### **353F.025 WITHDRAWAL LIABILITY.**

Subdivision 1. **Eligibility determination and calculation of withdrawal liability.** (a) This section applies to any governmental subdivision that privatizes.

(b) Before the effective date of privatization, an officer of the governmental subdivision that is privatizing or that has control or ownership of an entity that is privatizing must submit to the executive director a resolution from the governing body of the governmental subdivision stating the following:

(1) that it is the intention of the governmental subdivision to privatize or to engage in a privatization that will result in the controlled or owned entity becoming privatized; and

(2) that the governmental subdivision will reimburse the association for the cost to calculate withdrawal liability under paragraph (d).

(c) The governing body must also provide to the executive director a copy of the purchase, lease, or other transaction agreement and any other information requested by the executive director to allow the executive director to determine whether the employer, after the privatization, will be a governmental subdivision or a privatized employer, making the employees ineligible for continued coverage as active members of the general employees retirement plan.

(d) If, within 30 days after receipt of the resolution and information under paragraph (b), the executive director determines that the employer after the privatization will not be a governmental subdivision, the executive director must direct the consulting actuary retained by the association under section 356.214 to calculate the withdrawal liability to be incurred by the privatized employer on the effective date of the privatization. Withdrawal liability and present value must be calculated as provided in paragraphs (e) and (f), respectively.

(e) Withdrawal liability is equal to the present value of accrued benefits attributable to the privatizing active employees minus the product of:

- (1) the present value of accrued benefits attributable to the privatizing active employees; and
- (2) the general plan's funding ratio.

If the withdrawal liability is a negative number, the withdrawal liability is zero. Withdrawal liability must be calculated using the most recently completed actuarial valuation before the effective date of privatization.

(f) Present value of accrued benefits is determined using the actuarial assumptions under section 356.215, subdivision 8, for the general plan. The present value of accrued benefits does not include projected compensation or projected service.

(g) The governmental subdivision must reimburse the association for the cost of calculating the withdrawal liability.

*[See Note.]*

Subd. 1a. **Payment of withdrawal liability.** No later than six months after the effective date of privatization, the privatized employer must pay the withdrawal liability calculated under subdivision 1 to the general employees retirement fund, unless the privatized employer elects a payment plan. In lieu of a single withdrawal liability payment, the privatized employer may elect to pay the withdrawal liability with interest compounded annually at the applicable rate or rates specified in section 356.59, subdivision 3, in equal annual payments for a term of no longer than ten years. The obligation to pay under this subdivision is binding upon the privatized employer and its successors and assignees.

*[See Note.]*

Subd. 2. **Reporting privatizations.** (a) The association must maintain a record of the consulting actuary's calculation of withdrawal liability under subdivision 1 and any associated report. The calculation and any associated report must be made publicly available and provided to:

- (1) the board of trustees;
- (2) the chair and the executive director of the Legislative Commission on Pensions and Retirement; and
- (3) the chairs and the ranking minority members of the legislative committees with jurisdiction over governmental operations.

(b) The association must maintain a list that includes the names of all privatized employers in the association's annual comprehensive financial report and on the association's website. Beginning July 1, 2027, the association must also include in the list the amount of the withdrawal liability determined as of the

effective date of privatization and the remaining amount, if any, of withdrawal liability due to be paid for each privatized employer.

### **353F.03 VESTING RULE FOR CERTAIN EMPLOYEES.**

Notwithstanding any provision of chapter 353 to the contrary, a privatized employee is eligible to receive a retirement annuity under section 353.29 of the edition of Minnesota Statutes published in the year before the year in which the privatization occurred, without regard to the requirement specified in section 353.01, subdivision 47.

Subdivision 1. **Enhanced augmentation rates.** (a) The deferred annuity of a privatized employee is subject to augmentation under section 353.34, subdivision 3, except that the rate of augmentation is as specified in this section.

(b) This paragraph applies if the effective date of privatization was on or before January 1, 2007, and also applies to Hutchinson Area Health Care with a privatization effective date of January 1, 2008. For a privatized employee, the augmentation rate is 5.5 percent compounded annually until January 1 following the year in which the privatized employee attains age 55. After that date, the augmentation rate is 7.5 percent compounded annually.

(c) If paragraph (b) is not applicable, and if the effective date of the privatization is after January 1, 2007, and before January 1, 2011, then the augmentation rate is four percent compounded annually until January 1, following the year in which the privatized employee attains age 55. After that date, the augmentation rate is six percent compounded annually.

(d) If the effective date of the privatization is after December 31, 2010, the augmentation rate depends on the result of computations specified in section 353F.025, subdivision 1. If those computations indicate no loss or a net gain to the general employees retirement fund, the augmentation rate is two percent compounded annually. If the computations under that subdivision indicate a net loss to the fund if a two percent augmentation rate is used, but a net gain or no loss if a one percent rate is used, then the augmentation rate is one percent compounded annually.

(e) Notwithstanding paragraphs (b) to (d), after June 30, 2020, and before January 1, 2024, the augmentation rate for all privatized employees under paragraphs (b) to (d) is two percent compounded annually. After December 31, 2023, no additional augmentation is applied to the deferred annuities of privatized employees.

Subd. 2. **Exceptions.** The augmentation rates specified in subdivision 1 do not apply to a privatized employee:

(1) beginning the first of the month in which the privatized employee becomes covered again by a retirement plan enumerated in section 356.30, subdivision 3, if the employee accrues at least six months of credited service in any single plan enumerated in section 356.30, subdivision 3, except clause (6);

(2) beginning the first of the month in which the privatized employee becomes covered again by the general employees retirement plan;

(3) beginning the first of the month after a privatized employee terminates service with the privatized employer;

(4) if the privatized employee begins receipt of a retirement annuity while employed by the privatized employer; or
