28A.07 ISSUANCE OF LICENSE.

Prior to the issuance or renewal of any license herein, the commissioner may cause appropriate inspections to be made to determine under applicable statutory and promulgated rule requirements, the applicant's risk category and fitness to engage in the business activities described in that person's license application. A valid and properly displayed license shall be sufficient to allow the licensee to engage in the manner of food handling so described in the licensee's application, provided that the commissioner may withhold authorization to engage in any aspects of business for which the applicant is not deemed fit under this section. A licensee may, at any time, apply to change such application which shall then be considered by the commissioner in the same manner as a new or renewal application hereunder.
