

144E.101 AMBULANCE SERVICE REQUIREMENTS.

Subdivision 1. **Personnel.** (a) No publicly or privately owned ambulance service shall be operated in the state unless its ambulance service personnel are certified, appropriate to the type of ambulance service being provided, according to section 144E.28 or meet the staffing criteria specific to the type of ambulance service.

(b) An ambulance service shall have a medical director as provided under section 144E.265.

Subd. 2. **Patient care.** When a patient is being transported, at least one of the ambulance service personnel must be in the patient compartment. If advanced life-support procedures are required, a paramedic, a registered nurse qualified under section 144E.001, subdivision 3a, clause (2), item (i), or a physician assistant qualified under section 144E.001, subdivision 3a, clause (3), item (i), shall be in the patient compartment.

Subd. 3. **Continual service.** An ambulance service shall offer service 24 hours per day every day of the year, unless otherwise authorized under subdivisions 8 and 9.

Subd. 4. **Denial of service prohibited.** An ambulance service shall not deny prehospital care to a person needing emergency ambulance service because of inability to pay or because of the source of payment for services if the need develops within the licensee's primary service area or when responding to a mutual aid call. Transport for the patient may be limited to the closest appropriate emergency medical facility.

Subd. 5. **Types of service.** The board shall regulate the following types of ambulance service:

- (1) basic life support;
- (2) advanced life support;
- (3) part-time advanced life support; and
- (4) specialized life support.

Subd. 6. **Basic life support.** (a) Except as provided in paragraph (e), a basic life-support ambulance shall be staffed by at least two EMTs, one of whom must accompany the patient and provide a level of care so as to ensure that:

- (1) life-threatening situations and potentially serious injuries are recognized;
- (2) patients are protected from additional hazards;
- (3) basic treatment to reduce the seriousness of emergency situations is administered; and
- (4) patients are transported to an appropriate medical facility for treatment.

(b) A basic life-support service shall provide basic airway management.

(c) A basic life-support service shall provide automatic defibrillation.

(d) A basic life-support service licensee's medical director may authorize ambulance service personnel to perform intravenous infusion and use equipment that is within the licensure level of the ambulance service, including administration of an opiate antagonist. Ambulance service personnel must be properly trained. Documentation of authorization for use, guidelines for use, continuing education, and skill verification must be maintained in the licensee's files.

(e) For emergency ambulance calls and interfacility transfers, an ambulance service may staff its basic life-support ambulances with one EMT, who must accompany the patient, and one registered emergency medical responder driver. For purposes of this paragraph, "ambulance service" means either an ambulance service whose primary service area is mainly located outside the metropolitan counties listed in section 473.121, subdivision 4, and outside the cities of Duluth, Mankato, Moorhead, Rochester, and St. Cloud; or an ambulance service based in a community with a population of less than 2,500.

Subd. 7. **Advanced life support.** (a) Except as provided in paragraphs (f) and (g), an advanced life-support ambulance shall be staffed by at least:

(1) one EMT or one AEMT and one paramedic;

(2) one EMT or one AEMT and one registered nurse who is an EMT or an AEMT, is currently practicing nursing, and has passed a paramedic practical skills test approved by the board and administered by an education program; or

(3) one EMT or one AEMT and one physician assistant who is an EMT or an AEMT, is currently practicing as a physician assistant, and has passed a paramedic practical skills test approved by the board and administered by an education program.

(b) An advanced life-support service shall provide basic life support, as specified under subdivision 6, paragraph (a), advanced airway management, manual defibrillation, and administration of intravenous fluids and pharmaceuticals.

(c) In addition to providing advanced life support, an advanced life-support service may staff additional ambulances to provide basic life support according to subdivision 6 and section 144E.103, subdivision 1.

(d) An ambulance service providing advanced life support shall have a written agreement with its medical director to ensure medical control for patient care 24 hours a day, seven days a week. The terms of the agreement shall include a written policy on the administration of medical control for the service. The policy shall address the following issues:

(1) two-way communication for physician direction of ambulance service personnel;

(2) patient triage, treatment, and transport;

(3) use of standing orders; and

(4) the means by which medical control will be provided 24 hours a day.

The agreement shall be signed by the licensee's medical director and the licensee or the licensee's designee and maintained in the files of the licensee.

(e) When an ambulance service provides advanced life support, the authority of a paramedic, Minnesota registered nurse-EMT, or Minnesota registered physician assistant-EMT to determine the delivery of patient care prevails over the authority of an EMT.

