**145C.17 OPIOID INSTRUCTIONS ENTERED INTO HEALTH RECORD.**

At the request of the patient or health care agent, a health care provider shall enter into the patient's health care record any instructions relating to administering, dispensing, or prescribing an opioid. A health care provider presented with a nonopioid directive executed by or on behalf of a patient must include the nonopioid directive in the patient's health care record. A health care provider receiving notice of revocation of a patient's nonopioid directive must note the revocation in the patient's health care record.
