Subd. 4. **Radon warning statement.** The radon warning statement must include the following language:

"Radon Warning Statement

The Minnesota Department of Health strongly recommends that ALL homebuyers have an indoor radon test performed prior to purchase or taking occupancy, and recommends having the radon levels mitigated if elevated radon concentrations are found. Elevated radon concentrations can easily be reduced by a qualified, certified, or licensed, if applicable, radon mitigator.

Every buyer of any interest in residential real property is notified that the property may present exposure to dangerous levels of indoor radon gas that may place the occupants at risk of developing radon-induced lung cancer. Radon, a Class A human carcinogen, is the leading cause of lung cancer in nonsmokers and the second leading cause overall. The seller of any interest in residential real property is required to provide the buyer with any information on radon test results of the dwelling."

Subd. 5. **Liability; transfer not invalidated.** (a) A seller who fails to make a radon disclosure as required by this section, and is aware of material facts pertaining to radon concentrations in the dwelling, is liable to the buyer.

(b) A buyer who is injured by a violation of this section may bring a civil action and recover damages and receive other equitable relief as determined by the court. An action under this subdivision must be commenced within two years after the date on which the buyer closed the purchase or transfer of the real property.

(c) This section does not invalidate a transfer solely because of the failure of any person to comply with a provision of this section. This section does not prevent a court from ordering a rescission of the transfer.

Subd. 6. **Effective date.** This section is effective January 1, 2014, and applies to agreements to sell or transfer residential real property executed on or after that date.