(f) Upon application from an ambulance service that includes evidence demonstrating hardship, the board may grant a variance from the staff requirements in paragraph (a), clause (1), and may authorize an advanced life-support ambulance to be staffed by a registered emergency medical responder driver with a paramedic for all emergency calls and interfacility transfers. The variance shall apply to advanced life-support ambulance services until the ambulance service renews its license. When the variance expires, an ambulance service may apply for a new variance under this paragraph. This paragraph applies only to an ambulance

service whose primary service area is mainly located outside the metropolitan counties listed in section 473.121, subdivision 4, and outside the cities of Duluth, Mankato, Moorhead, Rochester, and St. Cloud, or an ambulance based in a community with a population of less than 1,000 persons.

(g) After an initial emergency ambulance call, each subsequent emergency ambulance response, until the initial ambulance is again available, and interfacility transfers, may be staffed by one registered emergency medical responder driver and an EMT or paramedic. This paragraph applies only to an ambulance service whose primary service area is mainly located outside the metropolitan counties listed in section 473.121, subdivision 4, and outside the cities of Duluth, Mankato, Moorhead, Rochester, and St. Cloud, or an ambulance based in a community with a population of less than 1,000 persons.

Subd. 8. **Part-time advanced life support.** (a) A part-time advanced life-support service shall meet the staffing requirements under subdivision 7, paragraph (a); provide service as required under subdivision 7, paragraph (b), for less than 24 hours every day; and meet the equipment requirements specified in section 144E.103.

(b) A part-time advanced life-support service shall have a written agreement with its medical director to ensure medical control for patient care during the time the service offers advanced life support. The terms of the agreement shall include a written policy on the administration of medical control for the service and address the issues specified in subdivision 7, paragraph (d).

Subd. 9. **Specialized life support.** A specialized ground life-support service providing advanced life support shall be staffed by at least one EMT and one paramedic, registered nurse-EMT, or physician assistant-EMT. A specialized life-support service shall provide basic or advanced life support as designated by the board, and shall be restricted by the board to:

- (1) operation less than 24 hours of every day;
- (2) designated segments of the population;
- (3) certain types of medical conditions; or
- (4) air ambulance service that includes fixed-wing or rotor-wing.

Subd. 10. **Driver.** A driver of an ambulance must possess a valid driver's license issued by any state and must have attended an emergency vehicle driving course approved by the licensee. The emergency vehicle driving course must include actual driving experience.

Subd. 11. **Personnel roster and files.** (a) An ambulance service shall maintain:

- (1) at least two ambulance service personnel on a written on-call schedule;
- (2) a current roster of its ambulance service personnel, including the name, address, and qualifications of its ambulance service personnel; and
- (3) files documenting personnel qualifications.

(b) A licensee shall maintain in its files the name and address of its medical director and a written statement signed by the medical director indicating acceptance of the responsibilities specified in section 144E.265, subdivision 2.

Subd. 12. **Mutual aid agreement.** (a) A licensee shall have a written agreement with at least one neighboring licensed ambulance service for the preplanned and organized response of emergency medical

services, and other emergency personnel and equipment, to a request for assistance in an emergency when local ambulance transport resources have been expended. The response is predicated upon formal agreements among participating ambulance services. A copy of each mutual aid agreement shall be maintained in the files of the licensee.

(b) A licensee may have a written agreement with a neighboring licensed ambulance service, including a licensed ambulance service from a neighboring state if that service is currently and remains in compliance with its home state licensing requirements, to provide part-time support to the primary service area of the licensee upon the licensee's request. The agreement may allow the licensee to suspend ambulance services in its primary service area during the times the neighboring licensed ambulance service has agreed to provide all emergency services to the licensee's primary service area. The agreement may not permit the neighboring licensed ambulance service to serve the licensee's primary service area for more than 12 hours per day. This paragraph applies only to an ambulance service whose primary service area is mainly located outside the metropolitan counties listed in section 473.121, subdivision 4, and outside the cities of Duluth, Mankato, Moorhead, Rochester, and St. Cloud, or an ambulance based in a community with a population of less than 2,500 persons.

Subd. 13. **Service outside primary service area.** A licensee may provide its services outside of its primary service area only if requested by a transferring physician or ambulance service licensed to provide service in the primary service area when it can reasonably be expected that:

- (1) the response is required by the immediate medical need of an individual; and
- (2) the ambulance service licensed to provide service in the primary service area is unavailable for appropriate response.

Subd. 14. **Trauma triage and transport guidelines.** By July 1, 2010, a licensee shall have written age appropriate trauma triage and transport guidelines consistent with the criteria issued by the Trauma Advisory Council established under section 144.608 and approved by the board. The board may approve a licensee's requested deviations to the guidelines due to the availability of local or regional trauma resources if the changes are in the best interest of the patient's health.
