissioner shall contract with an actuarial consultant to make recommendations for the adjustments needed to specifically reflect projected spending for residents of this state.

(c) The commissioner may adjust the projected baseline as necessary to reflect any updated federal projections or account for unanticipated changes in federal policy.

(d) Medicare and long-term care spending must not be included in the calculations required under this section.

Subd. 3. **Actual spending and savings determination.** By June 1, 2010, and each June 1 thereafter until June 1, 2020, the commissioner of health shall determine the actual total private and public health care spending for residents of this state for the calendar year two years before the current calendar year, based on data collected under chapter 62J, and shall determine the difference between the projected spending, as determined under subdivision 2, and the actual spending for that year. The actual spending must be certified by an independent actuarial consultant. If the actual spending is less than the projected spending, the commissioner shall determine, based on the proportion of spending for state-administered health care programs to total private and public health care spending for the calendar year two years before the current calendar year, the percentage of the calculated aggregate savings amount accruing to state-administered health care programs.

Subd. 4. **Repayment of transfer.** When accumulated savings accruing to state-administered health care programs, as calculated under subdivision 3, meet or exceed \$50,000,000, the commissioner of health shall certify that event to the commissioner of management and budget. In the next fiscal year following the certification, the commissioner of management and budget shall transfer \$50,000,000 from the general fund to the health care access fund. The amount necessary to make the transfer is appropriated from the general fund to the commissioner of management and budget.

Subd. 5. **Definitions.** (a) For purposes of this section, the following definitions apply.

(b) "Public health care spending" means spending for a state-administered health care program.

(c) "State-administered health care program" means medical assistance, MinnesotaCare, and the state employee group insurance program.

Subd. 6. **Projected spending baseline.** Beginning February 15, 2016, and each February 15 thereafter, the commissioner of health shall report the projected impact on spending from specified health indicators related to various preventable illnesses and death. The impacts shall be reported over a ten-year time frame using a baseline forecast of private and public health care and long-term care spending for residents of this

state, beginning with calendar year 2009 projected estimates of costs, and updated annually for each of the following health indicators:

- (1) costs related to rates of obesity, including obesity-related cancers, coronary heart disease, stroke, and arthritis;
- (2) costs related to the utilization of tobacco products;
- (3) costs related to hypertension;
- (4) costs related to diabetes or prediabetes; and
- (5) costs related to dementia and chronic disease among an elderly population over 60, including additional long-term care costs.

Subd. 7. **Outcomes reporting; savings determination.** (a) Beginning November 1, 2016, and each November 1 thereafter, the commissioner of health shall determine the actual total private and public health care and long-term care spending for Minnesota residents related to each health indicator projected in subdivision 6 for the most recent calendar year available. The commissioner shall determine the difference between the projected and actual spending for each health indicator and for each year, and determine the savings attributable to changes in these health indicators. The assumptions and research methods used to calculate actual spending must be determined to be appropriate by an independent actuarial consultant. If the actual spending is less than the projected spending, the commissioner, in consultation with the commissioners of human services and management and budget, shall use the proportion of spending for state-administered health care programs to total private and public health care spending for each health indicator for the calendar year two years before the current calendar year to determine the percentage of the calculated aggregate savings amount accruing to state-administered health care programs.

(b) The commissioner may use the data submitted under section 62U.04, subdivisions 4 and 5, to complete the activities required under this section, but may only report publicly on regional data aggregated to granularity of 25,000 lives or greater for this purpose.

Subd. 8. **Transfers.** When accumulated annual savings accruing to state-administered health care programs, as calculated under subdivision 7, meet or exceed \$50,000,000 for all health indicators in aggregate statewide, the commissioner of health shall certify that event to the commissioner of management and budget, no later than December 15 of each year. In the next fiscal year following the certification, the commissioner of management and budget shall transfer \$50,000,000 from the general fund to the health care access fund. This transfer shall repeat in each fiscal year following subsequent certifications of additional cumulative savings, up to \$50,000,000 per year. The amount necessary to make the transfer is appropriated from the general fund to the commissioner of management and budget.
